GOING TO DO THINGS. "I am confident," said Mr. Whitney to the Toronto News on Monday, I have every assurance of that fact." But when asked what preparations he of? was making for the campaign, he repl ed: "Oh, I have nothing to do with that. The local men will have to look after that part." Mr. Whitney is again posing for pictures, and this time as the prophet of the party. He knows what is going to happen! Of course he does. The funds will be pro ided, as they were in May, and possibly by alien hands. The money will be sent out in cheques of \$500 each to candidates and confidants. The athletes, the pug-uglies, will be buying and the bluffing by "the local tion. men." Mr. Whitney did not desire to give his brief to the enemy, but he appears to have done it all the same.

CANADA'S NEW SETTLERS. a great many of those who rushed into Canada this year, expecting to better their condition agriculturally, have been disappointed. They have not secured better land, they have not been as conveniently located so far If you like a good cup of tea try as the markets are concerned, they have not been as kindly treated as they expected to be, and some of them have returned to the United States. To all this the reply can be made, clearly and emphatically, that the condition of the settlers in the Canadian North-West is one of perfect satisfaction. The immigration movement is not to be checked by misrepresentation. Between Winnipeg and the past year. Many of these have been called Americans. They have been misnamed. They are Canadians, who had farmed in the middle and western states and made some money, had sold out deliberately, and re invested in Canada, knowing all about its climatic conditions and reaprosperous future before them. As a them, reared comfortable houses and roomy barns upon them, and put their surplus cash in the bank. The Inter-Ocean remarks that complaint has been made against the government because of the presence of so many Americans. It is feared that they will pave the way for the annexation of the Canadian North-West to the United States. That bugaboo has lost its power to excite and alarm. The settlers in Canada will be satisfied with good government anywhere. They are not political disturbers nor discontents, but persons, generally, who enjoy the highest citizenship and can be depended upon to do all in their power to promote it.

ANTIQUITY IN KINGSTON. An alderman in Toronto recommends a change in the method of municipal proceedings, his idea being that the council should be merely a onsultative body and that public works and improvements should be given more generously than in certain carried on by the public officials.
