Four Facts For Sick Women To Consider

Lydia E. Pinkham's Vegetable Compound
has an unequalled record of cures—
Mrs. Pinkham's Advice is Confidential,
Pur, and always Helpful

Facts.—That almost every operation in our hospitals performed upon women has been necessitated through neglect or painless symptoms as backache, irregular discharges, menstruation, leucorrhoea, etc., burning sensation in the stomach, bearing-down pains, nervousness, and sleepiness.

Medicine.—The medicine that holds the record for the largest number of absolute cures of female ills is Lydia E. Pinkham's Vegetable Compound.

It regulates, strengthens and cures diseases of the female organism as nothing else can.

For thirty years it has been helping women to be strong, curing backache,

kidney troubles, all uterine and ovarian inflammations, weak muscles, displacements, regulating menstruation perfectly and overcomes involution in preparing for childbirth.

Staff-Sergt.—Sir Wilfrid promised to the Whig.

Ottawa, March 31.—A delegation from Prince Edward Island arrived on Friday, and asked that a tunnel be constructed to connect the island with the mainland. One argument used was that the present conditions resulted in delegates fifty-nine days before being able to cross to the mainland. Sir Wilfrid promised every consideration.

Staff-Sergt. G. Mortimer, formerly of the 10th Royal Grenadiers of Toronto, who came to Ottawa to live, has transferred to the Governor General's Foot Guards. He was a winner of the governor-general's prize in 1903, and will be a valuable addition to the shooting strength of the regiment.

The imperial authorities will pur-

chase about 200 horses for the army,

and an officer is to be despatched to Canada for the purpose.

The delegation required a deep, short-legged, short-

haired, good-hoofed horse, the

hunter stamp, with substance and

quality, true action and going quite

clear of the joints.

Foreign Trade Fiasco.

Harold Bol's article in *Book-lover's Magazine*, startlingly exposes

the delusion of commercialism,

which the public has been

misled by permission, give ab-

solute evidence of the value of Lydia

E. Pinkham's advice.

Forces.—Every calling woman in

Canada is asked to accept the

following invitation. It is free, will

bring you health and may save your life.

Mr. Pinkham's Standing Invitation

To Women.—Women suffering from any form of female weakness are invited to promptly communicate with Mr. Pinkham at Lynn. Mass. All letters are received, read and answered by myself only. From symptoms given, your trouble may be located and the quickest and surest way of recovery advised. Out of the vast volume of experience in treating female ills, Mr. Pinkham can quickly tell the very knowledge which will help your case. Surely, no woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.

THE RECORD OF THE ROCKS.

As described by an English Banker.

There exists on the earth a full and complete record of the entire long history of the world's formation, as it is chronicled by the historian, from that dim far off epoch when the gradually forming crust of this planet was a seething mass of half-molten rock, right on through the long span, age after age, neon after neon, until the length, perfect and beautiful, this orb of ours was, completely and satisfactorily formed. And this record is the testimony of the rocks themselves, which bear witness so clearly that he who runs may read the wonderful annals of those remote epochs.

First of all we see the very skeleton

of the earth, the granites, the basalts

and other igneous rocks, which, all molten and solidified, covered

the vast volumes of dense asphaltic vapors enveloping the earth in a veil of Cimmerian darkness, until, gradually cooling, the mists commence to disperse, and the alternations of day and night became apparent. And now for first time, life, which hitherto had been impossible, appears, at first of a low type, gradually increasing in complexity, until the tepid waters swarm with fish and other forms of life. The mists have now in great measure cleared away, the sun and moon daily shine; the shrinking of the cooling earth causes the surface to wrinkle, and dry land in consequence is formed from the upheaved land.

And now a period of extraordinary invincibility of vegetation supervenes under the influence of the warm, humid atmosphere, generation after generation of lofty tree-ferns, and other varieties of cryptogams rapidly exceeding each other, and forming those coal measures whence we obtain our priceless fuel. And now new varieties, among which the ocean floods those vast forests, sealing them up beneath successive deposits of limestone and sandstone; again receding and leaving great continents of dry land. This is now a period of stupendous production of animal life; not, however, mammalian, but enormous lizard-like reptiles, and giant amphibia, one of which, which roamed over those primal plains, the Atlantic was, being nearly a hundred feet in length, and standing thirty or more feet high.

