SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba or the Northwest Provinces, excepting 8 and 26, not reserved, may be homesteaded upon by any person who is the sole head of a family or any male over 18 years of age...

Entry may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him.

HOMESTEAD DUTIES: A settler who has been granted a right to a homestead is required to perform the conditions connected therewith under one of the following plans:

- (1) At least six months residence upon and cultivation of the land, each year during the term of three years. (2) If the settler or his family is unable to make a homestead entry under the provisions of this act, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him.

APPLICABILITY FOR PATENT should be made at the end of three years, before the Local Agent or Sub-Agent or the Homestead Inspector.

Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS

Coal—Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres may be acquired by one individual or company. Royalties on coal lands generally are 10 per cent on the gross output.

Quartz—The miner's certificate is granted upon payment in advance of \$7.50 per acre for an individual, and from \$50 to \$100 per annum for a company according to capital.

A free miner may obtain two leases to dredge for gold of five miles each for a term of twenty years, renewable at the discretion of the Minister of the Interior.

The lease shall be a division of the interior within one season from the date of the lease for each five miles. Rental, \$10 per annum for each mile of the lease. Royalty at the rate of 2 1/2 per cent collected on the output after 100,000 lbs.

Deputy of the Minister of the Interior, B. B. Unauthorised publication of this advertisement will not be paid for.

NOTICE TO CREDITORS

In the Estate of Samuel Henry Fee, Late of the City of Kingston, in the County of Frontenac, Doctor of Medicine, Deceased.

NOTICE IS HEREBY GIVEN pursuant to Sec. 38 of Chap. 129, R.S.O., 1897, that all persons having claims or demands against the estate of the said Samuel Henry Fee, deceased, who died on or about the twenty-first day of October last past are required to send in their claims, or deliver to the undersigned Solicitor for the executors of the last will and testament of the said deceased, on or before the eleventh day of October, 1905, their christian and surnames and addresses with full particulars in writing of their claims, and with a statement of their accounts and the nature of the securities (if any) held by them, duly verified by statutory declaration.

And take notice that after the said eleventh day of October the said executors will proceed to distribute the assets of the said deceased, and that no person entitled thereto, having regard only to the claims of which they shall then have notice and which are not so verified by statutory declaration, shall not or any part be liable for said assets, or any part thereof, to any person or persons who may hereafter be appointed as executors of the said deceased, or before the said Solicitor at the time of such distribution.

JOHN MIDDLE, 69 Clarence street, Kingston, Ont., Solicitor for the executors. Dated September 11th, 1905.

It's Quality That Counts

And it is because our Confectionery combines the qualities of purity, flavor and freshness that it is renowned for its perfect healthfulness. To a lover of fine candies a box of our Bonbons, Chocolates or Creams is an unsual delight. For Ice Creams and Hot Drinks, call at

MADE FOR OVER 50 YEARS. (ESTABLISHED 1852)

E. W. GILLET COMPANY LIMITED TORONTO, ONT.

Ceetee UNSHRINKABLE UNDERWEAR

It is made of the finest quality two and three ply Australian wool—much finer than Canadian wool, because grown in a warmer climate.

The more strands there are in a rope the stronger it is, weight for weight. On the same principle, a two or three ply yarn is more durable than a single strand.

Ceetee Underwear will not shrink nor get out of shape, and until worn out retains all the original qualities of wool—is soft and elastic.

Your Dealer will replace any Ceetee garment that shrinks

Made at Galt, Canada, by The C. TURNBULL CO., Limited and sold by all reliable retailers.

CEREBOS SALT

Contains the Wheat Phosphates (Absent from White Bread) which are necessary to give strength to the food and vigour to the body.

CROSSING THE ZAMBESI

VICTORIA FALLS BRIDGE NOW OPEN ACROSS THE RIVER.

Latest and Greatest Achievement of Bridge-Building Engineers—By Its Completion Cecil Rhodes' Great Project of a Cape-to-Cairo Railway Is Brought Another Long Step Onward—Dimensions and Environment.

The British Association's first meeting in South Africa has been signalized by the formal opening of the bridge crossing the Zambesi at Victoria Falls. Recently, after a suitable address, Prof. Darwin started a locomotive on its course over the bridge, and thus, under the auspices of the learned body of which he is the retiring president, the magnificent structure was ushered into use. It is one of the latest and greatest achievements of the bridge-building engineer. It provides a way over a chasm deeper than the deepest crossed by any other railroad in the world. And it almost overhangs one of the sublimest spectacles in nature. Though of far less volume than the Niagara, the Zambesi makes a leap at Victoria Falls in distance more than twice that descended by the Canadian cataract. On the bridge the spray of the falls above it may almost be felt. To reach the river beneath the bridge the plumb-line would have to be dropped at least a hundred yards. The press despatch gives the height of the bridge at 420 feet above low water. The Engineering Record of the 2nd September, however, gives the distance between the bridge and the surface of the water under it as 480 feet. The bridge over this abyss measures 650 feet.

