He was born in county Tipperary, Ireland, sixty-eight years ago, and had resided here for half a century. He came here as a boy, and studied law with John Bell, K.C. He was a very hard worker in conservative interests and had served many years with the city council and school board. The flags on the public buildings are tinted out of respect to his memory.

Attacks and Counter-Attacks Continue—Russians Retire From Sha River Bridge—Stubborn Fight in the Darkness.

Special to the Whig, Russian Army headquarters, Hunan Mountain, March 2.—After an all-night battle, the Russian forces, which seized the railway bridge across the Sha river, retired, after having destroyed the Japanese fortifications at the further end of the bridge, and thrown the Japanese forces there into confusion. The Japanese lost dead, were heavily wounded, and the bridge was illuminated by the searchlight, drove back the defenders, and occupied the further end of bridge. An hour later other charges were made, and the bridge was set and fortified a thick opposite Lamung, and blew up the Japanese redoubts. Then a stubborn fight in the darkness began. The Japanese brought up their quick fire guns, and forced the Russians to abandon the thicket, from which position the Japanese proceeded to bombard the regiments holding the lead of the bridge. The fight was desperate, and at close quarters. The Japanese rushed up heavy columns of reinforcements, and charged repeatedly across the river, throwing the ice and the bodies of their dead. At dawn the Russians retired across the river, carrying their wounded, but leaving 100 dead behind.

Wood Changes Hands

Sachin, Manchuria, March 2.—The artillery fighting continues along the whole front of about 100 miles. The eastern detachment, near Kradang, has repulsed the Japanese attack. The Japanese are being driven from Tundia Pass, and from the vicinity of Ganto Pass. At the bridge over the Sha river a furious struggle continues. A small wood nearby has been completely changed hands, but is now definitely occupied by the Japanese. It is rumored that a division of Japanese on the extreme right is marching north, and has reached Kalamo.

After desperate hand-to-hand fighting, which lasted for an hour and a half, the Russians were repulsed, leaving sixty dead. Many trophies were taken as well as some prisoners. The Japanese loss did not exceed sixty. Small detachments of Russians also attacked at many other points, but in every case they were repulsed.

Camden, N.J., March 2.—Miss Carrie George threw her card into a bag of waste silk in a factory in July, 1902. The bag of silk waste went to Deloni, Alaska, and fell into the hands of Charles E. Denton, who had just found a gold mine which made him a millionaire. He came back, found and wooed Carrie. Sunday they were married.

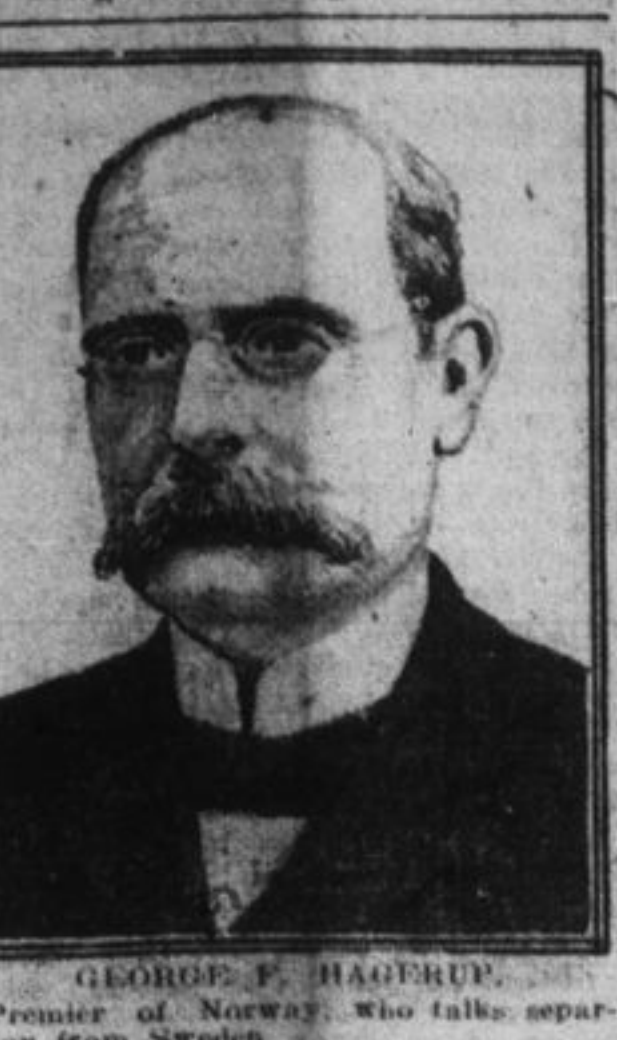

Strike Extending

Warsaw, March 2.—Disturbances broke out here last night, in connection with the strike of shoemakers. The strike area in the city and suburbs is exciting. There are now sixty thousand men out.

