RE-ARRANGEMENT OF PLAN OF THE CAPITALIZATION.

Will be a Saving of Interest Rate on Old Bonds—A Special Meeting of the Shareholders Was Held.
 Special to the Whig.
 Montreal, April 17.—The plan re-arrangement of capitalization of the Dominion coal, went through without a hitch, at the special meeting of the shareholders, which was held in this city to-day.
 Briefly stated, the plan authorizes the issue of \$7,000,000 of five per cent. bonds, of which \$2,000,000 are to remain in the treasury. The balance, \$5,000,000, will take up the present outstanding issue, and retire the floating debt, meaning a saving of one per cent in the interest rate, on the old bonds. The \$3,000,000 remaining of the old bearing seven per cent. instead of eight per cent., as at present, and redeemable after five years at 125.

GRADUATES FAVORED.
 Will Have Refusal of Permanent Commissions.
 The important step has been resolved upon of giving graduates of the Royal Military College the refusal of commissions in the permanent corps. The regulations providing for the engineers and permanent artillery—and every alternate commission in the permanent cavalry, mounted infantry, infantry and ordnance corps will be of force in the first instance the graduates of the college. Three commissions will be given annually, should vacancies exist, to the graduating class, viz.: Every year one in the Canadian permanent infantry, and each alternate year one in the permanent engineers, and one in the permanent cavalry or mounted infantry and one in the permanent garrison artillery. During every three years a commission in the permanent corps will be given to the graduating class.

A MAN'S WILL
 Give Body To College or the Figs.
 Jersey City, N.J., April 17.—A man, apparently seventy years old, killed himself in Lubben's Hotel, Jersey City, by shooting. In the suicide's pocket was a hastily penciled will, written on a piece of envelope. It read: "My estate I give to the College of Physicians of the New York Post-Graduate Hospital. If they do not want it, give it to whoever does. Feed it to the pigs if you will, but no burial. Peter Daly."

Beautiful Pictures.
 To-morrow at 2 p.m., the premises, 133 Wellington street (near Princess) will open with a free exhibition of original water color paintings by well-known artists of the English school. The fact-similes of water colors by eminent continental artists, forming a very attractive and unique display. These pictures are in charge of E. O'Brien, who has been engaged for over twenty years in conducting art sales in the principal cities of Canada, and in doing so has been the means of introducing a higher class of work than otherwise might have occurred. He certainly has done more for art in a quiet way than many more pretensions. The water colors are all gems. J. Howell Wilson's work is a revelation in water color painting, treating his work with poetic charm and with a freedom that shows originality. W. Russell's light and shade effects are blended in a style entirely his own. G. E. Colby is a follower of nature, painting only what he sees, sparing pains to make the tiniest accessories perfect. Dete Coeillerie shows in strength of color and a vigorous grasp of the subject. The water colors and fact-similes are very fine. Citizens should be delighted with them. The fact-similes are of an artistic art and attract on the first glance. The exhibit is free and all admirers of art are cordially invited. The sale will commence Wednesday, at 2 p.m. and continue on Thursday afternoon, conducted by J. H. Mills.

Printing in a Church.
 One of the last places in these days to expect a printing press is in church, yet there is one in the city of London in regular use. It is used in the vestry of St. Ethelburga, Bishopgate, for printing the parish magazine. The church is one of the most ancient in London, and was named after the daughter of Ethelbert, first Christian king of Kent, who died in 616. Bishop Ekenwald, a Saxon, who re-built the city gate at this spot after the Roman withdrawal. Printing in England began in a place of worship. This was the chapel in Westminster Abbey, in which Caxton set up his press, the first book he printed on being the "Dictes and Sayings of the Philosophers," published in 1474. The term "chapel" used to this day by printers for their gatherings, arose from this fact.

