Angle French Marriages. At last a practical arrangement has been concluded with regard to Anglo-French marriages, which will put an end to cruel abuses. It has just been settled between the two Governments that no Frenchman will be able to wed an English girl in England unless he can produce a certificate from his Consul. The document must be drawn up in English as well as in French, and must, moreover, have been approved by the authorities of the two countries. The intending bridegroom will have to go through all the formalities which are de rigueur in his native land, just as if he was about to marry one of his own fellow-countrywomen. This, as I have remarked, will put a stop to crying scandals. The French marriage laws are very strict and pre- pany, and leaves shortly to accept a cise, and ignorance of them has brought position in Detroit, Mich. future that, as the civil ceremony had for some years past. been broken, many a little family turned out into the street, owing to the trust which the poor girl had re- of helping the cooks with their years old. Mrs. Ryan says, if these iniquities have too often been committed with deliberate calculation by unprincipled Frenchmen is a truth that has been demonstrated over and over again. Montreal, Oct. 2.—About 1,300 head of butchers' cattle, 80 calves, 1,000 sheep and lambs and 40 milch cows and springers were offered for sale at the kast and Abattoir to-day. The butchers were out strong, and trade was good at the same prices as on last wednesday's market, quality con-sidered. A carload of prime cattle per cwt.; afterwards G. Martel bought three of the best of these at 5c. a lb. that the British Government was los-ing about \$500,000 a year through the use of forged stamps. He set about finding a remedy. In nine months he discovered how to forge Government the common stock 2c. to 3c. and small discovered how to forge Government stamps with the greatest ease. This was a risky bit of knowledge for a struggling young man who wanted money wherewith to get married to the girl of his choice. But young Bessemer, having invented forthwith the perforated stamp that is now known everywhere, went gayly to the Government officials with the forgeries in his pocket to ask if they were genuine. When sir Charles Presley passed them as genuine Bessemer remarked that he knew they were forgeries—"simply because I forged them myself." Then he suggested a remedy. It was accepted.
