A MILLION DEATHS.

Washington, July 13 .-More than a million deaths from the bubonic plague occurred in India last year, according to the latest report of the marine hospital and public health service. Every effort to stamp it out has failed, great alarm following among all classes. In Arabia the disease is dying out but outbreaks are reported in Japan, Siam and Amoy.

BOYS ON THE FARM.

They Should Be Allowed to De-

velop Interest. problem that interests many land able consulting practice, acting owners who would like their sons to various towns and establishments. become their successors in the profescessarily follow that because a boy on the contract for the great Hillsrural environments he is better adapted to become a successful farmer than to achieve distinction in other avocations. It is difficult to make a boy follow a profession unless he has natural talent and inclination for it. Because a boy is born on a farm is merchant. The recruits that stimulate commercialism and industrial development come from the farm.

It is a difficult proposition to keep on the farm a boy whose natural inclination and qualifications adapt him to a successful career in some other profession. That the country boy should acquire a love for farm and be ready to take the burden responsibility when the infirmities of age disqualify the head of the family from active management of the estate depends largely on the example of the father and the early experience

If parents desire the son to remain the young chickens is effective if done tunity to make it by the ownership of stock-cattle, sheep, swine or horses- once in a while; continuous stable life .It is estimated that about sixty per early teaches them the management of is not good for her. stock and the value of money. > J. Butler, Who Succeeds Mr. Schrieber, Has Had a Varied Career-He Was Once on the K. & P. RR.

M. J. Butler, who becomes deputy minister of railways and canals and chief engineer of the department, is a brilliant engineer, who has a rather life working for the same establish double. So we say "straighten out in Toronto University, finishing in veying and architectural practice. He became an Ontario land surveyor If you set the boys to working in 1878, and a Dominion land surveyor in the back lot, and then ride away to 1879, and practised miscellaneous surveying work for three years before he you come home if you find that busi- began engineering work. His first work of this sort was the laying out of the mills and yards of the Rathbun com pany at Deseronto. His first railway work was about this time, when he was transit man on the building of the Kingston and Pembroke railway In 1882 Mr. Butler went to Gans noque, and built the Thousand Islands railway. In the autumn of 1883 he took charge of the Napanee, Tamworth & Quebec railway-a Rathbun enterprise as chief engineer. He also did general engineering work for the Rathbun's and occasionally took government surveys. In 1886 he went to the Atchison, Topeka & Santa Fe railway, having charge of the bridges and water service department in Kansas. Colorado, Missouri and Indian Territory. This employment he left in 1887 to engage in the pulp mills at Riviere de Loup. He put these up and spent three years, incidentally exploring along the route now followed by the

Temiskaming railway. In 1890 Mr Butler went back again to the Rathbuns, this time as their chief engineer. As such he erected the buildings the Canadian Portland Cement pany, and also constructed an add How to keep boys on the farm is a way. At this time he had a consider In 1900 Mr. Butler went east agai sion of agriculture. It does not new becoming M. J. Haney's chief engineer

was born on a farm and raised amidst Corough bridge in Prince Edward Is land. He organized the plant for this work in 1901 and 1902. Then, in and designed and built the huge shops of the Locomotive & Machine con pany. He was the chief engineer of this work, and it was a great success, the bettle. no reason why he should not attain plant, shops, etc., being remarkably distinction as a lawyer, physician or well designed. In September, 1904, he joined the Transcontinental commis sion, where his good work was mark

a side issue Mr. Butler studied law, in 1897, taking the degree of LL. B., from the Keit College, of Law, Chicago, his purpose being to fit hir self for the business side of his pro fession, in regard to such matters as the drawing of contracts, etc. He is an M. T. C. E., and also a member of the American and Canadian civil en gincering societies.
