STRAIGHT BUSINESS
W. MURRAY, Jr.,
Auctioneer and Commission Merchant, Market Square.

WILL INTEREST EVERYBODY:
Or at Least Everyone Who Suffers
From Catarrh

Catarrh in its various forms is a national disease, and the fact that nearly everybody suffers from it more or less leads many to neglect its proper treatment.

Nasal catarrh is a common cause of headaches, destroys sense of smell and if neglected reaches the throat, causing impairment and sometimes total loss of voice. Bronchial catarrh leads easily to consumption. Catarrh of stomach and liver are very serious and obstinate troubles, while it is now generally admitted that catarrh is the most common of all causes of deafness.

All of the more serious forms of catarrh begin with nasal catarrh—the local symptoms, being a profuse discharge, stoppage of nostrils, irritation and frequent clearing of the throat, sneezing, coughing and gagging.

The old style of treatment with douches, inhalers, sprays, salves, etc., simply give temporary relief and everyone who has used any of them knows how useless they are and their inconvenience is such that very few have the time or patience to continue their use.

A radical cure of catarrh can only be obtained from a treatment which removes the catarrhal taint from the blood because no one will now dispute that catarrh is a constitutional—blood disease, and local applications can have no effect except to temporarily relieve local symptoms.

A new remedy which has been remarkably successful in curing catarrh is a pleasant tasting tablet which is taken internally and acts upon the blood and mucous membranes.

It is composed of antiseptic remedies like Red Gum, blood root and similar cleansing specifics which eliminate the catarrhal poison from the system.

The tablets being pleasant to the taste are dissolved in the mouth and thus reach the throat, trachea and finally the stomach and entire alimentary canal. They are sold by druggists everywhere under the name of Stuart's Catarrh Tablets.

If desired, when there is much stoppage of the nose, the tablets may be dissolved in warm water and used as a douche in addition to internal use, but a douche is not at all necessary.

A few dissolved in the mouth necessary will be sufficient. Dr. Anslee says:

"The regular daily use of Stuart's Catarrh Tablets taken internally will cure the whole catarrhal trouble without resorting to the inconvenience of a douche or an inhaler."

They seem to give a healthy tone to the whole mucous membrane and it is really remarkable how soon they will clear the head and throat of the unnatural and poisonous catarrhal secretion.

Stuart's Catarrh Tablets is undoubtedly the safest, most palatable and certainly the most efficient and convenient remedy for any form of catarrh.

It is interesting to note that there is in Great Britain 86 firms with an income of over £50,000, but not one in Ireland; and that in Great Britain there are 656 public companies, and in Ireland 19, which have incomes of over £50,000.

Chinese Art Of War.

A novel method of testing new weapons of warfare is now in vogue in China. A large cannon of the latest type was recently imported from Europe, and when it was landed on the coast of Hainan, the military mandarins of the district first inspected it closely and then resolved to test it.

They, therefore, procured a boat, they anchored at some distance from the land, and then they loaded the cannon and fired a shot at it. To their surprise, the shot did not hit the boat, but fell short, in the water. They determined to try again, but did not want to miss a second time, and so they brought the boat to the very spot where the first shot had fallen and anchored it there.

Then they fired, and, to their unbounded joy, the shot went clean through the vessel. Evidently, it never occurred to them that they could have attained the same end by aiming more carefully and slightly changing the position of the cannon, or, if it did occur to them, they thought that it was easier to move the boat than to go aim with the heavy cannon that they would be absolutely certain of not losing a second shot.

Experiment With Ruler.

If you desire to obtain a vivid idea of the force of atmospheric pressure try the following simple experiment:

Place an ordinary wooden ruler on a table in such a manner that half of it will project beyond the edge of the table, and then over the table, and the portion of the ruler thereon lay a smooth sheet of paper.

Now, if you strike the exposed part of the ruler it will in nine cases out of ten break in half, and yet the sheet of paper on the table will neither be raised nor moved, in the slightest from its position. The simple reason is because the atmospheric pressure exerted on the paper is more than sufficient to counterbalance the force of the blow which is struck at the ruler.

By means of simple experiments like these one can learn a great deal of science.

Borgia's Later Years.

In the National Library of Florence an Italian historian has found a document which contains many interesting and hitherto unknown facts in regard to the latter years of the famous Lucrezia Borgia.

According to it she took the veil

and joined the congregation of the Brothers and Sisters of Penitence, which is better known under the name of "Tertiaries of the Order of St. Francis."

She received the veil from the vicar-general, Ludovico de la Torre, and Giovanni Gonzaga wrote to Holy Under that during the last ten years of her life she wore a penitent shirt. She died in 1519, and was buried in the robes of big order.
