Nine Persons Out of Ten Have Kidney Trouble-Warner's Safe Cure Is the Only Positive Cure.

There are thousands of men and women going about the world today with kidney trouble, who are apt to die at any moment of Bright's disease, diabetes or blood poison. They evidently enjoy being sick and subject to sudden death, because they don't or won't even take the trouble to find out

what's the matter with them.

Some of them don't suffer enough—they think it's "nothing much and will wear off of itself." Kidney disease never cures itself.

Others have doctored so much and are so completely discouraged that they have made up their minds there is no hope for them anyway; the doctor has told them they must die, and at lest they believe him.

And yet thousands upon thousands every year, even in the most advanced stages of kidney trouble, when too sick and weak to move in bed, even when the shades of death are havering near, have been cured—literally snatched from the grave — by Warner Safe Caire.