It is charged that President Roosevelt asserted that under no circumstances must R. C. Kerens be elected to the United States senate from Missouri.

THE LATEST FAD.

Only the Richest Can Afford Them.
London, March 2.—Silk bed clothes is the latest fad in high society. The statement was made by a solicitor in the Bloomsbury county court and confirmed by inquiries in Regent street this week. Sheets and pillow cases to be in the height and fashion are made of the purest silk and the pillow slips are gorgeously embroidered.
Of course, only very rich people can afford to indulge in the luxury of silk sheets, which cost anything from fifteen to fifty guineas a pair, according to the amount of embroidery in them.

Paris, where the fashion first arose, Orders have been received in Paris from some of the continental courts, but the English royal family still remain faithful to Irish linen. Silk bed clothes has been recommended by many doctors as a means of its remedy for nervousness. The silk used, which has of course to be specially woven to the required width, is generally Surah or China, the former being the most expensive. The first orders for silk bed clothes all specified black silk, but the fashion quickly turned to white. Now, however, there are signs of yet another change. Within the last month of two tinted sheets to match the prevailing color in the rooms have been specially ordered.

IN WINDY DEGREE

The Free Press is With Sifton.

A CLEAR ISSUE

LOOK TO SIR WILFRID FOR COMPETENT WISDOM.

The Utterance of the Paper on the Educational Clause in the Autonomy Bill—Urge to Get on Firmer Ground.

Windsor, March 2.—The Free Press publishes an Ottawa despatch to the effect that Mr. Sifton may retire from the government as a mark of his approval with the school clauses in the autonomy bill. The paper makes no comment directly on the reported resignation, but says on the educational clause.
"The Free Press has been making the statement, since the introduction of the autonomy bill, that the educational clause contained in it simply perpetuated the sectional system which has been in force in the territories since 1875. The bill now distributed at Ottawa, and the text of the educational clauses as telegraphed to us shows this statement not to be accurate."
"By varying the new educational legislation from the old the government has brought into the political arena the naked question of separate schools—the one issue above all others calculated to shake Canada to its foundations and open the political deeps."
"Canada is face to face with a devastating agitation that may do incalculable harm unless wise counsels prevail."
"This is a time for careful thought and for prudent speech. Nothing could be worse for the Canadian west in a material sense than another five or ten years' turmoil over the school question."
"The situation is not yet hopeless, but it is growing worse day by day. We look with some degree of confidence to Sir Wilfrid Laurier to meet the occasion with competent wisdom. The first thing for the government to do is certainly to get on firmer ground by re-creating the educational clauses."

Current Reports

Ottawa, March 2.—One report current last night in connection with the ministerial situation is that Mr. Wilfrid Laurier is to resign. Many of the public lands within their boundaries, the story is that action on the resignation is being withheld while the propriety of amending the bills is being considered.

A SUGGESTED LINE

The C.P.R. Could Then Make Good Route.
Port Huron, Mich., March 2.—The projected extension of the Canadian Pacific railway, from London to Sarnia, is believed, here, to have considerable bearing on the proposed Port Huron-Bay City railway, the route for which has been surveyed and the right of way secured for nearly the whole distance. By means of the proposed building its extension to Sarnia, would obtain a more direct route for its profitable American business and in competition with the Northern Pacific, at Bay City connection would be made with the Detroit and Mackinac, which is said to be indirectly in control of the C.P.R., and which, connecting with the Detroit, South Shore and Atlantic, also a C.P.R. line, would give a direct short line to St. Paul and the American North-West, in competition with the Northern Pacific. The crossing at Port Huron would be by ferry, the C.P.R. having obtained options on river frontage at Sarnia and here.

BESIEGED FIVE DAYS

Turkish Troops Refuse to Fight Rebels.
Constantinople, March 2.—The present insurrection of Yozgat province, Ararat, appears to put in the shade all previous revolts. The centre of the movement is at Saana, northward of Samsat, capital city of Yozgat province, and already there are signs of its extension to the province of Ayr. The insurgents have again surrounded Saana, and a stubborn fight has been in progress for five days. Many of the Turkish troops refuse to resist any further and are deserting.
