Dr. Wood's

Norway Pine Syrup

Cures Coughs, Colds, Bronchitis, Hoarseness, Group, Asthma, Pain or Tightness in the Chest, Etc.

It stops that tickling in the throat, is pleasant to take and soothing and healing to the lungs. Mr. E. H. Bishop, the well-known golf gardener, writes:—'I had a very severe attack of sore throat and tightness in the chest. Some times when I wanted to cough and could not I would almost choke to death. My wife got me a bottle of DR. WOOD'S NORWAY PINE SYRUP, and to my surprise I found speedy relief. I would not be without it if it cost \$1.00 a bottle, and I can recommend it to everyone bothered with a cough or cold. Price 25 Cents.'

IT DOES A DOUBLE DUTY

It Cures A Cold Builds Up The System

No other medicine has the same double value as

MATHIEU'S SYRUP Of Far and God Liver Oil

In building up the system while it gives immediate relief. These two articles, properly combined and prepared, are positive in their heating and curative properties.

Order a big bottle from your dealer for 35 cents.

THE DAILY WHIG. 'Opium per Orbem Decor.'

AN ENTERPRISE OF MERIT.

The power of the water fall at Mississippi should attract more attention than has so far been given to it. Here is a natural flow of the water all the year around, with a fall of eighty feet and a consequent propulsive movement of unlimited capacity. This fall, if harnessed, if controlled so that its energy can be transmitted, will supply more horse power than all the engines and boilers in the city now present.

It costs between \$40 and \$50 per horsepower per year to supply it by steam, and the same service can be rendered by water power, it is estimated, for \$25 per year. It costs something to bring the energy to the city. The motors at the falls and the wires which span the distance between there and here would mean an invested capital of perhaps \$200,000. But the fuel consumed in steam-making alone costs \$160,000 a year, and that is only one item of expenditure. There appears to be money, large money, in the enterprise, and it will be surprising if the capital is not speedily forthcoming with which to develop it.

In Gananogue many years ago a company conceived the idea of turning the water power of the Gananogue river to account. They put considerable cash into the dams, and flumes and slides. But they have an asset now of incalculable value. The stockholders are the manufacturers. They line both sides of the river and their industries have given the village a proud name; that of the Birmingham of Canada. The owners of the Mississippi Falls should be the manufacturers of Kingston. They can make the power business pay. They can get what they want in the first place, cheap power, and they can offer it to others. In this way they can contribute to the up-building of the city. It is a subject which deserves more than a passing notice.

THE DECEPTION DETECTED.

The federal government has been apprized of the fact that Canadians have attempted a deception in the shipment of butter. They have adopted the Danish casks for pecking and labelled the contents Danish butter. When the goods reached London they were seized, and a notice of the fact was sent to Canada.

The fruit men, the cheese men, the butter men, all and sundry who are in the exporting business, have been warned by the government, and its agents to avoid every appearance of fraud. The men who have studied conditions abroad say that the English people are peculiar. They are most conservative in their ways. They do not take quickly to any new thing. The article, however good, must reach popularity by slow degrees. Canadian cheese did not jump into favour at once, but gradually, on its merits, it found admirers until now there is a ready market for all that can be sent to England.

Similarly Canadian butter has not reached the first place immediately. The Danes had a preference in the market for many a long day. They made butter which commanded high prices because of its superior quality. Canadians can make as good butter, and they have been shipping it and finding a ready sale for it. The packing has been done in boxes, however, and those boxes have been labelled "Canadian creamery." These shippers should be patient still. They should continue their efforts to win favour with their goods, without resorting to any devious ways. The deception referred to—the use of Danish casks for packing, the attempt to palm the butter off as Danish—will do harm. The experiment may hurt others besides those who participated in it, which would be regrettable.

The government has a duty to perform, namely, to identify the offenders, and to then inflict a punishment that will fit the crime. The whole shipping fraternity must not suffer on account of the few.

Mr. Foster, in England, is telling the people that under protection it is the foreigner who pays the duty. In the Canadian Common, in 1894, he admitted that it was the consumer who met the increased cost of goods. If the British people suspect him of humbugging them, he'll soon come back to Canada.

Mr. Chamberlain's plan of campaign would put a tax on foreign manufacturers and thus give Canada a cut of about \$10 on every \$100 worth of goods sent to England. This preference is equivalent to that shown by Canada for British goods.

EDITORIAL NOTES.

How would it do to call a public meeting and have the people indicate by ballot who they want to serve them as mayor.

The annual killing goes on of men who have been mistaken for deer. The dangers of the hunt are not minimized as time goes on.

