Kidney Complaint

For months past I have suffered with a bowel and kidney complaint, for which I tried many remedies in a vain effort to regain my health. I have used about three bottles of the new no-drug preparation, Powley's Liquefied Ozone, and have been cured thereby.

RICHARD ELLIOT,
31 Bruce St., London (South) Ont.

If you desire to stave off bowel or kidney trouble this fall you should make the system healthy with Powley's Liquefied Ozone. You need vitality and there's no better way of getting it than by increasing the oxygen-carrying power of the blood and getting rid of all the ordinary system poisons. Ozone will do it.

MARRIED AT ST. MARY'S.

A Pretty Wedding Celebrated Wednesday Morning.

A fashionable wedding took place at St. Mary's Cathedral at nine o'clock on Wednesday morning, the church was well filled with relatives and friends who had gathered to witness the interesting event. The contracting parties were Miss Bridget Corrigan, daughter of Dennis Corrigan, Bagot street, and Neil McDonald, Brooklyn, N.Y. The ceremony was performed by Rev. Fr. Kehoe, who celebrated the nuptial mass, assisted by Rev. Fr. Hanley, ex-deacon and Rev. Fr. Picotte as sub-deacon. Archbishop Gauthier presided the occasion with his presence. The bride was attired in a handsome tailor-made suit of blue broadcloth and carried a bouquet of white roses. Miss Nellie Corrigan, a sister, was bridesmaid, and was similarly attired in castor broadcloth. She carried a pretty bouquet of pink roses. Frank Corrigan, a brother of the bride, performed the functions of the groomsmen. An appropriate duet was well rendered by Miss McCabe and Edward Koen. After a wedding dinner at the home of the bride's parents, the happy couple left on the Cape Vincent boat for their future home in Brooklyn.

Part Of Fuel Supply Line.

Alderman Knapp, chairman of the fuel committee of the House of Industry, has purchased fifteen tons of coal, of soft and five of hard, from a local dealer. The fuel was secured at a very reasonable price. It is expected that the present supply will last until coal again becomes plentiful. About forty-five tons were burned in the institution last winter, but it is thought that this amount could, by practice of care and economy, have been cut down some twenty or twenty-five tons.