Advance of Rhodes' Railway. By the completion of this bridge Cecil Rhodes' great project of a Cape-to-Cairo railway is brought another long step onward. It is just sixteen years since he entered upon this trans-African railway scheme. In 1883 the northern terminus of the Cape Colony railways was Kimberley, the diamond centre, 647 miles northward from Cape Town. In two years the line was extended 127 miles north, from Kimberley to Vryburg. To everybody who had any knowledge of the difficulty of transporting heavy loads over the heavy and waterless roads and across the Vaal and Hartz Rivers the rapidity with which the work was done seemed incredible. This 127 miles was purchased by the Cape Government at a cost of £1,000,000. The construction organization having been begun in Mashonaland, and Matabeleland having been acquired by the overthrow of Lobengula, further railway extension became necessary. Early in 1884 construction was begun from Mafeking, and, though a Matabele rebellion had to be put down in the meantime, Bulawayo, 492 miles further north, was reached in October, 1897, after 500 days' work. The Boer War intervened, and it was not until May, 1901, that the first section of the Bulawayo-Zambesi line was begun. It was finished by the end of the year, December, 1902, giving a through line from Cape Town to Victoria Falls, 48 miles further, by the end of April, 1904.

Still Onward. And now the Zambesi, at a point 1,640 miles from Cape Town, is crossed by the new bridge. But the crossing does not mark the end of the construction. Already the well-known line carried a hundred miles north of the river, and by next July it is to be 200 miles still farther on its way into the interior. That will leave only 200 miles more to be done to the terminus of Lake Tanganyika, which give a waterway stretching 400 miles northward. As the holder of territory on one shore of this lake, British has rights of transportation upon it. On its northern shore the road must enter the Congo Free State or pass through German territory. In the Congo country, however, it has a right of passage through British East Africa from a point on Victoria Nyanza to Mombasa, on the Indian Ocean.

Te Khartoum. There will be still the great link of 1,600 miles from Victoria Nyanza to Khartoum. The Egyptian-Soudan line, extending northward to Wady Halfa, 600 miles, will be joined. A gap of 200 miles between Wady Halfa and Khartoum remains to be done. At present the traffic over this stretch is handled by Nile steamers. But from Shellal on to Cairo, at the mouth of the Nile, a distance of 550 miles, there is an unbroken railway line. So there is 1,150 miles of road built between Cairo and Khartoum, with a gap in it of 200 miles. And in South Africa and Rhodesia there is an unbroken line of 1,740 miles. In all, there is 2,890 miles of Rhodes' trans-African railway project realized. About 1,600 miles is yet to be constructed if the waterway is in all cases to be duplicated by a railway line. In the tropical belt of Africa into which the Rhodes line on the south and the Egyptian-Soudan line on the north now both penetrate the difficulties of construction will undoubtedly be great, and possibly the traffic to be secured will not be large. It is said that there is an immense tract of swampy country between Victoria Nyanza and Gondokoro. Building operations, however, have been greatly facilitated by the discovery of the fine coal deposits at Wankie.

Objectors. To some critics who take a purely economical view of the undertaking it seems an unwise one, and they venture the opinion that it will not be completed within this generation. They regard it as the dream of a visionary Imperialist, not the scheme of a practical railway man. They hold that the branch line running to the seaboard, such as that ending in Mombasa, on the Indian Ocean, and that being built to Suakin, on the Red Sea, are fatal to it, affording as these do shorter routes to tidewater. These lateral lines, it is held, take the logical direction, whereas the through Cape-to-Cairo road would unnecessarily parallel the ocean route.

THE LIL' BRACK SHEEP.

During one of the regular London song services which are held at the conclusion of each afternoon meeting, says The Christian Guardian, Mr. Alexander said that he had heard a dorkie version of the famous song "The Ninety and Nine," which he brought a blessing to many, and which he and his wife had printed on a little card, and sent to many of their friends. He then requested in his way to come upon the high red dais and recite the poem to the audience. This he bravely did, and in her clear, soft voice recited, as follows, the beautiful poem:

"Fo' lil' sheep dat strayed away Done los' in de win' an' de rain— And de Shepherd he say, 'O hrelin', Go an' my sheep be safe, An' de hrelin' say, 'O Shepherd, Dat sheep am brack an' bad.' But de Shepherd he smile, like dat lil' brack sheep Wus de onliest lamb he had.