Mr. Aylesworth is said to have some notions for political life. He could have been in parliament long ago had his inclinations been that way. He has not been a politician.

Half the money at the disposal of the streets' department spent in cleaning the highways. The proportion is too great or the methods are all wrong. Which is it?

Sir Michael Hicks-Beach calls himself a free trader, but he supports Mr. Balfour in his desire to edulge the nations that tax British goods with a retaliatory tariff. Mr. Balfour, as a giant with a huge paper club, is a very picturesque figure.

Another Problem.

The Ann problem, the problem of the hour and all other problems, are sent to the rear settee by the following, proposed by an eastern college professor: "What is the meaning of the following word: 'peruncontradistinguisabilliveness'?" The solver of this problem will receive a good headache as a prize.

GIRLS' COMPLEXIONS.

Believes Powder Puff Causes More Difference.

Ottawa, Nov. 16.—It takes a statistician to effectively reply to the riddle which is being asked by Canadian girls. George Johnson, Dominion statistician has been figuring out the sugar eating problem and it's up to the fair writer in The Leader to go hence. Mr. Johnson being interviewed said: "I do not think that the English woman's idea that 'sallow complexion' are caused by eating confectionery is correct. Confectionery is deemed by a good many people to be bad for the complexion, and it is so deemed because its basis is sugar. But if the English women have such superior complexions as 'English Lady' thinks, it must be in spite of the sugar eating, for the people of Great Britain use ninety-one pounds of sugar per head in the year, while the Canadians use only fifty-two pounds per head yearly. Perhaps it is the sugar they eat that gives the English women the pink and white; possibly the complexion comes from the powder puff."

SMALLPOX IS PREVALENT.

Twenty-Nine Cases Discovered in Eight Homes.

Toronto Telegram. Dr. Hodgetts, of the provincial health department, has returned from the townships of Kaledar, Hungerford and Tweed, where he has been investigating the smallpox outbreak. He reports twenty-nine cases in eight homes, with one death. The disease originated through the visit of a lady to Dal's Cottage, who was thought to have been suffering from eczema or some other skin disease.

This is the same locality where the epidemic of smallpox appeared ten years ago, when there were 200 cases with forty-five deaths. Every precaution has been taken to stamp out the disease, and no further trouble is expected.

JEWELRY RECOVERED.

Thieves Captured by Detectives Disguised as Milkmen.

London, Nov. 16.—Four men were arrested simultaneously in different parts of London, in connection with the great robbery of West End jewelers, two months ago, when they got away with \$60,000 worth of valuables. The thieves seemed to have left no clue but the detectives found fingerprints on a piece of candle. These were compared, and photographed with the police records. The prints were found to resemble those of a federates were traced and watched. They returned to their London haunts some days ago with plenty of money. All were caught in their beds this morning by detectives disguised as milkmen. Part of the stolen jewelry was recovered.

Cost Of Living.

Washington, Nov. 16.—The United States Bureau of Labor bulletin on the cost of living of workmen's families, showing that of 2,367 families in 33 states from whom data was obtained, the average income was \$827.19, average expenditure, \$768.34, average expenditure per family for food, \$326.90, and the average size of family 5.31 persons. The last figure is seven-tenths above the average of private families in the country as shown by the census of 1900. In the years 1890-1902, the cost of food reached its highest in 1902, being 10.9 per cent. above the average, for the decade 1890-1902, and an increase of 16.1 per cent. compared with 1896, the year of lowest prices.

Both Had Vanished.

Hamilton, Ont., Nov. 16.—Saturday night John Merriott, an Englishman, who has been working on a farm in Nelson, came to town and went to sleep in a room at the Victoria Hotel with \$30 and a stranger whom he met on the street and treated to several drinks. When Merriott woke up in the morning both the money and stranger had vanished.

The body of Mrs. Chester D. Massey, Toronto, is being embalmed preparatory to being sent to Canada next Wednesday.

FROM A SPARK

A SERIOUS LOSS TO AN INGLE FARMER.

Football Games on Saturday—Visitors From Yokohama, Japan—A Coming Wedding on Nov. 18th.

Napanee, Nov. 16.—Last Friday at Ingle four miles from Marlbank, John McFarlane's barn was burned. McFarlane Bros. were threshing and, at the noon hour, it is supposed, the day being windy, a spark from the engine started the fire. Two span of horses were in the barn at the time, and Arthur Kinnert, one of the helpers, in his endeavor to save the horses nearly lost his life. Only one horse was rescued and it was badly burned, as was also the threshing separator, and the season's crop of grain.

The two Albert College football teams played a friendly game of football here on Saturday afternoon. The seniors defeated Napanee by a score of two to one, and the Albert College juniors were defeated by a score of two to one.

