Diarrhoea

When you want a quick cure without any loss of time, and one that is followed by no bad results, use Chamberlain's Colic, Cholera and Diarrhoea Remedy.

It never fails and is pleasant and safe to take. It is equally valuable for children. It is famous for its cures and saves a large part of the civilized world.

HARD TO DRAW TO DRAW LINE

THE CRIMINALS AND INSANE TO DRAW LINE

But Dr. Clarke Thinks That Strict Immigration Regulations Will Help Canada's Future.

Below is a synopsis of a paper on "Treatment of the Criminal," read in Peterborough at the health officers' convention by C. K. Clarke, medical superintendent of Rockwood Hospital for the Insane, Kingston.

The criminal is usually the most attractive person in the community, if he is judged by the attention given to his case by the daily newspapers. The general manhood of attention to the criminal is usually of a kind that is inadequate and crude, especially when the mental condition of a prisoner is supposed to be established by a battle royal between rival lawyers and medical experts. In words, the fact that many convicts are sent from the penitentiary to Rockwood suffering from gross brain disease is significant, especially when it is remembered that they had developed these diseases before being sent to the penitentiary.

Society must be protected, but punishment of the offence alone will not protect it. We must not forget the social conditions and defective institutions which produce the offence. The great trouble with the punishment theory is that in all instances it regards the criminal as a normal being.

The starting point in reformation is the proper development of the inmate. The ideal prison should have at its head a commission of the very best judicial and scientific men the country can produce. The inmate should be forever shut up and kept from society and the work of reformation, which is of course the true work of every prison, would be carried on intelligently and with hope, especially in the case of the young. The system of protection could also be developed, and that should involve the finding of a proper situation for the probationer.

The importance of having a highly trained and broadminded commission at the head of the ideal reformatory is recognized. These wardens should be conversant just as hospital nurses with the weak sides of the prisoners and the treatment to be employed. The aim of the ideal prison is that of being a moral hospital.

A Partial Remedy.

"Now I am by no means certain that we can find a perfect means of controlling the situation absolutely, to keep the door shut even to fugitives and criminals. A far more rigid system of inspection than that in use at present should be adopted—that would exclude the palpably insane and idiotic. In addition to this the diligent classes of immigrants who show marked evidence of mental disease or defect, or criminal tendency, should be returned to their own country at any time during a residence of two or three years.

"I am not a pessimist, nor am I an alarmist, but I cannot shut my eyes to things as I see them. The alien danger is a spirit we should exercise just as quickly and persistently, as well make laws will permit us. Kingston is not a safe place for a long settled district, unaffected to any great extent by immigration, and yet within the last ten years the government has had to contribute no less than \$72,875.83 to the maintenance of defective immigrants. Their maintenance rate was only calculated at \$120 per annum, and yet the total amount is rather surprising."

FASHION'S FURNISHING

A Serviceable Gown For a Young Matron.

Most gowns are designed for the tall, slight figure, never taking into consideration what the matron, or short, full-figured woman will do when making her gown. The designer will take account of the capacity of the production of nearly 5000 gowns per year.

E. W. Gillett Co., Limited

Another interesting exhibit in the new Manufacturers' Building is that of the E. W. Gillett Co., Ltd., manufacturers of the renowned "Magic Baking Powder." Great taste is displayed in the arrangement of the exhibit, a beautiful supply of electric light, artistically arranged, assisting in the display.

"Magic Baking Powder," says words familiar to all, is a household necessity, and the E. W. Gillett Co. has made it a household necessity to the many thousands of people who daily use it. The exhibit is a beautiful display of the product, showing the various sizes and packages, and the various uses to which it is put. The firm extensively deals in other household commodities. Suitably housed in a large show case are samples of Gillett's "Mammoth Blue," "Royal Yeast Cakes," Gillett's "Cream of Tartar," "Imperial Baking Powder," and Gillett's "Washing Soda."

"A testimonial to the solid worth of "Magic Baking Powder," etc., is the fact that for well nigh thirty years the E. W. Gillett Co., Ltd., has successfully stood the test of all competitors.

Pegley, Dingman & Company, Ltd.

As exhibits in the Manufacturers' Building which is attracting a great deal of attention is that of the above well-known

A SPLENDID YIELD

Of Wheat at Wolfe Island—Other Topics.

