Now Recognized as the Cause of Serious Diseases.

Acid Dyspepsia, commonly called heartburn or sour stomach, is a form of indigestion resulting from fermentation of the food. The stomach being too weak to promptly digest it, the food remains until fermentation begins, filling the stomach with gas, and a bitter, sour, burning taste in the mouth is often present. This condition soon becomes chronic and being an every day occurrence is given but little attention. Because Dyspepsia is not immediately fatal, many people do nothing for the trouble.

It is now well known among able physicians that the whole constitution is gradually undermined and weakened, that the nerves and vital organs are seriously affected by any form of dyspepsia. This is plain, as every organ, every nerve in the body is nourished by the blood and the blood is replenished from the food digested. If the food is properly digested the blood is plied from a sour, fermenting, decay- committees. ing mass the blood is vitiated, poisonnervousness. FRACAS

at any time, young men wanted the AT QUEEN'S ARTS' CON-CURSUS LAST NIGHT.

> Medical and Science Students "Ducked" and Ejected-Fire-

ing Party-The Damage Done. The annual fracas in connection with Queen's Arts' Concursus took place last evening. This sitting of the court of justice, medical and science students always attend, and endeavor to give it the Arizona flavor. Due notice of the sitting was posted on the builetin boards, and when a large cartoon apreared in science hall, depicting an arts' court scene, in which appeared a skelet n representing medicine, and a science fellow squirting H2S on arts' men, it was known that trouble was brewing, for the "handwriting had appeared upon the wall." When the arts' constables arrived in

the old arts' building to take their posts at 7:30 o'clock last evening, they found about twenty science and dozen medical students lining the staircase leading to the upper storey, where the court was to be held. didn't take a long time to eject the visitors, after whose departure crier's voice was heard. Then the court proceedings began. But there were "proceedings" outside as well. The ejected students got into the old jun.or philosophy reom downstairs, rushed up the staircase, to Convocaand that W. A. Amey be appointed to | tion hall, climbed into the gallery and broke through the door leading upstairs. Here they were discovered by the arts' constables, who, aided by fifty of their supporters, overpowered rear of the old Collegiate Institute on the intruders on mischief bent, and carried them downstairs. One by one, the medical and science troublers were waiting room, and sent into the cold night, well drenched about the head and neck.

In the fracas three doors and some vember: Enrolled attendance, 423; windows were broken. The medical and science men when making their at-Enrolled, 344; average, 326. Increase tack from Convocation Hall, set off a years, 119. There were no cases of Roman candles were used to liven the absence or lateness on the part of the proceedings. It is said, also, that the fumes of H2S, that liquid of terrible odor, floated through the air, causing many a screwed-up face.

When quiet reigned, the dispensation of "justice" proceeded, Chief Justice Goodwill being on the bench. A 'post-mortem" arts student was fined \$2 for smoking in the halls and dancing at a recent function when that item was not upon the programme, A second year Pictonian was also dealt

The damage is estimated at \$50 which includes the breaking of some benches and disfiguring of the walls. The arts' men turned the hose on the attacking party as they emerged from the back of Convocation Hall, and floors and ceilings were flooded.

Some Furniture Missing. James Muckler, Johnston street, has reported to the police the loss of fire at his residence on Tuesday afternoon some of the furniture was removed to save it from being damaged or destroyed, and the bureau was inthen it has not been seen, and it is supposed that some one stole it.

ONE CHILD IN FORTY

All children need the elements of fat in their food because it is of first importance in proper nourishment. Doctors say one child in forty is properly fed - the other thirty-nine don't get a right amount of fat in their food at the right time.

If more children were given Scott's Emulsion it wouldn't take long before more than one in forty was properly fed. There is in Scott's Emulsion something that seems to take hold of children who do not get enough and proper nourishment from their every-day food.

First there is that important element of fat; this is contained in the cod liver oil in the very best and most desirable form. Then there are the hypophosphites of lime and soda which tone the blood and strengthen and nourish the bones. The perfect combination of these food principles in Scott's Emulsion makes this preparation of great value to all children.

We'll send you a sample free upon BOOTH'S
