OUR COUNTRY'S FOREST

CANADA HAS LARGER AREA THAN ANY LAND EXCEPT RUSSIA.

Northern Forests of the Dominion Cover an Area About Forty-Four Times Greater Than England - Serious Dangers Which Threaten Timber-Suffer Dreadfully From Fire-Causes of Forest Fires - Forestry

The value of the forests of Canada being realized more fully with the in creasing price of lumber and forest products. It is therefore opportune that a Forestry Convention should have

position the Dominion holds to-day in eyes of the world. But if we con sider for a moment what immense stretches of forest land there are in the Dominion the reason may be under stood why such should be the case The area of forest lands in Canada has been estimated at between 700,000,000 this only one-third is covered by mature forest, or say 250,000,000 acres, the recovery. This is the largest forest area

There are, however, serious dangers | were brought down. threatening this timber. The northern forests are mainly composed of coniferous trees, spruce predominating, and are therefore easily burned. Hardwood forests offer considerable resistance to fate of measures, were those which talk fire, but the soft woods with their reviting fuel. As has been stated, those situation, make the statement that fire has at different times run over twothirds of the country. If such should Catarrh would not be such a curse be the case again the wealth of these

A recent writer speaking of Northern Quebec and Labrador states that the immense forests of those districts have suffered dreadfully from fire, and in many places the vegetable part of change of climate, but I was unable to enemy, catarrh, means a day nearer the soil has been so completely burned out that a couple of centuries must elapse before it is fully restocked.

past twenty-five or thirty years.
