#### ONLY PARTLY TRUE.

It is the common belief that what is popularly known as catarrh is simply a chronic cold in the head. This is true as far as it goes, but as a mat-ter of fact catarrh is by no means confined to the nasal passages, but extends wherever the mucous membrane extends, which means nearly every part of the body. The mucous membrane is the inside skin of the body and is nearly as extensive as the outside skin, and any

Partly Filled With Water at Ferry

The steamer Petrel, of the Collins Bay Towing and Wrecking company, which has been lying at Craig's whari all winter, began to leak rapidly yesterday, and late in the afternoon it was found necessary to tow her to shallower place to prevent the poss bility of her sinking. The steam Pierrepont took her over alongsic the ferry wharf. The water gained rapidly, and finally the Petrel was rest ing on bottom, a depth of about nine feet. It was supposed that an open sea cock or some other pipe had caused the accident. This morning a diver was engaged to look over the that the steamer could be pumped

Market And The Stores.

It is significant that the Kingston market prices are not dependent upon the store quotations. For instance; During last Christmas week, turkeys on the market sold at 13c. to 15c. a pound, while in the stores, the best could be obtained at 12c. a pound Again, within the last three weeks fresh eggs on the market brought 22c a dozen, while the stores retailed for 20c. Last Saturday, the reverse was the case. On the market chickens and fowl could be purchased at from 70c to 90c. a pair, while the stores asked \$1 to \$1.10. People generally think they are getting bargains on the market, but ofttimes the store
