Persons desiring to petition the said Council against undertaking any of the said proposed works must do so within one month after the date of the last publication of the notice in this newspaper, which date is the 31st day of May, A.D. 1905.

L. W. SHANNON, City Clerk, Kingston, April 24th, 1905.

One Came Out After The Other.

Suffered with Boils for Six Months.

Mr. Elie Brazeau, Meadows Station, Ont., tells of his experience with Boils and Burdock Blood Bitters.

He says:—"In the Spring of 1889 I was continually troubled with boils—one coming after another for about six months. I suffered terribly, and was in a very bad condition. In August I got a bottle of Burdock Blood Bitters, and began to feel better after taking it. I kept on until I had used five bottles, and can truthfully say that I was cured, and have remained so ever since. I have not had the least sign of a boil."

There is nothing like Burdock Blood Bitters for bad blood, boils, pimples, dyspepsia, indigestion, or any trouble arising from the Stomach, Liver, Bowels or Blood.

USE WE AVER'S SYRUP. It purifies the Blood and cures Boils, Humors, Salt Rheum. DAVIS & LAWRENCE CO., Ltd., Montreal.

CRESCENT WIRE WORKS T. PARTRIDGE. Manufacturer of Ornamental Fencing, Railings, Flower Stands and Wire Works of all kinds also agent for Wire Edge Ready Roofing, cheaper and better than shingles.

THE WHIG—72nd YEAR

WEEKLY BRITISH WHIG, 12 pages and over, published in parts on Monday and Thursday mornings at \$1 a year. Attached to one of the best Job Printing offices in Canada; rapid, stylish and cheap work; also improved press.

The Daily Whig. "Opiter per Orbem Dicor."

A Change In Tune. Mr. Maclean, M.P., talks so much that it is doubtful whether he can recall or identify the half of what he says. But the following extract from a speech which he made in March, 1902, will be a surprise to those who have heard him orate on the autonomy bills.

"Speaking of the provinces, I have not a moment's hesitation in saying that the result of provincial government in Canada has been detrimental to the progress of the country. I say that the interpretation of the law that has been given by the English privy council in regard to the distribution of rights as between the provinces and the federal power has been so against the interest of country as a whole that I regret I agree with the honorable member for Lanark (Hon. John Haggart) that some day we will have the whole jurisdiction in this parliament and in some way we will work it out, and in some way we will increase the federal power and wipe out gradually the provincial power."

Provincial rights are only sacred, sometimes. Just now, for argument's sake, they are all-important. In 1902 it looked to Mr. Maclean as if the federal government had to concentrate its power and usurp the functions of the provinces.

Cost Of Street Lights. Mr. Rust, the city engineer in Toronto, reporting upon the cost of a municipally owned electric plant, for street lighting, estimates it at \$637.297. He figures that each lamp cost \$80.30 per annum—\$40 for running expenses and repairs, \$38.30 for depreciation at 5 per cent, and \$2 for insurance.

The figures are high, in view of latter experience. Detroit, when it began municipal management of lighting, charged up \$90 per lamp per year as the cost, but now it is only \$64.45, which figures cover all charges against the plant, Chicago, on a 1,100 light plant, in 1899 paid \$96 per lamp, and now pays \$25.93 and the sum would be smaller but for the incidental disadvantage of political interference. According to the report of the commissioner of labour in the United States, in 1890, street area cost from \$5.71 to \$58.56 per lamp per annum. There is an explanation for this reduction in cost. In 1889, the dynamo used cost \$32.20 per arc, while his lamps cost \$50, in 1902, the dynamo only cost \$19 per arc, and the lamp \$22.50. In the same period the cost of carbons was reduced from \$40 to \$50 per thousand to only \$10 a thousand. In Kingston the charge per lamp per annum is \$70. It means that the city cannot, at this price, afford an extension of the service. It may be that the plant, as it stands, will not permit of much reduction, but there should be a reconsideration of the matter, under present conditions, and the fire and light committee should ask for this without further delay.

