NOT DUE TO CLIMATE.

Catarrh Is Found Everywhere. Catarrh is at home anywhere and everywhere. While more common in cold, changeable climates, it is by 10 means confined to them, but is prevalent in every state and territory in

the union. The common definition of catarrn is a chronic cold in the head, which if long neglected often destroys the sense of smell and hearing; but there are many other forms of the disease, even

more obstingte and langerous. Catarrh of the throat and bronchial tubes as well as catarrh of the stomach and liver are almost as common as nasal catarrh and generally more difficult to cure.

Catarrh is undoubtedly a blood disease and can only be successfully eradicated by an internal treatment. Sprays, washes and powders are useless as far as reaching the real seat

of the disease is concerned. Dr. Mclverney advises catarrh suf ferers to use a new preparation, sold by druggists, called Stuart's Catarrh Tablets, because actual analysis has shown these tablets to contain certain anti-septic qualities of the highest pleasant to the taste, convenient and mained. harmless, can be used as freely as required, as well for children as for adults.
