

The King of Ranges— "BUCK'S HAPPY THOUGHT"

REASON IT OUT

Why is it that some one article in each line of manufacture has always the largest sale? Is it because it's a poor article or a good one? Don't you think the reason of it is because it's better constructed than the others? That's what all people will think.

The "Happy Thought" Range

is the People's Popular Range of Canada. It's used by more cooks—has more features of merit—and uses less fuel than any other Range built in the world. If you don't believe this ask some of your neighbors who are using them.

A Sad Death.
 Posterville, Oct. 20.—Death has again cast a deep gloom over this place. On October 16th Minnie Murphy, second daughter of Mr. and Mrs. Philip Murphy, passed away. The news of the death of this estimable young woman was heard with the deepest regret. She was taken ill at her home, and after two days sickness passed peacefully away. Everything that medical skill and parental affection could prompt was done to alleviate her sufferings. The funeral took place on Saturday, at the Church of the Holy Martyrs, Phillipsville. A large cortege followed to pay their last tribute of respect. She leaves to mourn her loss a father and mother, two sisters and three brothers, who have the sympathy of all in their deep affliction.

Cushendall Cullings.
 Cushendall, Oct. 20.—At an informal gathering held at the home of Mr. and Mrs. Walter Spence, South Lake, a pleasant evening was spent lately, several from this locality being present. The gathering was in reality a farewell one, as Mr. and Mrs. Spence are going to remove to Gananoque. On behalf of several friends they were presented by Miss Louise Atkinson with a beautiful clock. An address was read by the Rev. R. E. Oliver. Miss Emma Woods, seriously ill, is now much better. Most of the local farmers are through threshing. One of the many new mammals recently discovered by Sir Harry Johnston, the British commissioner of the Uganda Protectorate, in East Africa, is a five-horned giraffe. Being a daring hunter, as well as a naturalist, Sir Harry has found many hitherto unknown mammals, whose skins have been sent to the British
