NEW YORK, N. Y., AND

keeping warm. Their trials are un-necessarily carried into many homes of to-day. For it is unnecessary to put up with the uneven heating of stoves, the dust and impure air of the hot air furnace, and the many other inconveniences of imperfect heating systems when you can get the

Oxford Hot Water Heater

and Oxford Radiators which form the perfect system of home heating. The accompanying illustration shows where the water is introduced into the fire-pot at the rear and is thrown by a diaphragm from the rear towards the front of the firechamber and then passes over the surface of the horizontal sections. Thus the coldest water of this system is kept on outside of heater prevent-ing the radiation of heat into the cellar. Write for our booklet on bome
