company, of Canada, has obtained an

of oil lands now over 2.000 acres in all, thus increasing its assets by 38 p.c. with a corresponding increase in the intrinsic value of its stock. The fact that these additions were also made without drawing a dollar from its rapidly accumulating treasury funds avidences the intent of its directors to continue the success of the company's operations, and let no opportunity pass to maintain its substantial character and leading position among Canadian esterprises.

At the customary oil field reckoning of one well to an acre, the probable output from these properties is almost beyond computation. The Wheatley property adjoins the several wells drilled and operated by the Union Gas 4.01 Co., and is considered a very valuable acquisition; while President Woodward of the Dominion Company advises us that by the installation of the air compressor he expects to increase the output of the famous Gurd Gusher to 460 or 500 barrols a day—and this product is now bringing a higher price than any athes petroleum oil of the North American Continent. Cantracts are also under way for the immediate development both of the new properties where a xery high grade quality of oil has been found.

In view of these facts, as well as the sound financial position now occupied by the company, the directors have decided that the sale of stock shall
