Taking them into and it is largely made up of the prospretive contributions from the light give it advice? Canada for the Canathose directly attached to the depart ments, and for the accommodation en-

oyed in the treasury offices. The expenditures had to be carefully hecked in order to avoid an increase n taxation. There is a slight ance in the interest account, and it will be repeated this year and as long as permanent walks and sewers ar undertaken on the local improvement alan. The court house expenses variable and usually high, because the county is disposed to be extravagant and to incur outlay without consult tion with the city. The police de partment and the schools represent uncontrollable expenditure. The police ommissioners ought, however, to give and the school board ought to get reulta for its large expenditure i secondary education. It is for the upporters of the institute-those wh are paying fees as well as taxes-to say whether they think they are this year, with the frequent changes in the staff, getting the worth of their money. There was a general slaughter in the appropriations of the standing committees. They all contemplated great things, but these meant large grants, It is a large question, and one not and they could not be made without adding to the rate of taxation, and that could not be thought of for sion upon the salary question, bu without leading to any change in the report. The proposals principally affected the treasurer and his assistant, who in addition to the work they formerly performed, collect in taxes, and do this for an extra \$100 a year. The difference of \$600 is left shoulder blade saved. The salary of \$1,200 is con- Constipation and looseness of boy tinned to the collector of light, heat and power rates because the committee which pays it desires that it The most satisfactory regulator of remain unchanged.
