HOME FROM THE WEST.

Alderman Craig Speaks About Queen's.

Alderman W. G. Craig returned this morning from Vancouver, where he attended the general assembly meeting. The assembly's stand regarding Queen's, he says, was received with favor everywhere in the west, and the Presbyterians of Canada are quite confident of being able to raise a further \$250,000 for the university, a million dollars. Twice before, they came to the aid of the university and shielded it from danger, and the declaration is now made that it can be done again with ease. Alderman Craig says that Mr. Charlton's speech that Queen's was retained was a masterful effort, and carried the assembly almost to a man.

HOT RAT STORY SMOKED OUT OVER 950,000 RODENTS.

How a Transport Was Cleared of The Rats When The Vessel Reached Manila—Many Others Drowned.

Manila, American.

When the United States military transport Sherman arrived at Manila recently she was, as in the case with most other ships that arrive from or touch Hong-Kong on the way to Manila, detained for inspection to see if she had any rats on board. When the ship transport dropped anchor in Manila bay, therefore, the official rat inspector went on board to see what was going on in the way of rodents. In less than fifteen minutes he hurriedly left the ship, and, going ashore, reported that there was on board the Sherman, according to the patent rat enumerator in use at Manila, no fewer than 950,000 rats.

The Sherman was immediately ordered to quarantine station at Mariyvelas, as no ship on which the disease-carrying rodents are found is allowed to dock at Manila until they are exterminated. Accordingly the Sherman steamed back to Mariveles. When she arrived there her hatches had been opened and an enough sulphur carried below to kill millions of rats. As soon as the ship was ashore, the sulphur fires were started in the hold, and in a few minutes the work of the fumos became apparent.

Out of the hatches three pouroed such a stream of rats as was never before seen in the Orient. First by the hundreds, and then by the thousands, they appeared at the hatches, and then leaped into the water. Every one tried to swim ashore, but the distance was too great for any rat to swim, and soon the great black line of paddling rodents began to thin out. Some of them reached a point about 200 yards off the ship, but none got any farther. After the fumos had been working for about an hour the rats stopped appearing, an inspection of the ship was made and not a rat was discovered. The Sherman then reentered Manila and discharged her cargo.

LETTERS TO THE EDITOR.

Acts Of The General Assembly.

Kingston, June 25.—(To the Editor): It was understood by the general assembly that \$10,000 a year, or an endowment of \$200,000 would meet the present financial needs of Queen's, but the assembly did not resolve that the first of these sums would be given this year, or that the latter would be raised at once. What it did wish to appoint a commission with power to confer with the trustees of the university and adopt the proper means to secure the financial aid for the purposes of the university. If after such conference it is found advisable for the church to retain the university, the commission of assembly is to refer the question to the Presbyterians of the church in Ontario and Quebec for their approval. This procedure will require some months, so that no special financial assistance can be expected from the church this year—Yours truly, H. ROSS.

Plaintiff's Strong Case.

Canadian Law Reporter.

Some time ago an action for damages was brought against the city of St. Francis. The plaintiff had broken his leg—he alleged by a defective sidewalk and sued the city. The attorney for the city interposed a plea of contributory negligence. He said he would show how the plaintiff when he broke his leg was drunk. But the judge stopped him in mid-career; he was a good judge and had a nose vigorous and a head clear.

"The court will not entertain such a defence," said the judge, looking sternly at the lawyer for the city. "Both the law and the equity are against you. Why should drunkards on the part of this plaintiff be a bar to his recovery? Sir, a drunken man, under the law, is as much entitled to a perfect sidewalk as a sober man, and needs one more."

Hogs Are Lower.

Montreal, June 25.—Owing to the more liberal receipts of live hogs to-day the tone of the market was weaker and prices declined 25c. to 40c. per 100 lbs., with sales at \$5.75 per 100 lbs. but quite a few lots that were on the market were contracted for last week at \$6 per 100 lbs. In sympathy with the above the tone of the market for dressed hogs was also weak and prices reduced 25c. per 100 lbs. There was a fairly good demand in spite of it, being partly a holiday and sales were made at \$8.25 per 100 lbs., for light weights and at \$8 for heavy.
