Plenty of Engines and Cars—Plans of C.P.R. for Getting Out Harvest—The Big Immigration From the United States Discussed.

Montreal, July 29.—"Though the average wheat yield in Manitoba and the territories will not be as large as last year, the aggregate yield will be somewhat greater, owing to the enlargement of the area under cultivation."

This is the statement made by William Whyte, assistant at Winnipeg to Sir Thomas Shaughnessy, the president of the Canadian Pacific Railway company.

"In the south-eastern portion of the province of Manitoba," remarked Mr. Whyte, "the crops will this year be light compared with the two previous years. But when you get farther west in the province the conditions improve very materially, thus making up, to a large extent, though not wholly, for the lightness of the crops farther south."

"A similar condition continues as you get north of the Manitoba, and the North-Western branch of the C.P.R. More moisture fell, and the crops are consequently better."

"So that the larger yield in some sections will almost completely offset the shortage in other parts. There will thus be a fair average crop."

"This year, owing to both the Canadian Pacific railway, and the Canadian Northern railway having added so largely to their rolling stock there will not be the slightest difficulty in supplying all the engines and cars that may be required."

"So that these things considered the shortage of the straw, the ability of the railway companies to furnish adequate transportation facilities, with the consequent absence of any spread between the track price and the elevator price, combined with the crop shortage in the immediate vicinity, prices all over the west are calculated to be much better."

"The farmers will undoubtedly have as much money this year, though they will not have as much wheat to the acre."

"Turning to a consideration of the inflow of population, Mr. Whyte said: 'The large immigration from all parts of the world still continues. Natural by the immigration from the United States affords us the best class. Coming, as the Americans do, from a prairie district, they are already familiar with the climatic conditions and with the prairie methods of farming. Consequently they will be producers from the start. That is the advantage they have over the farmer who does not understand prairie conditions.'"

Mr. Whyte said that the whole Saskatchewan valley embraced an empire capable of supporting millions of people, and that the major portion of these, if good men were required, would necessarily have to come from the western states. The British Isles had not many men to spare. It stood to reason that with its immense surplus population each year, almost 2,000,000 annually, the United States had to look elsewhere for settlement. That was found in the North-West, where land was cheap, where as in the western states, the average farmer could not afford to buy a farm in the immediate vicinity of his home for all his sons. Looking thus to the North-West, it often transpired that the head of a household sold his farm in the United States and removed northward along with his sons. That was what accounted for the large American immigration this year."

It had been suggested, added Mr. Whyte, that the Americans might breathe abroad an annexation sentiment, but, for his own part, he thought that, recognizing that they were now living under better laws—better secured than formerly, they would be content to enter into the spirit which is actuating Canadians everywhere.

WORK OF CONCLAVE.

It Is Expected to Be of Short Duration.

Rome, July 29.—There is a conviction at the Vatican that the conclave will be of short duration is proved by the fact that all those who are to enter the conclave to minister to the wants of the cardinals have been engaged for only three days.

The Tribune says that as the fishermen's ring, which could not be found after the death of the pope, may be discovered in some drawer which was sealed up, and cannot be opened until after the election of the new pope, the Camerlengo, Cardinal Gregia, has ordered a new one for use in the symbolic ceremony which occurs immediately after the successor to Leo is chosen.

It is officially announced that in addition to the will of the late pope, and separate from it, Leo XIII. left a trifling present to each of a long list of relatives, members of papal household, prelates, doctors, cardinals, etc. As many formalities have to be observed it will probably be some time before these gifts are delivered.

COPYRIGHT IN NEWS.

Important Ruling by Justice Joyce in British Case.

London, July 29.—A point of great interest to newspaper publishers was raised here in the decision of Justice Joyce, who holds that there is no copyright in news, but only in the particular language in which it is clothed.

The case arose out of one paper appropriating another's special service. This interpretation of the law will prevent news agencies from recovering payment if the news is put in other words.

Concessions to United States, Japan and England.

The Chronicle says that an important Russian declaration will be issued shortly. Meanwhile the paper says, it is significant that two British warships have just left Wei-Hai-Wei.
