> When the ice lets go its hold And lets the rivers flow ; When the weather forgets it's cold And winds forget to blow, Why, then it will be spring

A cold is always the result of undue exposure to low temperatures. The rapid cooling of the surface, when not balanced by proper reaction, produces the congestion and inflammation of the nasal and bronchial membranes, commonly called a cold. As the slightest cold predisposes the individual to attacks of the most severe and dangerous character, the necessity for its quick cure need not be emphasized. Take

Chamberlain's Cough Remedy

as soon as the first indication of the cold appears and all dangerous results will be avoided. It not only cures a cold quickly but counteracts any tendency of a cold to result in pneumonia. This fact has been fully proven during the epidemics of colds and grip of the past few years. No case of either of these diseases having resulted in pneumonia when this remedy was used. has ever been reported to the manufacturers or come to their notice, which shows conclusively that it is not only the best and quickest cure for a cold, but a certain preventive of that dangerous disease-pneumonia.

There is no danger in giving this remedy to children as it contains no opium or other harmful drug. It is pleasant to take.
