It is the most delightful hair dressing made. It cleanses the scalp from dandruff and keeps it clean and healthy. Itching and irritation are instantly relieved, and permanently cured.

There's nothing "just as good." Take no substitute. Ask for "Herpicide." Sold by leading druggists. Send for stamps for sample to The Herpicide Co., Detroit, Mich. G. W. Mahood, special agent.

NESTLE'S FOOD.

How to Regulate Food According to Requirements.

The food supplied to the dairy cow is designed to serve two purposes. The first, and the one that always does and always must take precedence, is the keeping up of the machinery of life. The animal, heat must be maintained, and the constant wear and waste of the bones and tissues of the body must be replaced. All this must be done whether any milk is produced or not. If suitable material then remains it will be utilized for the second purpose of the food, which is the production of milk. The man who gives his cows but little food can obtain but little milk from them, simply because they have very little material from which to make it. This rule applies just as fully to the best cow in the country as it does to the poorest one.

Advanced Japan.

While we are all now blind hero worshippers in respect to the remarkably successful Japanese, there is deep interest concerning the extent to which they have mastered the art of living and the attainment of genuine civilization. For instance, societies for the prevention of cruelty to children or animals are non-existent in Japan, for there is no need of them. Work not being regarded as a degradation, is undertaken with cheerfulness and artistic appreciation by both men and women. Their cities spread forth in one-story houses, with miniature gardens instead of swallower courts and festering slums. Their civilization makes the people happy and efficient. A Japanese recently remarked, "We should be ashamed to profess to follow the Sermon on the Mount and act as you do."

The ideal of life for women in Japan.

is to make those around them happy by they grow up to experience the bliss of self-abnegation and self-devotion, and exhibit a type that commands universal appreciation.

FISHERMEN DISSATISFIED

American Anglers Have Too Much Liberty in Canada. Gananoque, Aug. 22.-The big fish are getting cute and only bite at Canadian hooks, since the price of permits has been taken off American fishermen. Several large fellows have been hooked the past few days by local anglers. Local fishery inspectors are having a snap these days; no work and fair pay. The regulations were laid enough under the Ross government, but much more so under the present administration. Much dissatisfaction is felt among local fishermen. A large crowd attended divine service at Half Moon Bay, Sunday evening. Several large fellows have been hooked the past few days by local anglers. Local fishery inspectors are having a snap these days; no work and fair pay. The regulations were laid enough under the Ross
