SIMMONS BROS.

Use Armour's Extract of Beef in the Right Way.

Those accustomed to ordinary beef extracts and fluid beef usually use three or four times too much of Armour's. If a recipe called for one spoonful of salt and you put in 4, the dish would be briney.

ARMOUR'S is pure Extract of Beef-highly concentrated. One-quarter teaspoonful is sufficient to make a cup of beef broth, bouillon, etc., etc.

By the addition of a small quantity of Armour's Extract of beef you can restore the juices to yesterday's roast or give a rich, beefy flavor and color to gravies, sauces and left-overs that will make them appetizing and attractive. Sold by all Druggists and Grocers.

Armour Limited, Toronto, Ont.

Armour Tomato and Beef Catsup An appetizing relish for steaks, chops, roasts, pork and beans, and fish of all kind. It is just a little bit better than others. Sold by all Grocers.

expands with heat and contracts with cold, so does every other metal expand and contract but in different proportions. Steel and iron in a furnace expand and contract, but in different degrees. When the metals are joined by bolts and cement, the expansion and contractions gradually loosens the bolts and allows the cement to drop out, and the openings left allow the dust and gas to escape to the rooms above.

In the HECLA, there are no bolts -no cement. The joints are made by fusing the steel and iron together at white heat - just as a blacksmith

welds together the pieces of a horseshoe. The HECLA FUSED JOINTS are indestructable-as tight after ten years use, as before the first was started. Send us a rough plan of your house and we will give you an estimate of the cost

of installing a HECLA FURNACE. No charge for this. CLARE BROS. & CO., LIMITED,

The Pandora Thermometer

The thermometer on the Pandora range oven means precisely in accuracy to the cook what the square and compass mean to the draftsman. Without the square and compass the draftsman would have to work entirely by guess, just as you do without an ac-

curate and reliable thermometer on your oven. The Pandora thermometer reduces cooking to an exact science. You know precisely how much heat you have and what it will do in a given time. It is one of the small things which makes the Pandora so much different and better than common