Once more the ocean covers some of the continents for a very lengthened period, this time peopled with uncounted myriads of minute organisms, their white bones, and delicate shells falling to the bottom and forming vast chalk strata which constitute the rolling downs and pure white cliffs of the English coast. Again alternately receding and advancing, the greatest waves at length settled down to its final home, the flat has gone forth.

"Henceforth, when thou comest, and no further," the limit of the continents and islands are definitely fixed; and last of all, man takes his place to have dominion over the earth.

But though last created, he is

immortal first. For his real self is an

English spirit, which will never

fail to exist. And the spirit-life will be derived by the earth-life; those

living the life of the right and

trust in God, in the statement for an

immaculate glory; those who refuse,

and set their opinions above their

Creator's, inheriting the wrath to

come.

Powerful Skinsose.

Cleveland Leader.

"Darn the huk! I lost a peach of an umbrella, to-day."

"Yes, people don't seem to have

any conscience about swiping umbrellas. How did you lose it?"

"Well, it was standing against the wall in the restaurant. I kept my eye on it—"

"You bet, you have got to! Well!"

"And just as I was getting up the fellow that owned it came along and took it!"

Best Cocoonut.

Fresh cocoonut per lb., 25c.; good

cocoas, 15c.; butter, 3 lbs. pr. 25c.

3 bottles flavoring extract 25c.; at Mullin's.

The Delaware, Lackawanna & West

ern railway company has declared a

quarterly dividend of two and one-half

per cent.

Parcels in all kinds of corsets. New

York Dress Reform.

Finest island butter, 25c. Crawfurd's.

1 gal. in pumpkin 15c., at Mullin's.

AFTER A TUNNEL.

THE PREMIER HAS PROMISED CONSIDERATION.

Delegates Had a Long Wait Before Getting to the Mainland Staff Sgt. Mortimer Transferred to the G. G. F. G.'s.

Special to the Whig.

Ottawa, March 31.—A delegation from Prince Edward Island arrived on Friday, and asked that a tunnel be constructed to connect the island with the mainland. One argument used was that the present conditions resulted in delegates fifty-nine days before being able to cross to the mainland. Sir Wilfrid promised every consideration.

Staff-Sergt. G. Mortimer, formerly of

the 10th Royal Grenadiers of Toron-

to, who came to Ottawa to live, has

transferred to the Governor

General's Foot Guards. He was a

winner of the governor-general's prize

in 1903, and will be a valuable addi-

tion to the shooting strength of the

regiment.

THE RECORD OF THE ROCKS.

As described by an English Banker.

There exists on the earth a full and

complete record of the entire long

history of the world's formation, as

it is chronicled by the historian, from

that dim far off epoch when the gradu-

ally forming crust of this planet was

a seething mass of half-molten rock,

right on through the long span, age

after age, neon after neon, until the

length, perfect and beautiful, this

orb of ours was, completely and sat-

isfactory.

And now a period of extraordi-

nary invincibility of vegetation supervenes

under the influence of the warm, hu-

mid atmosphere, generation after

generation of lofty tree-ferns, and other

varieties of cryptogams rapidly

exceeding each other, and forming

those coal measures whence we ob-

tain our priceless fuel.

And now new varieties, among which

the ocean floods those vast forests,

sealing them up beneath successive de-

posits of limestone and sandstone;

again receding and leaving great con-

tinentals of dry land. This is now a

period of stupendous produc-

tion of animal life; not, howev-

er, mammalian, but enormous lizard-

like reptiles, and giant amphibia,

one of which, which roamed over

those primal plains, the Atlantic

was, being nearly a hundred feet in

length, and standing thirty or more

feet high.

Once more the ocean covers some of

the continents for a very lengthened

period, this time peopled with un-

counted myriads of minute organ-

isms, their white bones, and delicate

shells falling to the bottom and form-

ing vast chalk strata which consti-

tute the rolling downs and pure white

cliffs of the English coast. Again alter-

nately receding and advancing, the

greatest waves at length settled down to its
