## NOBODY IS EXEMPT.

A New Preparation Which Everyone Will Need Sooner or Later. Almost everybody's digestion is disordered more or less, and the com: monest thing they do for it is to take some one of the many so-called blood purifiers, which in many cases are

merely strong cathartics. Such things are not needed. If the organs are in a clogged condition, they need only a little help and they will right themselves. Cathartics irritate the sensitive linings of the stomach and bowels and often do more harm than good.

Purging is not what is needed. The thing to do is to put the food condition to be readily digested and assimilated. Stuart's Dyspepsia Tab lets do this perfectly. They partly digest what is eaten and give the stomach just the help it needs. They stimulate the secretion and excretion of the digestive fluids and relieve the congested condition of the glands and membranes. They put the whole digestive system in condition to do its work. When that is done you need take no more tablets, unless you cat what does not agree with you. Then take one or two tablets-give them needed help and you will have no

Penitentiary Prisoners Say He Hurt the Ticket-of-leave System and Spoiled Their Chan-Ottawa Journal.

When George Johnstone, sheriff's of ficer at the court house, was in Kingston with Nelson Gordon, the other day, he was talking to the guards at the pentientiary and ascertained that the action of Nelson Gordon in breaking his parole and burglarizing while he was on ticke of leave had spoiled the chances for many others getting out on ticket-of-leave. There are many at present in the penitentiary who would, it is thought, take advantage of a chance given by the ticketof leave system. They have several times expressed the hope that they should get an opportunity to reform, but when they heard of Gordon breakgave up hope of getting out. The impression prevails among the prisoners with relatives. and their guards that the authorities will be a great deal more careful in future in letting prisoners out on ticket-of-leave.
