The official report of the total wheat from the crop of last year, which would make the smallest since 1897. The decrease in rye is based at ten per cent., making the crop about 48,000,000 bushels:barley, 24 per cent., leaving 47,000,out bushels, and oats 74 per cent., which would make a crop of about 21,out was probably due to the severe drought of the spring which has prevented germination of the crops.

The official report of the total wheat crop of India, as cabled, makes the figures 353,054,000 bushels, against 292,320,000 hushels last year, and 249,552,out the spring which has prevented germination of the average for five years.

This is an increase in round numbers of 61,000,000 bushels over last year, and an increase of 104,000 bushels over the average for the past five years. The exports of wheat from India for the past

vear were 48,000,000 bushels, so that if the increased surplus was all shipped, total clearings might be 109,000,000 bushels. Estimates which have been nade hitherto based on the semi-official tes of the crop, have, however, in-i exports for the year of only 60,000,000 bushels to 70,000,000