Mr. W. J. Garratt leaves to-day for Vancouver, B.C., to join her husband, who has been in the west since last spring. T. F. Rutan leaves tomorrow for Swan Lake, Manitoba, and other Manitoba points. He expects to be absent a couple of months. Bert Allen, son of R. B. Allen, Napanee, returned last week from Manitoba, where he spent the last two months.

W. A. Rockwell, returned yesterday from Chicago, where he spent the summer months. Mrs. C. V. Sale, and two sons of Yokohama, Japan, arrived last week to spend a few weeks with her parents, Mr. and Mrs. W. A. Rose, Thomas street. They expect to visit England for a couple of months before returning to their far away home in Japan in the spring.

The marriage of Miss Georgie Henning and Lawrence Fowler, Scranton, Pa., takes place on the 18th inst. Mrs. James Harmer, Washington, is visiting her daughter, Mrs. Scott, and other relatives after a couple of years' absence.

FASHION'S FORM.

Here's a Beautiful Little Dinner Jacket.

Here is a design for the very daintiest of dinner jackets, and would be a most suitable gift to send a bride as an addition to her trousseau. It is a loose-hanging sacque made of a fine silk white point d'esprit, gathered full across the top and sleeves. It is finished at the edge with lacemotif crescent-shaped, applied on one after the other, making scallops. The little shaped jacket which is put on afterwards is made of Dresden tulle, a white background, with pale pink and green designs through it. This is all cut in one piece, with the tabs hanging over the shoulders. The four buttons are of rhinestones.

Lake Nepigon has been found to be a paradise for sportsmen. Speckled trout has been caught there weighing eight to ten pounds a piece. Deer has been found in abundance in its vicinity and several hunting parties are camping there at present.

King Victor Emmanuel is very bitter against the czar for cancelling his visit to Rome, Queen Helena, however has always been a keen friend of Russia.

A French company will shortly be started in London to ensure against frost. Branches exist in Germany, Holland and Belgium.

The Danish parliament has voted \$1,750,000 to rebuild the Christiansborg Castle as a palace for the king. Thomas Macauley, a sixteen-year-old Brooklyn boy, died from injuries received playing football.

IS YOUR BACK LAME?

You Are Doubtless Suffering From Diseased Kidneys—Surest Cure is FERROZONE

Unless you want to be stricken with incurable Bright's Disease, don't let your kidneys go without attention. Ferrozone is a special remedy for this trouble, and never fails to give prompt relief and bring about a perfect cure. Gordon J. Macfarlane of Bradford, was cured by FERROZONE, after being treated unsuccessfully by three doctors for kidney complaint. "My kidneys were in a very bad shape," he writes, "and I had dreadful pains in the back and sides, and was never free from a dull, heavy feeling, that made life miserable. I spent a lot of money on local doctors but was not benefited to any extent. Then I tried Ferrozone. One box helped me so much that I got six more, and before they were used was quite well. I never used anything giving such prompt and lasting relief as Ferrozone. It beats all other kidney cures."

People suffering from kidney disorders quickly lose strength, and often die young. Therefore it is important to get Ferrozone at once, and be released from every symptom of this baneful disease. Price, 50c. a box, or six boxes for \$2.50, at all druggists, or by mail from The Ferrozone Co., Kingston, Ont.

Souvenir Range. You run no risk in buying this range—it is made on honor without reference to cost. Every part is so constructed as to render it the most durable and best operating—parts of the fire box exposed to the fire will outlast at least three ordinary ranges. Makers' Written Guarantee. The makers have every confidence in this range—they bind themselves in writing that it will operate perfectly and against imperfections in material and workmanship. Such a Guarantee accompanies no other range—enough said. Gurney, Tilden Co. Limited, Hamilton Toronto Montreal Winnipeg

TRUTH IS MIGHTY AND WILL PREVAIL

An epidemic of sales has corrupted the clothing business. The sham has grown with years until the effrontery blazons itself on every side. Coats, Suits and Trousers are marked double their worth and then reduced to half! If some advertisers were compelled to establish the truth of their statements it would ruin many of them—since it would force them to be honest. It is easy to distinguish between our values and false values. That's what made our great business—how else could we sell more clothing than any other store in town? People buy where they get the most for their money and are certain of satisfaction. The success of a store depends upon what it does, not what it promises to do.

- Our Gloster Overcoats At \$10 and \$12. Our Grosvenor At \$7.50, \$9, and \$10. Our Westminster At \$12 or \$13.50. Our Chamberlain At \$13.50, \$15 or \$18.

THE H. D. BIBBY CO. Cash and One Price Clothing House, Oak Hall.