HE STANDS ACCUSED

Writ of Habeas Corpus Granted—Writing of Note and Then Killing Woman of Whom He Was Jealous.
 Husband Accused of Forcing Writing of Note and Then Killing Woman of Whom He Was Jealous.
 Home, April 15.—Before the criminal court of Perugia a remarkable trial is now proceeding. On December 29th, 1902, in a villa at Bionto, occupied by Lieut. Mondongo and his wife, Vincenza, the woman was discovered dying with a bullet wound in the left temple. Soon after her death her husband handed to the police a letter in his wife's handwriting and signed by her, worded thus:
 "A very grave reason compels me to put an end to my life. I improve the conduct of my husband, who has always been a good companion and a virtuous guide to me. I improve the portion of all my dear relatives, and warmly commend to them my dear and innocent Mary. Farewell to all."
 The reading of this letter and other circumstances excited suspicions of foul play and a police inquiry was opened, with the result that the husband was charged with having killed his wife after he wrote the above letter in order to clear himself of the crime. It is thought that his motive was jealousy.

FAREWELL LETTER OF WIFE LEADS TO CHARGE.
 Husband Accused of Forcing Writing of Note and Then Killing Woman of Whom He Was Jealous.

How to Exercise the Bowels.

A Health Habit.
 DID you know that the Bowels work Mechanically? Well they do! Physicians call this "Peristaltic Action."
 But, Old Dr. Cascaret calls it just "Bowel-work."
 This is how he explains it. You've seen a caterpillar creep. First it draws up its hind half nearly to its head. Then it stretches forward the front half, and again draws up its hind half towards its head. In that way it travels.
 Now the Intestines work the food through them in just about the same way.
 And these Intestines are lined inside with millions of little suckers that draw the Nutrition out of food as it passes them.
 But, if the food passes too slowly it decays before it gets through. Then the little suckers draw Poison from it instead of Nutrition.
 This Poison makes a Gas, that injures your system more than the food should have nourished it. You see, the food is Nourishment or Poison, just according to how long it stays in transit.

MY CASCARET POCKET
MY WATCH POCKET
 The usual remedy for this delayed passage (called Constipation) is to take a big dose of Castor Oil. This merely makes slipper the passage for unloading the current cargo.
 It does not help the Cause of Delay a trifle.
 It does slacken the Bowel Muscles with a waste of Digestive Juice, set flowing into the Intestines and the tiny suckers.
 Another remedy is to take a strong Cathartic, like Salts, Calomel, Jalap, Phosphate of Sodium, Aperient Water, or any of those mixed.
 What does the Cathartic do?
 It merely flushes-out the Bowels with a waste of Digestive Juice, set flowing into the Intestines and the tiny suckers.
 But, the Digestive Juice, we waste in doing this today is needed for tomorrow's natural Digestion.
 If we almost empty the water tank in putting out today's fire, what shall we do when the same cause starts another fire tomorrow?
 Now, it always takes a larger dose of "Bile-driver" to operate the second time than it did the first.
 It also takes a larger dose the third time than it did the second, and so on till that particular kind of "Bile-driver" becomes useless, and another more drastic one must be used instead.
 All this time the Cause of indigestion was not lack of Digestive Juice, but lack of Bowel-work. The Cause is Want of Exercise. The Bowel Muscles lose some of their power to Contract when they get too little Exercise.

CASCARET
 This is why the dose of Cascarets can be lessened from time to time as you take them, instead of increased, as with all Cathartics. Cascarets are as safe to use constantly as they are pleasant to take.
 They are purposely put up like Candy, so you must eat them slowly and let them go down gradually with the saliva which is, in itself, a fine natural Digestive.
 They are put up purposely in thin, flat, round-covered, Enamel boxes, so they can be carried in a man's vest pocket, or in a woman's purse, all the time, without bulk or trouble.
 A Cascaret can never hurt, and can always do good, in strengthening the Bowel Muscles against the unusual strain they are some day sure to have, from over-eating, or lack of exercise.
 Whenever your tongue is even slightly coated.
 Whenever your breath is under suspicion.
 Whenever your head feels dull or dopy.
 Whenever Digestion seems a trifle slow.
 When Heartburn, Belching, Colic, Restlessness begins to show themselves, take a Cascaret from your vest pocket or purse.
 Sold by all Druggists—10 Cents a Box.
 You can try Cascarets FREE before you buy. Write for Free Sample and booklet. "The Cause of Constipation," best ever printed on the subject. Address: Stirling Remedy Company, 374 St. Paul Street, Montreal.