"An' he say, 'O hrelin', hasten. For de win' an' de rain an' col. An' dat lil' brack sheep am lonesome Over de far farm de fol'. But de hrelin' frown, 'O Shepherd, Dat sheep am an' grey!' But the Shepherd he smile, like dat lil' brack sheep Wus fair as de break ob day.

"An' he say, 'O hrelin', hasten! Lo! here's de ninety an' nine; But de way off fum de sheep, Is dat lil' brack sheep ob mine! An' de hrelin' frown, 'O Shepherd, De res' ob de sheep am here! But dere, so far fum de fol', Lil' brack sheep He hol' it de mostes' dear.

"An' de Shepherd go out in de darkness Where de night wus col' an' bleak, An' dat lil' brack sheep he fin' it, An' he say, 'O hrelin', hasten. Don't bring dat sheep to me! But the Shepherd he smile, an' he hol' it close. An'—dat lil' brack sheep—wus-me!"

THE DEEP DIVER.

Men Who Withstand Great Pressure—200 Feet Below the Surface.

At what depth, asks The Pall Mall Gazette, can a diver carry out his functions? How long can he remain unkyro, sunk of Cape Finisterre in water of high air pressures on the human system? One well-known firm of submarine engineers limits the depth of descent to 25 fathoms, or say, 150 feet. But operations have been carried on at greater depths than this, and perhaps the greatest distance below the surface at which a diver has succeeded in working is 200 fathoms.

This was accomplished by Jas. Hooper, who descended to the ship Cape Horn, sunk off Pichidangue, South America, and sustained a pressure of 81.2 pounds on every square inch of his body.

Another remarkable feat was that of Alexander Lambert, who recovered 27,000 lb. of gold from the steamship Alphonso XII, sunk off Point Gando Grand Canary, in nearly 30 fathoms of water, the actual depth of the treasure-room being 25.2 fathoms, or 146 feet. This man also performed the daring feat of stopping the flooding of the Severn Tunnel when a door in the drainage tunnel had been left open. The door was shut in a quarter of a mile distant from the shaft, but equipped in his diving dress he crept that distance through a narrow passage full of water and closed the door. This sluiceway enabled the pumps to overcome the volume of water which was flooding the working and allowed the completion of the tunnel to be carried out.

A further interesting case of deep diving is that of Angel Erstarbe, who succeeded in recovering silver bars valued at \$1,000 from the steamer sink of Cape Finisterre in over thirty fathoms. In this case the diver had to blow away portions of the vessel with dynamite before he could reach the treasure chamber. The dives per diem were frequent, and as many as five descents were made in one day. The maximum period under water was twenty minutes.

The effect of high pressures on the constitution is not found injurious when the work is carried out under ordinary precautions. A French scientist has gone so far as to claim that breathing compressed air is a remedy for asthma and emphysema. It is also said to excite digestion, owing to the great quantity of oxygen carried into the blood. It has been found that a period of two hours should elapse between a meal and a descent. In descending the movement should be slow, the reason being that the pressure on the head this can be remedied by rising gently a few feet, when the descent can be recommenced. In ascending divers are recommended not to exceed a speed of two feet per second.

Marvels of Modern Butchering.

Describing a large slaughtering establishment in the United States, where beasts are killed at the rate of 225 an hour, Seymour Bell, the British commercial agent at Washington, says: "The animals are felled, skinned, cut up in the cooling room in thirty-nine minutes, and are handled by twenty men during that time. Hogs are killed at the rate of 550 an hour. They are handled by 225 men in twenty-two minutes. Sheep are killed at 620 an hour, the slaughtering and dressing occupying about thirty-four minutes. After the animals are killed the actual work that each man does on any one animal is astonishingly small. Each man has one particular thing to do to each animal, generally very little, and as soon as it is done he passes on to another animal. The work, in consequence, goes on like clockwork."—London Tit-Bits.

A Dry Land Fish.

The peropthalmus, one of the most remarkable of the several species of dry land fish catalogued by the naturalists, is a native of Mauritius. He is only four or five inches long, but has a big head, very prominent eyes and side fins which bear a strong resemblance to legs. They have the curious habit of leaving the water in the evening and spending the entire night hunting the nocturnal insects which inhabit the muddy flats near tidewater. A similar species of New Zealand are called "running fishes" by the natives.

J. M. Barric is said to be contemplating giving up playing writing, in order to devote himself exclusively to novels.

Holland is the one European country where coffee can be imported free of duty.

HE SELLS HIS WIFE

THE QUALITY OF "SALADA" Ceylon Tea is Absolutely Matchless.

Transaction is Ratified by Court in Ending Alienation Suit Against the Purchaser.

