BREAK IN SIBERIAN LINE AT LAKE BAIKAL.

A Times Correspondent Says It Will Be Impossible To Transport Many Men Over It. In connection with the report that across Lake Baikal were caught in a snowstorm and frozen to death, the following from the London Times of February 3th, two days before the outbreak of the war, is of value as elucidating the facts concerning the weak link in the Sinberian railway ; by land, the strangulation at Lake Baikal is a serious disadvantage for Russia. The Times correspondent in

Manchuria states that two steamers world, as far as mails are concerned. largest making seven voyages, or storm come before a thaw the roads tells us that the railway round lake will not be completed until 1905, or a year later than Russian calculations had anticipated, and he adds that by the combined means of sledges end and in most every village there is a be conveyed across the lake in twentysteamers some 750 tons of stores can on four hours. From this he concludes the sick list, and is hardly expected that eight trainloads can be taken across the lake every day, and that operating his gasoline engine in con- this figure represents the maximum capacity of the traffic on the line of to dress tastefully, the idea being not found here in excellent condition. Our England on Ash wesheady. Selection of fish are: Sea Salmon, Hall-but, Cod, Haddock, Bluefish, Shad, ness College, has secured a position to the next three months and is concommunication at this important to have her frocks too young or to point. It is a liberal estimate, and it old for her. The above illustration by a poor herder named Gordon, who in Montreal. He left here Wednesday. to the next three months and is connow will have to be removed from both sleigh and steam traffic continu- and waist, and the reveres give the sidence there and fulfilled all the coning without interruption.

This question requires a little furloran died Monday at the residence of greatest blot in the Russian military position in the east. A railway is under construction around the southern home near Etinsville. Very few only reached Tonkhoi, whence it is shores of the lake, but so far it has ming. two hours journey to the eastern shore. The mailway enterprise encount-Post office boxes will not be able to shore. The mailway enterprise encount-hold the mail matter when it does ers many difficulties; it requires the Of Native Terms Used In The come. It has been decided to hold piercing of nineteen tunnels through the next 12th of July celebration in Yarker. It is over forty years since the 12th of July has been celebrated the lake, and Russian engineers have here, and some who were present at very little experience of making tunit, state that it was the most successful ever held in the county. The of railway work. There are, besides, bell ringers will be here next Tuesday many broad and deep marshes to be spanned, and the plant required for this purpose will require many con struction trains to be devoted to its transport if the work is to be carri no services were held in the Methodist ed on concurrently with the supply and reinforcements of the army in the and wife have been visiting at Hay east. We learnt what it meant in the Sedan to continue work on a rail wav and yet keep an army of only 20,000 men at the front supplied. The Russian numbers are ten times greater times longer; the Russian difficulties are therefore greater, even though the Trans-Siberian is, on the whole, more

solid than the Desert railway of 1898, Lake Baikal is 400 miles in length and is usually frozen over for several months in the year, the first serious frost having occurred this year or January 2nd. The ice generally inice of moderate thickness, heavy frost is liable to cause the steam traffic to During the months of February. exclusively by sledge. It is at this ters-for instance; moment that the circulation on the

maximum, and so long as Baikal remains hard frozen it is rather an vantage than a reverse. But the lake \$6; beef, choice, carcase, \$6.50 to \$7; is subject to severe storms, and if beef, medium, carcase, \$5.50 to \$6; these occur before the ice has become lamb, vearling, \$8.to \$9; mutton, per firmly set it becomes hummocky and cwt., 86 to 87; veal, per cwt., 87 to the traffic by means of sledges is often delayed. In early spring and in autumn the greatest difficulties arise Neuralgic Headache Is Usually since the ice is too weak to bear Attended with blinding pain, but sledges and vet strong enough to im-

> are more likely to represent the fact. The report that dynamite has been discovered in the masonry of the bridges on the line and that other preparations have been made to destroy the railway may be true or false. In any case the insecurity of the railwav is plain, and the necessity for breaking it up must have long ago occurred to the Japanese staff.

Schoolboy On Dogs. Philadelphia Telegraph.

A GOLD MOUNT.

\$22,000,000 ALREADY TAKEN FROM MOUNT MORGAN.

And Plenty More To Be Had-Composed Entirely of Gold Ore-Sold by a Poor Herder for \$5 an Acre-Fortunes Made London, Feb. 23 .- A London news-

paper announced the other day that the usual monthly dividend of \$145,-000 had been paid on the stock of the Mount Morgan Mining company. Thus far the lucky shareholders in this company have received more than \$22,900, The richest gold deposits were found

at the top of the mountain, and until the top had been quarried away the dividends amounted to more than \$500,000 a month. The sensational returns ceased several years ago, and since then the company has been paying regularly \$145,000 a month, and seems likely to continue to do so for many years, for the entire mountain as far as can be ascertained, consists of gold bearing ore of uniform rich-Mount Morgan, in the southeastern

part of Queensland, Australia, is probably the most marvellous gold mine years she is at the most difficult age ever opened. There is pathetic as well as romantic interest in its history. Years ago the mountain was owned eked out a precarious existence by making a little girl's frock. There is keeping a few score of cattle. He had sidence there and fulfilled all the conditions necessary to make the property

hosen so uninviting a spot, for the pasturing was poor and little of soil was adapted to cultivation. He said, however, that he had plenty of water and that consideration had induced him to settle there. Cne day two brothers named Mor

gan came to Gordon's cottage at rightfall and sought his hospitality. It was the custom in the bush country to make all travellers as comfortable as possible, and Gordon welcomed the for their entertainment. Vi.-A small post town as Ychang. They were experienced prospectors

and were looking for gold indications. And the termination of geographical As they were chiefly interested in mining. Gordon told them about his Kiang, Ho, Ychuan, Ychu,-All mountain. He said that he had observed curious green and blue stains all over it, and he would not be surprised if it contained copper. He excited the curiosity of the Mor-

gan brothers, who next morning examined the mountain. A shower during the night had wetted the rocks and one of the brothers observed it Ycheng-Chen-Holo.-Town, large vill- dications of gold that fairly startled

> few specimens of the rock and went on their way. They had discovered the richest known spot on the globe. A few weeks later the Morgan brothers again appeared and offered a to buy the land from Gordon at \$5 an acre. He thought it was a good offer and decided to sell. At that time the Morgans had no idea of the enormous value of the mountain, though were confident that it would handsomely to work it Gordon drove his cattle away to an-

> erty. He lived long enough to know the value of the prize that had slipped

money enough to buy the necessary Do.-As termination indicates that plant. They, therefore, offered a half interest in the property to a resident therefore, "the district of," or that of Rockhampton for \$10,000, the money to be invested in machinery. He said it was too great a risk for one man to take, but he found three other men to go in with him, each investing \$2,500. There were thus six men in the enterprise, the Morgan bro-Last For Years

there owning half of the property.

Five years later each of the six men was a millionaire. The stock is now more widely distributed, though it is in comparatively few hands. The mine

Not Carbonated—Made from the best of Malt and Hops.

> cessary for mining and reducing the ore were unique, as no similar forma tion or quality or ore had been discovered elsewhere, Original methods were therefore devised for working the At the foot of the mountain there i now a thriving mining town, and the whole district has been transformed by the great expenditures of the com-
