## RHEUMATISM.

Some of the most valuable discoveries in medicine had their origin in remote countries among strange people. Quinine came to us from the Indians of Peru; opium from the barbarous races of Asia, and cod liver oil was given to us by ignorant whalers who, because it softened soften joints stiffened by rheumatism. They were right. It only remained for science to work out the idea, and today cod liver oil is one of the tism. As early as 1754 cod liver oil was recognized as a cure for rheumatism, and a few years later it was found that the same remedy could be used for the cure of skin diseases due to this com-

plaint. The first step in the cure of rheumatism is to supply the blood with nourishment and to make up the deficiency in red blood corpuscles. These corpuscles convey oxygen to the various tissues in the body and play a very important part in the process of combustion which is constantly going on within the body and which is called the "fires of life." Cod liver oil is an excellent fuel for these fires and they burn more brightly when supplied with it.

The faster the blood is made rich and plentiful in red corpuscles the sooner the rheumatism is driven from the system. In Scott's Emulsion the full value of cod liver oil is combined with hypophosphites of lime and soda, and, being perfectly emulsified, is best suited for the treatment of rheumatism where everything depends upon nourishing the blood quickly and effectually.

Scott's Emulsion differs from any other preparation in that it passes into the system without tax on any of the organs with which it comes in contact. By reason of its immediate action it is enabled to make rich blood faster than disease can consume it, hence it is not long before sufficient headway is gained to drive out the trouble and restore the body to a normal condition. It is in this way that Scott's Emulsion disposes of rheumatism and rids the body of the lingering symptoms that so often threaten a return of the disorder.

So-called wines, cordials and extracts of cod liver oil are worthless as they do not contain the value of the whole cod liver oil and hence cannot furnish the desired benefits. Scott's Emulsion has been the standard cod liver oil preparation for over twenty-five years.