New York, Oct. 9.—Justice Dickey, in the supreme court, Brooklyn, has virtually ratified the sale of a wife. The price the husband acknowledged having taken for a release of all his claims, amounts to a trifle over \$2 a pound, for the pretty woman who was the subject of the deal is a petite brunette, less than five feet tall in her dainty French-heeled shoes and weighing about ninety-five pounds.

The disclosure of the deal caused Justice Dickey to throw out of court the suit for \$75,000, which Edwin R. Tucker, an insurance man, sought to recover for the alleged loss of his wife through the allotment of Eugene B. Dudley, an aged and wealthy bachelor.

Lawyer Charles J. McDerhoff, counsel for Dudley, while cross-examining Tucker, elicited his acknowledgment of having accepted \$200 and having signed an agreement that, for the consideration named, he relinquished all claims upon his wife's affections, and to any awards that might grow out of the suits he had brought for separation and alimony.

Justice Dickey promptly said: "This action cannot hold. The suit is brought for damages arising out of the alienation of the affections of Mrs. Tucker. The plaintiff, by this agreement, admits he did not possess the affections of his wife at the time this action was brought. The suit is dismissed."

Silence for a full half minute greeted the words of the justice. The most remarkable man in the room apparently was the plaintiff, on whom the eyes of the 300 spectators turned. There was no evidence of pity in any quarter. His wife, after the one scornful glance at him, did not turn her eyes that way again.

Dudley had asserted his interest in the Tuckers was only parental. His presence in the Tucker household, it was stated, was with the full approval of the husband. The witness for the defence had denied the charges of misconduct.

STAMPEDED 50 GIRLS.

Wild Deer Leaped Through Factory Window.

Ansonia, Conn., Oct. 10.—A wild deer, after running a mile through the principal streets of this town, leaped through a window of the Ansonia company and stamped fifty girls tending the weaving machines.

The deer came out of the woods to the north of the town, by a road of logs at capture, dodging through the circle of men who closed in on it. It ran full speed straight at the factory walls, and when ten feet away launched itself into the air at a window. It crashed through the window, and with all with it, and fell sprawling into the room, where the girls were at work.

The girls left their posts with screams of terror. The animal was then captured and later in the day was liberated in the woods outside of the town.

FATALLY WOUNDS BRIDE.

Imagining World is Coming to an End.

Berlin, Oct. 10.—Herr Adler, a locksmith, was married last week. The ceremony was followed by a wedding feast and a dance, at which nothing unusual occurred. The couple retired to their new home in Christianiastrasse in the evening, and a few minutes later terrible noises were heard in the house.

The newly married wife appeared in the yard, followed by her husband, uttering piercing cries. He took hold of his wife, kicked her, and struck her with his fists. Neighbors appeared and seized the man, who was found to be mad. It seems that he got it into his head that the end of the world would take place at midnight, and desired to kill his wife and commit suicide afterwards. The wife is not expected to recover from the shock.

Must Bear Poison Label.

Indianapolis, Ind., Oct. 10.—A decree has gone out from the state board of health that all cosmetics shall be indicated as poison by the presence of a skull and crossbones on the wrapper, and that anyone selling them without their being so designated will be arrested.

State Chemist Barbard has been making an investigation and says that all cosmetics contain arsenic, sublimate, and though not poisonous to the skin, are dangerous to have about the house without a label.

In the event manufacturers are unwilling to put such labels on their products they will have to withdraw them from the state.

A Tremendous Loss.

Not only of time, but comfort too, if you have a corn. Better try Putnam's Corn Extractor and cure the corn. Painless and sure, acts in twenty-four hours. Use only Putnam's—it's the best.

Wade's glove cleaner, 10c. James H. Brenton, near Coryville, sustained a heavy loss by the destruction of his barn by fire.

\$100 Reward \$100

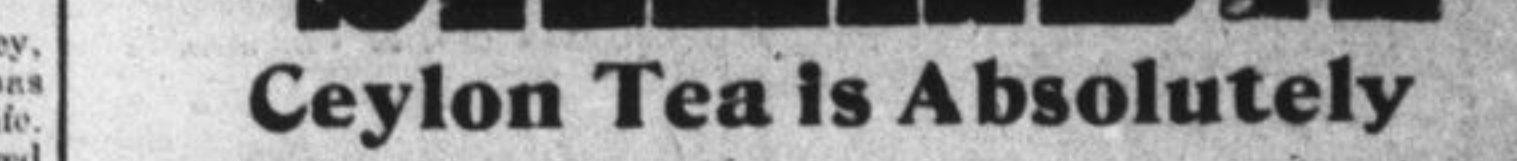

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional ailment, requires a constitutional remedy. Catarrh being a constitutional ailment, requires a constitutional remedy. Catarrh being a constitutional ailment, requires a constitutional remedy.
