EXPERIENCE OF MRS. GLENN TREATY TO BE STRENGTHthe Was Told That an Operation Was Inevitable. How She Escaped It

When a physician tells a woman sufring with ovarian or womb trouble that an operation is necessary, the very thought of the knife and the operating table strikes terror to her heart, and our hospitals are full of women coming for ovarian or womb operations.

There are cases where an operation siders the great number of cases of ovarian and womb trouble cured by Lydia E. Special to the Whig. seventy years old to-day, having been born in the village of Risse, in the diocese of Theirso, on the 2nd June, 1835. Since his accession the throne of St. Peter he has changed little, those close to him say, though naturally it has been necessary him to make some change in his habits and modes of living in order to conform to the restrictions imposed upon him by his high office.

Stories to the effect that his holiness fails to realize the dignity of his high office are wholly without foundation. His brother and sisters, nieces and nephews, when calling on him have never overstepped the mark of decorum, although the contrary has been stated. Three maiden sisters, An na, Maria, and Rosa, who lived with their brother, then Bishop Sarto, in Venice, have since been living in Rome occupying a little apartment in the Corso Vittoria Emanuele. Now that the hot weather has set in they will be sent by the pope to pass the summer in Castle Gondolfo, which, unlike the vatican, is an actual temporal possession of the popes. The palace there has immense grounds and commands both the Mediterranean and ourney by rail from Rome.

PRESERVING MEAT.

Use of Saltpetre Destroys Nutritious Qualities.

The old method of pickling meat in a strong saltpetre brine is still generally used by farmers in putting up their annual supply of meat. This method produces a strong flavored and rather dry and indigestible product. There is a popular impression that saltpetre is a powerful preservative, and that salted meat will not keep without it. In fact, saltpetre is not a preservative at all. It is a strong astringent, hardening the meat fibres. expelling the natural juices and de creasing the nutritious qualities o the meat.
