The programme provides that the plenipotentiaries shall land at the navy yard upon their arrival, Monday morning, on the Mayflower and Dolphin, and go immediately to the office of Rear-Admiral Mead, com mandant of the yard, officially to pay their respects. The arrival of the two missions will be marked by the firing of an ambassador's salute for each mission. The Marine Guard will ren der the prescribed salutes, and wi escort the party from the navy yard through the town of Portsmouth, to their quarters at the Wentworth, distance of about five miles. As the navy yard is on the Maine side of the Piscatagua river, the governor of New Hampshire will probably receive the plenipotentiaries in Portsmouth and formally welcome them to the state. He will at the same time extend to them an invitation to be the guests of the state on a trip across the New Hampshire mountains on the concluion of negotiations.

This firm is making most elaborate preparations for the premiere of this play, which will be, with the exception of "Ben-Hur," the greatest dramatic effort ever staged in this country. While abroad recently, this production with Klaw & Erlanger, placed orders for armor, costumes and ancient weapons with manufacturers in London and Berlin, after drawings made by archaeologists, who spent many months in the British Museum and the great museums of the continent in search of authorities. A feature will be made of the entreacte and incidental music as in "Ben-Hur." Dr. Horatio Parker, professor of theory of music at Yale University. has been engaged to provide this feature of the production. He is now in Europe at work on it, and will return with the completed score the latter part of September. The story deals with the period of the overthrow of the Greek empire by the Turks under the Sultan Kohammed, culminating in the siege and fall of Constantinople.