Wolfe Island, Sept. 14.—It is not necessary to go to the North-West to get a great yield from wheat. William Cooper threshed last week, from eight bushels down, 230, which will compare with the best yields of the West. A couple from Cup's Vincent were married here last week. Upon their arrival in the village they enquired if a license could be procured. When they found it could they secured the services of Rev. K. C. McLeod, who performed a legal wedding where the ceremony was performed. The groom looked as if he had seen thirty-five summers, while the bride seemed to be sweet sixteen.

Gillett's Edge factory has been in luck. For the last three weeks at the cheese board they were unable to board cheese for the simple reason that they could not procure boxes. As a result of it they have sold the three weeks' stock for 10c, which will give the patrons more per lb. for their milk than any factory on the island. Mrs. F. Staley had twenty-five turkeys killed by village dogs last week. A young fellow named "Jack" was abducted at night Greenway and his wife, Mrs. Sydney Watt's friends are glad to hear that she is recovering from her serious illness. Will Bustard, Charles Halliday, George Rattary and Charles Cummings spent a few days at Toronto to fair Jack Brieland attending Syracuse fair.

Robert Crozier, Olden, spent a couple of days visiting relatives last week. James Abbott, Woodville, N.Y., is spending a few days on the island. His friends are sorry to learn that he is a great sufferer from inflammatory rheumatism. Mrs. Bolton, St. Accompanied him, Mrs. J. E. Leases and a lady from the West for a few days after spending the summer at her parents, Mr. and Mrs. Patrick Lyons. Thomas McCarthy, Rochester, is visiting for a few days among relatives. Andrew Bell, who had a good position in Waterloo, N.Y., will move his family there next month. James Stevenson, who recently moved to Kingston township, will return to the island and still Richard Laughlin's farm. Frank H. H. and bride arrived home yesterday.

Says We Are Behind Time.

As a general thing, Canadians are satisfied that in the administration of justice, we are ideal and have little to learn that when a prisoner has been convicted and punished our duty to society has been finished. Canada is behind the times in this respect as far as the care and treatment of the criminal are concerned, the only punishment of the general apathy regarding the matter is that we have been living under conditions particularly favorable for ourselves, conditions that will no longer prevail. The difference between Canada and the United States is ordinarily explained by the assumption that our laws are better and are administered with greater dignity and promptness. It is a matter of fact we are years behind some of the states, notably New York, in the care and treatment of the criminal. Up to the present the United States have been the Mecca for all the defective.

It must always be the case that the failures in life will make a large showing in immigration returns, and while as a rule the sturdy, agricultural class of the British Isles furnish a considerable element to add to our population, the same cannot be said of the mental and physical weaklings

Ask Him

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine, this splendid tonic. Follow his advice and we will be satisfied.

Among The Papers.

The combined Sun and Star, Bethlehem, Penn., has suspended Munyon Remedy company's advertisement. The Toledo, Ohio, Times is to have presses with a capacity of 96,000 per hour.

W. T. Owbridge, chemist, Hull, England, is dead. He was originator and proprietor of "Owbridge's Lung Tonic" having the largest sale of advertised cough remedies in England.

THE GREAT DOMINION EXHIBITION

Dense Crowds, Increased Interest, A Triumphant Success.

Imperial, perhaps world-wide, might more fairly describe the great Canadian Exhibition in Toronto this year, and which is very rapidly drawing to a close. Loyalty to the throne and Canadian manufacturers' art are ranged side by side. We see the vest with the many manufactured Canadian finished products, abundantly displayed, and the "Made in Canada" is the watchword of the hour, and it speaks volumes as to our fair Dominion's progress in the manufacturing world. The exhibits are all of a high order of excellence and the writer herein pays tribute to some of the more enterprising firms who are making names for themselves, their enterprisers and their goods.

Entering the new and commodious Manufacturers' Hall, one is not long in finding the showrooms of visitors from all parts are to be found gathered round the Company's location eagerly taking in their interesting display and inquiring for some of the Company's pretty novelties.

The ample display of Comfort Soap is rendered the more effective and popular by the firm's generous offer with reference to a mammoth cake of the Company's product exposed to view. A handsome upright piano, of the value of \$350 is to be given to the fortunate individual guessing nearest to its accurate weight, which has been estimated at 100,000 bars of Comfort Soap daily at their famous factory at Toronto Junction, where their manufacturing plant covers a floor space of over two acres. Their palatial offices and spacious warehouses, etc., are located at 50 and 52 Wellington Street, West, Toronto.

