TELLS OF CRIME.

Girl Betrays Parent To Save Innocent Woman.

Vienna, April 5.—An absorbingly dramatic story was unfolded at the trial of a man named Kaufmann, accused by his own daughter committed ten years ago.

The victim of the crime was a shopkeeper, who had been robbed of a large sum of money and brutally hacked to death.

To the identity of the murderer there was absolutely no clue, but Kaufmann, frightened by the close investigation which was being made, accused a fellow townsman named Gensinger, the latter's wife, and an ex-soldier named Nagel of having committed the murder.

He aided the police in weaving an astonishing web of circumstantial evidence round these three, and in the end the woman and the ex-soldier, between whom there had been an intrigue, were found guilty and sentenced to death, Gensinger being acquitted.

On appeal, however, the death sentence was remitted, as it is the custom in Australia when the evidence is of a purely circumstantial character. Nagel died a few years later in prison, where the woman, continually protesting her innocence, was rapidly losing her reason.

To this tragedy of justice miscarried there came a few weeks ago an astonishing sequel.

Kaufmann's wife, turning out a loft in their house, came across some property which she recognized as having belonged to the murdered shopkeeper. She confronted her husband with it, and eventually he confessed that he was the real murderer.

They agreed to keep their guilty secret, but their conversation had been overheard by their daughter, and tortured by the thought that an innocent woman was consigned to a living death in jail, and that one life had already been sacrificed for her father's long concealed crime, she went to the police.

There was a terrible scene in court when the daughter—a tall, handsome girl of twenty—almost incoherent with grief, told her story to the public prosecutor.

Its truth was admitted by Kaufmann, who, with callous unconcern, told the judge he went to church before killing his victim and prayed that the crime might be successful and that its author might not be discovered.

He was sentenced to twenty years' imprisonment.

GERMANY GROWING COTTON.

Empire Gives Funds For Railway In Colony.

Berlin, April 6.—The North German Gazette announces that a bill providing for a loan of \$2,000,000, guaranteed by the Empire, for building a railway seventy-six miles long, from Lome to Palime, in Togoland (German West Africa), adopted by the Bundesrat, will be sent to the Reichstag in a few days.

A report accompanying the bill presents as the chief argument for the necessity of the railroad that it will promote cotton growing, which has been demonstrated as a success in the Togo Hinterland. Not only the colony, but Germany herself, has a predominant interest, says the report, in promoting cotton growing.

FASHIONABLE WEDDING.

First Roxburgh-Goelet Bridesmaid Married.

New York, April 6.—The first of the notable Easter weddings in the metropolis took place in St. Patrick's Cathedral at noon to-day, when Miss Pauline Whittier became the bride of Ernest Iselin. The ceremony was attended by prominent society people of Boston, Philadelphia, Baltimore and New York.

The bride, who is the first of the Roxburgh-Goelet bridesmaids to be married, is a daughter of General and Mrs. Charles A. Whittier of Boston, who have spent the winter in New York. Her elder sister married, a few seasons ago, Prince Belsorsky, of Russia.

Ernest Iselin, the bridegroom, is the elder son of Mr. and Mrs. Adrian Iselin, Jr., a member of the Iselin banking firm, and is heir to several millions. He graduated from Columbia five years ago, and is a member of numerous clubs.

DISCONTENTED WITH PAY.

Artillery And Infantry of Tasmania Disbanded.

Melbourne, April 6.—An order in council has been passed disbanding two batteries of artillery and six companies of infantry attached to the Tasmanian forces. In addition twenty-seven officers have been placed on the unattached list.

This action has been taken owing to discontent among the men on account of their pay, which resulted in only 119 men out of 800 appearing on parade when Major-General Sir E. Hutton, the federal commandant, held an inspection last month. The disbanded corps are one-fourth of the entire Tasmanian force.

Rev. Mr. Tighe At Sydneyham.

