The effect is as if the currency had panded, and there is consequently rise in prices which stimulates pro duction and raises profits and wages The credit cycle which industry passes through between one panic and the next seems generally to last about ten years. Some writers have no doubt exaggerated the tendency of the cycle Miss Margaret Smith, of Valparaiso, to occupy ten years, and it must be Ind., admits that she is 104 years of admitted that there have been long chance. There were panics in 1710 and splendid remedy for all womanly discame in irregular intervals, but then orders. again the normal interval began to which the mind of man goes—politics or religion, we find no approach to such regularity as this. It is difficult

LESSONS GATHERED FROM | years for the spots on the sun to .recover their old relation to the earth.
It is explained that the variations of the sun spots affect the Indian and many other tropical harvests, that on account of this the demand for English goods is diminishing, This, in turn, injures certain English trades and the injury spreads in an ever wid-ening circle. It is not suggested that the cause of credit cycles lies in the sun spots, but simply that they may be regarded as a regular force, tend-As far into the past as tradition reaches there are records of periods ing to establish a decennial period show that there had been unusually ditions in 1831, and not only shows and 1844. The consequent increase in the ups and downs of their career to production and added to the wealth the present day, but indicates the available for commercial enterprises periods of prosperity and the days of depression until 1945. Following the same mathematical operation the loanable capital in the market that in eras of prosperity and adversity can 1844 the bank rate sank below 24 per be indicated to an indefinite date. It cent., and even 2 per cent. Then came has been found that good times and in 1845 the first failure of the Irish bad occur with remarkable regularity and appear to be governed by a well the effect of these things came to be fixed law. So closely have the periods felt. But by January of 1847 the bulof prosperity and adversity approxi- lion in the Bank of England had sunk mated a certain length that there is below fourteen millions, as against no absurdity in forecasting the condi- over sixteen millions in the August of tions as in the diagram for future 1846. The bank now raised its rate years. Men living in Toronto are able from 3 to 31 per cent., and then find-to substantiate the cycle theory. Their ing the drain-on its reserves contintestimony in nearly every instance ued, there was a further raising to supports the theory which the diagram per cent. Nevertheless, by April the explains. It must be remembered reserve was below \$10,000,000. The

Another Potato Famine.

Meanwhile, in 1846, there was an most billow of prosperity. Yet so other failure of the potato crop, and closely are the interests of the nations in most parts of Europe the harvest of the earth interwoven that the con- was bad. Agricultural prices were ditions in one portion of the globe higher than they had been for thirtyfour years. There was consequently porarily inflated credit. But the large importation forced on a heavy fall in siderable accuracy the vagaries of the price of wheat, which ruined many gust, Leslie, Alexander & Co. failed with habilities of about £500,000. On the 11th, a couple of other firms failed, each with liabilities of about £200,000. Within three weeks there were failures to the amount of over three millions in the corn trade. By begun to extend to other trades. Towards the end of October banks began to fail. On the 18th of October the Royal Bank of Liverpool had to close its doors, and this brought down two other Liverpool banks. In many west of England cities bank failures occurare ascribed to wars and speculation. 1847, and became more impatient over the low rate of interest obtainable to 1856, and the Indian Mutiny. As is usual with wars trade was tempor arily stimulated by what in the long sources of the world. In America, too some respects to the English one of the previous decade. It was then that 1847 were repeated on a worse scale with in Baden-Powell's "Protection many observers deem that they have sufficient evidence to prove that the rainfall on the earth for some time cycles.
