We Pick the Winners.

The system we employ to locate winners is identical with that used by "Pittsburg Phil," John A. Drake, John Gates, W. Langdon, Joe Yeager, and other famous plungers who win hundreds of thousands on the turi every year, and it proves just as successf We gather our information of prospective winners through a force of expert horsemen who hold a watch on

the horses in their early-morning trials, and in that way learn when they are ready to will The money that is played into the game by persistent losers, such as the large mass of are bound to be, goes into the pockets of the big operators, of which the Maxim & Gay Co., represent clientele, stands at the head, The work of the Maxim & Cay Co. is to place the general public upon a level wi

the winning plungers, and our success in this accomplishment has made us famous on two continen We do business only on the great racetracks of the U.S. We number among our clients some of known sportsmen, financiers and merchants in the country. Investment on the tarf is now deemed as legitime as any other high-class form of speculation. The present high standard to which racing has been brought, a the absolutely good faith in which turf affairs are conducted under the auspices of the Jockey Club in the Ea and the Western Jockey Club in the West, has inspired millionaire capitalists and business men all over the contry with as much confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and this is one reason with the confidence in racing as in the stock, grain and cotton markets, and the confidence in racing as in the stock, grain and cotton markets, and the confidence in racing as in the stock, grain and cotton markets, and the confidence in the confiden

transactions in the betting rings now rival in magnitude those of the stock, cotton and grain exchanges.

Another reason for the rapid growth of turi speculation in popular favor, is the rapidity with which all transactions are wound up. The speculator makes his investment at the racetrack in the afternoon through us and a ceives a notification by mail, in a letter guaranteed to bear a postmark earlier than the race is run, of just wi horses are to be backed for his account. By the next mail he is informed of the result of that day's o and he learns quickly just where he stands. At the end of each week he receives a complete statement of his count with a money order for his profits, less 25 per cent., which we deduct as our fee.

This gives a wholesome tone to legitimate turi speculation which cannot be found in the more or less involve transactions of the big exchanges, and this is why turfmen live more comfor tably and live longer

whose involved transactions are on their minds, day and night, for weeks and sometimes months at a stretch. Our Clients Won a Million Dollars. As it is well known that our clients have collectively won as much as a million dollars at a single race a ing, it is sometimes asked: "Why do not Maxim & Gay simply sit down and back their own selections instead of running a considerable clerical force and spending large sums in advertising in newspapers throughout the coun-

The answer is simple enough if one stops to consider the situation. Maxim & Gay, by dint of ability, energy organization, capital and advertising, have secured an enormous clientele, which means the command of capital. If we can pick winners for this immense number of investors, our profits are larger than if we played our own money only, for on a basis of 25 per cent. of winnings, which we charge for information and commission, one man out of every four of our customers is practically betting for us. The proof that this plan work for the benefit of the public as well is that they win 3 weeks out of 4 andour books show that no customer stuck to as for two months ever failed to get well ahead of the game, while not a few of those who now winning stables of racehorses and who are cutting an important figure on the turf, began the game as mere ices, playing our selections through us.

The principal upon which we operate is such that we must of necessity do the best we can for you. Our come, as pointed out, is derived solely from the percentage of the winnings of our clients, and if we cannot a you win, our entire income is cut off. That we have been successful in making our clients win, is amply preby the fact that we have prospered for upwards of three years, while imitators, pursuing more econbusinesslike methods have gone under by the score. Noting the success that was being achieved by Maxim & Garscores of "get-rich-quick" operators tried to break into the field successfully occupied by the older and more responsible firm, but it did not take the press and public long to discriminate between the legitimate and the illegit mate, and as a result we have continued to flourish uninterruptedly, while in the ranks of our rivals there have been scores of enterprises initiated, only to end in failure.
