famous Portuguese stone is known as the Braganza diamond, and no one knows just what it is. When it was t contains all the virtues of the Norway found in Brazil the diamond dealers Pine Tree, combined with Wild Cherry of that country estimated its worth Bark and the soothing and expectorant this figure, but the probability is Mr. Harry Mosher, Mosher's Island, that \$395 more nearly represents what the stone would bring at auc-N.S., writes:—"We have used Dr. Wood's
Norway Pine Syrup in our family for the
past six years, and have always found it
a reliable remedy for the cure of coughs
and colds."

Therefore diamond dealers draw their own confilling four columns less.

George Wyndham, 180, and Arnold-Forster, 169. D. Lloyd George's record was 166 columns, and T. Gibmond dealers draw their own confilling four columns less. clusions, and they are not favorable to the genuineness of the celebrated Many cases of substitution have been rought to our notice. Do not be hum- Braganze, stone.

The Famous Kobissor. Probably the most famous diamond in the world is the Kohinoor, now n the British crown. It is nominally valued at. \$700,000, and is famous not so much for its size as for its marvelous purity, and interesting for mond, like all the most beautiful gis, and is said to have a history ating back 3,000 years B.C. Cersinly its movements from 56 B. C. are known, and a detailed account It was the cause of wars, and mur-ders, and was, altogether, the live-liest political issue of its day. Originally owned by an Indian potentate. it fell into the hands of a Persian monarch. His grandson tried to will it away at his death, and nodded his shes, but the Grand Treasurer re-ed to recognize the signal, and it s. Later on it found its way back o India, and was confiscated in the Labore treasury in 1849 by the British Government, on high moral grounds. On June 3, 1850, the faous stone was presented, in rough state, to Queen Victoria. was of irregular shape, and somewhat marred by fissures, and after to have it cut by the famous Mr. ostes, of Amsterdam. The Duke of Wellington himself put the stone on the cutting wheel, and in 38 days the operation was completed. .The

LAMPMAN'S BOYHOOD. Judge Barron Testifies That He Gare Early Promise of Greatness.

Judge Barron writes in The Globe short letter. Prof. Edgar, quoting from Mr. D. C. Scott, the friend and lographer of poor Lampman (as his older friends and admirers now so often speak of him), gives the impression that in early life Lampuran in no way gave promise of his subsequent greatness. I knew "Listle Archy," as his boy

ompanions were wont to call him. frequent visits to his father's home at Gore's Landing met with him, taiked and walked with him very often. He was a delicate, feeble little fellow, and therefore was completely "out of" the rough-and-tumble of choolboy outdoor life. He would look on when other boy played, but would seldom play himself. His companions always took charge of him, and every boy was taught to help and shield "Little Archy," and they did as they were told, for, I think, they loved him dearly. Each boy, young and old, rejoiced in owning a board plank, on which they nailed a box for a seat, and with a paddle in calm weather would venture far out upon the lake. Of course this led to racing, and on one occasion when a dozen or more were starting out "Little Archy" was seen to try it too. "Go back, Archy! Go back," came, it seemed, from every boy, and every boy forgot his excitement and returned, until the sudden impulse had left their little charge, and he was safe and remained on shore. Though mentally quick, when his U mind became riveted on a subject, In the whole Parliament there are yet he was so often away off in all alked half as much as Balfour. He him backward, but my father, who

think, a great deal, many times remarked that he would become a brilliant boy if his physical strength CHLOROBY N could be improved. Herein was the trouble, and his early demise was not unexpected by all who knew him became brilliant, however, in spite of his phy-sical defects, and as a child he gave promise of that beautiful expression, which Canada has been all too slow to recognize. In his walks, which were seldom far, and always slow, for he used a crutch, he would suddenly, after a dreamy silence, break out into some beautiful reference to his surroundings so marvellous that bottle. the child seemed to be the master mind of the two. I fancy many and Tollemache of Eddisbury declared the and listened to him, have felt, if not

Here it was at this lovely quiet spot on the shores of Rice Lake, a spot made historical by the lat Mrs. Moody, that "Little Archy" dis covered to others his beauty of mind, and they who knew him then can easily recall evidences of the can easily recall evidences of the early child's promptings in his lines:

"What wouldst thou have for easement afwhen the rude world bath used thee with And care pits at thine elbow day and night."
Fliching thy pleasure like a subtle thief!
To me, when life besets me in such wise.
Tis sweetest to break forth, to drop the

Canada's Trade and Commerce. The report of the Department of Trade and Commerce notes an aggregate increase in the trade of the country of \$5,668,000. There has been an increase, it notes, of nearly \$18,000,000 in the imports, and a falling off in exports of over \$12,-000,000. The increase in imports during the year has been general on all important articles, notably among them coal, coke, etc., to the extent of about \$4,640,000; sugar and molasses nearly \$2,300,000; tea \$1,222,000; wood and manufactures of, \$2,400,000; wool and manufactures of, over \$1,700,000; electrical

apparatus, nearly \$800,000. On the other hand the decrease exports amounted to over \$1,600,-000 on animals living; over \$10, \$1,000,000 on fish; over \$4,000,000 on provisions and over \$3,000,000 on wood manufactured. There has, however, been an increase in the exports of minor articles, aggregating near y \$8,500,000, leaving a net total ecrease of \$12,328,489. In point of fact, nearly the whole net decrease attributable to the one item. wheat. The production for export in Manitoba and the Northwest was considerably less than in the previous year. The quantity inspected at Winnipeg was but 40,400,000 bushels as against nearly 52,000,000 the

previous year. 'It may perhaps be said that the uantity inspected does not indicate the quantity produced, but it does indicate the quantity produced for export. The great influx of immigration into the Northwest, and the increased acreage prepared for the coming year's crop, would naturally account for the holding back of a larger quantity for consumption and seed than was the case in the previous year, reducing sto that extent the quantity available for export." The total increase in the aggregate trade of the country for the twenty years from 1873 to 1893 was a little less than \$30,000,000, while for the eleven years since 1893 the increase has exceeded \$225,000,000.

yet there is plenty of room for fur ther expansion. An increase of \$4,500,000 in the mports from British Guiana and the British West Indies is noted. This is due to the shifting in the course of the sugar trade, which "has unquestionably given the Canadian house wife a more satisfactory article than
