They are designed on lines which give a free channel for the flow of water or steam, thus keeping the radiators at an even temperature throughout the building and operating with perfect silence.

The Oxford Hot Water Boiler is constructed in horizontal sections of cast iron. The first section is near the fire, thus heating the water ou ckly and making the temperature easy of regulation.

Our entire plant at Torons o unction, covering many acres of ground, is devoted exclusively to the manufacture of Oxford Hot Water and Steam Boilers and Oxford Radiators.
