

DR. SLOCUM'S WARNING! Look Out For Germs of Pneumonia at this Season of the Year! Says Dr. T. A. Slocum.

A DANGEROUS TIME

DR. SLOCUM'S PSYCHINE (PRONOUNCED SI-KHEEN)

Pneumonia is brought on by over-exposure to cold or damp. This weakens the body. At this time of the year the air is full of pneumonia germs, and as soon as your body is weakened they attack you.

DR. SLOCUM'S PSYCHINE is a general feeling of dullness and languor, quick, short breathing, short hacking cough, oppression in the chest, a chilly sensation, and a coldness in the extremities.

A Royalty Kept Promise.

This was one of the poems for which Miss Rose McNamara received a letter of thanks from King Edward a few months ago.

"I will be good! I will be good!" Said a little royal maid.

"I must wear old England's crown, King Edward said this aid.

To rule my kingdom, wisely, To win my nation's love,

To bring my reign to a peaceful end, Give strength, Lord, from above.

"I will be good!" Victoria said, On her coronation day.

To guide the reins of government, Dear Father, say the way!

Soul love and peace to Britain's Isle, Willst Thou, my kindred blood

Resolve within its narrow heart, For Thy sake! to be good."

And she was good, she kept her word, This dearest pledge she gave.

Here's a thought for the rising maiden Whom a fruitful life would choose,

Stand faithful to your promise, As did England's "Royal Rose."

How It Spreads.

The first package of Dr. Leonard's Hem-Roid (the infallible Pile cure) that was put out went to a small town in Nebraska.

It cured a case of Piles that was considered hopeless.

The news spread, and although this was only two years ago, the demand prompted Dr. J. S. Leonard, of Lincoln, Neb., the discoverer, to prepare it for general use.

It will cure any case of Piles. There is a month's treatment in each box.

A New Idea on The Cause of Colds

Pneumonia, La Grippe and Consumption, and a Reminder of the Phenomenal and Continued Success of Dr. Chase's Syrup of Linseed and Turpentine.

Scientists have a new explanation for the great prevalence of colds, la grippe and pneumonia.

They tell us that when we pass out of doors we enter an atmosphere where the humidity averages about 70 per cent when it might have been as low as 30 in the house or office.

The sudden change from the dry and overheated air of the house to the cold and more moist air of out doors is a shock to the mucous membranes which induces colds, la grippe or pneumonia.

This evil is largely due to modern methods of heating, and can be overcome by keeping the air moist in buildings.

But there are colds to be cured, sufferers from the grippe that require treatment, and every day these ailments are developing into pneumonia and consumption.

In these cases Dr. Chase's Syrup of Linseed and Turpentine is at hand as a tried and proven medicine of far more than ordinary merit.