Sydneyham, April 5.—Rev. Mr. Forsthe, although out of his room after his long illness, is not able to face the cold east winds just yet. Rev. Mr. Tighe kindly took his services in both churches, and was highly appreciated by the congregations. His sermon in St. Paul's, was a masterly one. His long experience in the work of the sacred ministry, coupled with his deep learning in spiritual things, must cause his discourses to be most helpful to the earnest Christian who is "looking for the truth as it is in Christ Jesus." We hope that he will be spared to assist his brother clergy in time of need and prove his loyalty to his friends and the church he loves so well.

FODDER CHEESE

WHAT MR. M'KINNON SAYS OF IT.

Hopes To See The Time When Not a Pound Is Made—It Interferes With The General Trade.

D. J. MacKinnon, cheese buyer, writes to the Tweed News in opposition to the making of fodder cheese. He writes:

"Too much cannot be said regarding the curtailment of their manufacture as in making fodder cheese the farmer cuts his own throat, but you cannot tell him that. He may tell you, 'well the buyers will buy them,' so they will, because that is a buyer's business, he is not a seller. Again the average farmer will not listen to the buyer as they imagine everything a buyer will say is for his own benefit and not for the farmer that he is talking. Let me tell you here, farmers and salesmen of cheese factories, that if you would work more harmoniously with the buyer, and not imagine that he is out to do you in everything he undertakes, you would make more money and be farther ahead in every way.

"Think of the nice markets we would have if every cheese factory would close on November 1st, and not reopen until May 1st. Why, man, would he be willing to wage his year's average prices for your goods year in year out, good year and bad, would not average, less than ten cents a pound for, say, the next five years, but instead of such a condition existing we have the very opposite, and what's the result? We are encountered with a widely fluctuating market. When markets are bad they should be good, etc., and even when we make our finest cheese those faddlers are in the way and will be sold so much cheaper, resulting in poor prices for our finest goods.

"In closing I would say farmers and dairymen take heed of the warning now, do not wait, for you know what it means to protect the dairy interests in this country, and when a grip is once lost it is hard to regain, so let this be your motto, 'What we have we'll hold' and do not give any other country a chance to get ahead of you in the dairy line. So club together, make a rule or law prohibiting the make of faddlers. It is in your hands, all the buyer can do is talk and if he finds you are not listening he will not do much of even that, so try and do something to save yourselves.

"I hope to see the day when we will not be able to buy a fodder cheese in this country."

A Vet. For Bloomfield.

Bloomfield, April 5.—Shipping is gone, but the weather sometimes cold and unfavorable for the making of maple syrup. Death has visited this place during the past few weeks and removed several of the old landmarks in the persons of Benjamin Mastin, Miles Lucas and William Stone, all far advanced in years. Isaac Wilson and wife, have returned home, after spending the past winter in the states. Miss Ruth Bird has returned from England, where she has been visiting for several months. The bitter factory opened on Monday last, the earliest in its history. Ray Gorham is home for Easter holidays. A. B. Taylor & Co. are expecting some new green pea thrashers, and other appliances to place in their canning factory. No damage was done during the spring freshet. Mr. and Mrs. Anderson, organizers for the R. T. of T., were here last week. About twenty new members joined the L.O.F. at its last meeting. Andrew M. Yanchuk has graduated from the veterinary college, Toronto, and will probably locate his practice in this place.

MORMONS GATHER

In Annual Conference At Kirkland, Ohio.

THE OLD MORMON TEMPLE.

Kirkland, O., April 6.—The annual world's conference of the Re-organized Church of Jesus Christ of Latter Day Saints, commonly called Mormons, convened to-day in the famous old temple which was erected here more than three decades of a century ago, when Joseph Smith was the scene of activity of Joseph Smith and Brigham Young. Nearly 2,000 delegates are attending the conference and they come from all parts of the United States and some from Canada, Europe and Australia. The conference will continue about two weeks and will be devoted exclusively to the discussion of church affairs.

Although not generally known, the Latter Day Saints hold the doctrine of "Polygamy" "Adam God's worship and "Blood Attonement," as taught by the Utah church, to be heretical. The headquarters of the Latter Day Saints are at Nauvoo, Ill., where one of its principal churches is located, the other being at Independence, Mo.