Publity The Safe Guard. Mr. Hyde, of the Equitable Life Assurance company, has assented to its mutualization, conditionally, as a means of making peace and of restoring harmony among the policy holders. But he has a decided objection to leave an office which has brought him \$100,000 a year in salary, and opportunities to double that amount in speculation. The company began its operations with a paid-up capital of \$100,000, and the holders of it continued to direct its affairs, including its immense resources of nearly \$500,000,000. That any man should, by owning or controlling half the stock, have access to so much money, and the use of it in any way, is enough to suggest the steps which are being taken for a change.

Against this change in the management there is a protest by some of the directors, and for the reason that they have been able to influence investments in which they are concerned. For instance the railway operators are largely represented on the boards of the larger insurance corporations, and they have been interested in the investment of \$315,000,000 in their stocks. Mr. Harriman's lines have about \$25,000,000 of the Equitable's money, and he is a director with a pull. Indeed it is asserted, that the enquiry which has been demanded by the management and the policyholders cannot be quite satisfactory, because of Mr. Harriman's position as a general director. The official who has begun the investigation has been, it is charged, conscious of what has been going on, and the fact that he has been silent, is alleged to be due to his association with friends of the Harriman tribe. A correspondent of the New York Sun has charged that the politicians have had a hand in the case, that they have been exercising their power in the interest of the republican party, and that the policyholders are at the mercy of the Odell and Harriman coterie. It is a desperate state of affairs, and shows to what extent the financial side of the case has affected the people.

Good will follow the upheaval. Attention will be called to the manner in which trust funds have been handled, and a demand will be made that all the monies of the men, invested in life insurance, be fully accounted for. It may be the requirement of the insurance department that annually the investments of the insurance companies be overhauled, and that the statement of the examiner be published for the information of the public. Publicity is the safe-guard of the people's rights and interests. It must be had.

Editorial Notes. In Blenheim the people voted for option law, and the new license commissioners have ignored the vote and issued the usual licenses. Now there are ructions.

Mr. Greenway, at Pilot Mound, Manitoba, said that if Manitoba had had as good a school system as the Territories it would never have had a school question.

A contemporary suggests that all conservative members for the western constituencies resign as a protest against the autonomy bill; Will they do it? Not much. The average conservative member is not given to any sacrifices nowadays.

Passover biscuits have been admitted to Canada free of duty this year. The importations for Passover week are valued at \$10,000. It is remarkable that neither unleavened bread nor macaroni can be made in Canada, simple as the ingredients of them may be.

In New York, according to the evidence of Prof. Hallock, of Columbia College, air has been forced through the gas meters with the gas, with the result that there is a high registration against the consumer of gas. He has been paying very high for a very poor quality of gas.

The office seekers who are pestering the local government number thousands, and some of them appear to be willing to accept anything in which there is a dollar. The conservative party would appear to be largely made up of those who think they should live at the expense of the province or country.

The Hamilton Herald intimates that the employers of labour fight shy of the bureau of labour, because its secretary is an active labour leader. Is there anything incompatible with his duties as labour leader and official? The Herald thinks there is. It may be at the bottom of all the trouble.

The Toronto Telegram is wrong in saying that Queen's College Quarterly was suppressed in order to silence Prof. Cappon on the autonomy bill. He has not been silenced. His article appeared in the Mail, or the gist of it, and it has since been issued in pamphlet form. It was rejected by the business manager of the Quarterly because that publication is not political in its character.

ABOUT ACETYLENE.

BECOMES DANGEROUS WHEN UNDER PRESSURE.

An Expert Comments on Kingston Disaster—Due to "Direct Violation of Conditions Prescribed." He Says—Safe to Handle.