The Dominion Oilcloth Co., Ltd.

Another exhibit in the Manufacturers' Building which really catches the eye of the visitor is that of the Dominion Oilcloth Company, Ltd., of Montreal.

In the space allotted to this distinctly Canadian enterprise are piled up and arranged with striking effect, as an exhibit, a dozen different experts, who were alike unanimous in their expressions of praise for the excellence of the "New Scale Williams Piano." He further stated to one of the Company's representatives that he had handled between forty-five and fifty of these pianos during the past six months. "They are so reliable that I purchase them in our loads," Mr. J. A. Bureau, of Montreal, the firm's representative in that city, in speaking with one of the members of the firm, stated that he had looked all around the piano exhibits and he smilingly asserted, "I think that the 'New Scale Williams' takes the cake." This firm has the most extensive piano factory in Canada, having the capacity of the production of nearly 5000 pianos per year.

E. W. Gillett Co., Limited

Another interesting exhibit in the new Manufacturers' Building is that of the E. W. Gillett Co., Ltd., manufacturers of the renowned "Magic Baking Powder." Great taste is displayed in the arrangement of the exhibit, a beautiful supply of electric light, artistically arranged, assisting in the display.

Pegley, Dingman & Company, Ltd.

As exhibits in the Manufacturers' Building which is attracting a great deal of attention is that of the above well-known

From the Alps of Switzerland

Another interesting exhibit in this building is that of Tobler & Co., Bern, Switzerland, manufacturers of Swiss Milk, Baking Chocolate and Swiss Cocoa. "Did you ever taste anything so good?" "It is the finest I have ever had," this is the first thing I have heard here today. "Then it is here, where you get it." "Where can I get Tobler's Swiss Milk?" "Every one is buying this Swiss Milk, eating it with a smile, and with a smile buying more. The dairy packages are filled with dairy cream, the pretty boxes, and the big chocolate boxes, all attract attention, and we do not hesitate to say that Tobler's Chocolates will make one of the best selling articles that has been put on the market for many a day and are just what are wanted for the Christmas season. Tobler's Cocoa is in the same class with the Chocolates.

The Gold Medal awarded to Tobler & Co. at Mannheim, in 1901, and in Liverpool, in 1903, for Swiss Milk, Baking Chocolate and Cocoa, are certainly good backers of the judgment of Fair Visitors.

Brown & Walls, Limited, 19 Melinda Street, Toronto, are the sole Canadian agents for Tobler's Chocolates and Cocoa. Passing along to the Machinery Hall, we readily notice the splendid display of the James Morrison Brass Manufacturing Company of Toronto, Ltd.

Their display of tools, machine tools, articles of metal, valves for pumps, valves, cups, phosphor bronzes, valves for pumps, valves, Hancock injectors and injectors, the J. M. T. automatic injector and valve, the standard valve production, the Horton steam engine, etc., etc., is so well equipped with shining brass yachts' hulls and bells, handsome gas fixtures and electric lights, every manner of articles, that the exhibition is one of great beauty.

This is enhanced by a liberal use of electric lights to show the fixtures in actual operation, and the display is always a centre of attraction. A beautiful set of electric chandeliers and a very artistic brass table, beautifully designed with an ornate top, are two of the features of this exhibit and divide one of the attention of the spectators with complete ease, showing the range of bath room fittings in nickel, brass which the James Morrison Brass Manufacturing Company makes, including even a gas hot water heater attachment, the "Came Instantaneous." Taken altogether the exhibit is one of the notable ones of the Fair.

Another exhibit which is worthy the heart of the capitalist and the engineer alike is that of the Chapman Double Ball Bearing Company of Canada, Limited.

Profit is kept down by the production of power, which is made, then power is immediately increased in profits. No invention hitherto shown comes near the Chapman Double Ball Bearing in its power, its speed, its efficiency and its economy. It is worthy of note that all the shafting in the Machinery Hall is equipped with these bearings, and that the great machinery of the plain journal. No lubricant is used. It is the best of the best. The Chapman Double Ball Bearing is a masterpiece of engineering, and is the best of the best. The Chapman Double Ball Bearing is a masterpiece of engineering, and is the best of the best. The Chapman Double Ball Bearing is a masterpiece of engineering, and is the best of the best.

Hotel Empire
