#### Rapid Circulation in the "Bison" Heater

The expansion of hot water in the heater causes circulation. If the water heats at the bottom first, it cannot circulate till the water in the upper sections is also heated. Most heaters heat the bottom water first.

The "Bison" heats the water

at the top first. That is why it gets almost nstantaneous circulation of hot water into the radiators-it is one of ten reasons why the "Bison" is the best heater.