Augustine Davies, president of the International Acetylene Association, writes the following letter to the Toronto World "for the purpose of giving some correct information about acetylene and to show that the Kingston disaster resulted wholly from its use in direct violation of the conditions prescribed by the insurance authorities." He says: "Happening to be a few days in your city, I deem it my duty as president of the International Acetylene Association, in view of the newspaper reports of and comments upon the terrible accident, which recently occurred on the government steamer at Kingston, to remove any erroneous impression as to the dangers of acetylene as an illuminant which may have arisen in consequence thereof. "I especially object to a statement made by one of the witnesses at Kingston, which would convey the impression that acetylene gas, when coming in contact with cold water, will ignite spontaneously. This is absolutely untrue, as any one who has ever used this form of illuminant knows. "Acetylene gas is generated through the contact of calcium carbide with water, and this solution is affected by nothing but water. It could be thrown into a blast furnace with impunity. Similarly, no amount of concussion would result in danger. In fact, it is crushed as ore or stone is crushed in preparing for shipment. "Like all other illuminating gases, acetylene is not inflammable, unless mixed with air or oxygen. If a flame were introduced into the interior of a gasholder filled with acetylene, without the admission of air, it would be immediately extinguished. "Having from twelve to fifteen times the lifting power per cubic foot of ordinary gas, in general a half-foot burner only is used in comparison with the five to seven foot burners used with ordinary gas; consequently there is no danger from ammonia-tion. That is to say, if an acetylene burner should be left open for ten hours, only five cubic feet of gas could escape, a quantity entirely insufficient to cause asphyxiation. "Now about the Kingston explosion. "The fact is that compressed acetylene was being used—a thing admittedly dangerous and prohibited by engineers for the national board of fire underwriters of the United States. Early in the history of acetylene this practice was largely followed, the original idea being to supply consumers with acetylene, compressed in steel tubes, just as carbonic acid gas is supplied for soda water fountains. The result was that, in filling these tubes several terrific explosions occurred, and a most rigid investigation followed. It was proven by the testimony of experts that when acetylene is placed under two or three atmospheres—30 to 45 pounds pressure—it becomes an explosive. The result was the prohibition of the use of compressed acetylene by the insurance authorities. "This same board of insurance engineers, which strictly prohibits the use of compressed acetylene, permits the use of automatic acetylene generators in insured buildings without additional charge for insurance, when such generators are built in accordance with their rules for construction."

"Three Swallows." Sir John Power and Son's "Three Swallows" Irish Whiskey, famous for over a century. Of highest standard of purity. Distillers to his majesty the king.

The Ottawa board of license commissioners has cut off ten licenses. All those who are made to suffer are liberals.

On Danger Line. Emperor William will not have much further to go in order to meet the trouble he seems to be seeking.

Political Heroism. Toronto Star. As for the liberal opposition, it will stand for a party that has voluntarily gone on the operating table, but has no intention of giving up the ghost.

Getting Too Gay. Montreal Star. If British Columbia gets too gay with its anti-lap legislation, Admiral Togo may drop around some bright April morning and start tossing thirteen-inch projectiles in amongst the breakfast dishes.

Gambling Goes On. Montreal Gazette. The president of a Milwaukee bank is a defaulter to the extent of \$1,500,000, the money having been lost in the recent crash in the wheat market. Not even the spectacle of a big man being caught will keep the little lams out of the wheat-pit.

Suggestive. Toronto Globe. Hon. Mr. Fitzpatrick, minister of justice, in opposing the public operation of public utilities because such operation has resulted generally in failure, is so far behind the age that he will have to buy an automobile to catch up.

Headaches and Neuralgia From Colds. Laxative Bromo Quinine, the world wide Cold and Grip remedy, removes the cause. Call for the full name and look for signature of R. W. Grove, 25c.

In a large draft of Clydesdale horses for Canada, shipped at Glasgow, yesterday, were included nine well bred fillies from Aberdeenshire. Big prices were paid for these fillies. The strike in the smelter at Greenwood, B.C., is ended.

PICTON POINTERS. Fiftieth Year of Navigation Lake and River. Pictou, April 25.—Easter services, both morning and evening, were held in St. Mary Magdalene's, with unusually large congregations. The church was prettily decorated with a profusion of flowers and lilies. Rev. W. L. Armitage and Rev. Mr. Senborne, Milford, preached. The choir sang well; solos were taken by Rev. Mr. Armitage, Miss Barker, Miss Kirby, and Mrs. P. S. Maclean. The Easter collection, representing a Lenten self-denial, totalled \$910. Gifts to the church, dedicated on Sunday, include: Set of fair linen from the J.W.A., two beautiful white autumns, from Mrs. Farmer, and chancel guild, and brass alms basin, from E. A. Bog, Toronto.

The funeral took place on Monday of William Redmond, who died at his home on Saturday after a two years' illness. Mr. Redmond was well liked among his many friends; he was a ship-carpenter by trade, though the last few years he had led a retired life. His widow and a grown-up family survive. He was aged eighty-three years.

When on Saturday the steamer Alexandria leaves for Charlottetown, her first trip this year, Capt. E. B. Smith starts out on his fiftieth year of Bay of Quinte and St. Lawrence river navigation. E. B. Merrill, and Miss M. Merrill, Toronto, were the guests of their father, Judge Merrill, over Easter. C. M. Shadbolt, Bank of Montreal, was in Toronto for the Holt-

Herpicide Is Used to Cure Dandruff. E. H. Lyon, New York N.Y., says: "I am very fond of Herpicide, and enjoy using it. It is refreshing." Dr. J. H. Bush, Toledo, Ohio, writes: "Newbro's Herpicide has given better satisfaction than anything I have ever used." Mrs. Borley, of Chadron, Neb., says of Herpicide: "It cleaned my head of dandruff and stopped my hair from falling out. It is the best remedy for dandruff I ever used, and I have used a great many."

R. S. Coleman, Ann Arbor, Mich., says: "I have used two bottles of Herpicide and derived benefit therefrom." Sold by leading druggists. Send 10c in stamps for sample of the Herpicide Co., Detroit, Mich. G. W. Mahood, special agent.

days, Miss Jessie Newbery, Belleville, is visiting in town. Mrs. A. C. Grant, Toronto, has been in town a few days. Miss Julia Willocks is visiting in the home of Mr. and Mrs. James Shannon. Mr. and Mrs. S. B. Gearing were in Toronto for Easter. Mr. and Mrs. W. G. McLellan spent Easter in Lindsay.

Mr. Otto A. Fleissner's KIDNEYS

Pe-ru-na Prompt

Mr. Otto A. Fleissner, American Ep. (Buffalo Bill), now chef at the Raintier. "I suffered with kidney and bladder living. I had tried many a relief until I took Peruna. It was as if after I had used this medicine on would help me permanently, but as he continued to use it. At the end of six had rid my system of all poisons, and certainly have a splendid medicine Fleissner.

Catarrh of the Kidneys a Common Disease—Kidney Trouble Often Fails to Be Regarded as Catarrh by Physicians.

Catarrh of the kidneys is very common indeed. It is a pity that this fact is not better known to the physicians as well as to the people. People have kidney disease. They take some diuretic, hoping to get better. They never once think of catarrh. Kidney disease and catarrh are seldom associated in the minds of the people, and, alas, they are not very often associated in the minds of the physicians. To a few physicians recognize catarrh of the kidneys. They doctor for something else. They try this remedy and that remedy. The trouble may be catarrh all the time. A few bottles of Pe-ru-na would cure them.

For a Big Head.

When you feel as if your head were trying to get square with somebody or something on account of indiscretion in eating or drinking, or any other cause, take

Zutoo

I use your Zutoo Tablets in my family and would not be without them. I gave two to a traveler who had a splitting headache, evidently caused by a night out with the boys. In 15 minutes he was feeling fine, with headache all gone. Your Zutoo Tablets lead them all. Sold by Dr. G. A. CAMLON, Merchant, Adamsville, Que.

Zutoo is the only Vegetable headache remedy on the market. Beware of cheap imitations. Take Zutoo, 25c. at dealers, or by mail postpaid. B. N. ROBINSON & CO., Caticook, Que.
