JOHNSON'S NIGHTMARES.

Johnson read the symptoms in each patent nostrum ad, and soon he thought he had 'em all, and had 'em awful bad. He'd feel a crick, a pain, a pang, as he would read away— With every ad his mind would change— new ailment every day! And last of all he found an ad that said that all disease and sorrows, if rubbed on the coffee bean, would probably soon cease. And never pausing to reflect that men who want to sell A brand new notion to the "peep" don't talk at what they tell, He started on a brisk crusade to warn each smiling friend That coffee, if persisted in, his life would surely end. But to his great astonishment, the folks he came across Were looking most amazing well and his seemed all the less. For while they sipped their morning cup, or demi-tasse at noon, And seemed to thrive, he grew more thin and somber. Pretty soon He wondered if he wasn't wrong, and he removed the ban When Chase & Sanborn had explained what went in every can. And as we are much as we think, his nightmares he forgot, And saw them vanish in the steam from coffee piping hot.

Solid Gold Cuff Links

Strength, quite as much as tasteful design, is required of one's cuff links. Those from Diamond Hall possess both qualities.

In solid gold, the prices run from \$4 to \$50. One of the most noteworthy pairs sells for \$5.50. These are of a dumb-bell pattern that permits the engraving of monogram—for which no extra charge is made.

Diamond Hall's full catalogue is gladly sent on request.

LINE IS NO BLUFF

TORONTO CORNWALL ELECTRIC ROAD PUSHED.

Representative of the Railway Talks to Newspaper Concerning His Plans—Provincial Charter From Brockville to Ottawa.

The statement that an electric railway would be entered Toronto if it succeeded in gaining an entrance has created quite a considerable stir in railway circles, says the Toronto World. The fact that it will run in competition with the G. T. R. as far east as Kingston, the York Radial railway as far east as Bowmanville, and the Toronto Railway company within the city limits made people wonder whether the Mackenzie-Mann people had not been caught snooping after all.

"They thought we were just holding a paper charter," said A. B. Turner, the representative for the Ontario Electric Railway company, as the new

company is called. "About a year and a half ago I came to Toronto, empowered by my backers to buy the Toronto Railway company. Mr. Mackenzie refused to give me a satisfactory answer whether or not he would be willing to sell the road. Matters dragged on until November of last year, when we determined to get a charter of our own. I interviewed all the ministers, told them the names of my backers and what the objects of the railway would be. All appeared willing to support my cause and the charter was allowed to pass.

"Then the Toronto Railway came out and said it was only a bluff to induce them to sell their railway. They held that we would never proceed with the charter. Now I am just showing them that my backers mean business. My offer to the city is summed up in a few words. We are willing to agree to build the line within the limits of Toronto ourselves. But we would rather have the city build the line themselves under a special charter that could be created by the legislature. In either case we are willing to allow the road to be used by the other radial roads if suitable agreements could be reached.

World's Milk Production.

It is estimated that the total weight of cows' milk produced in the world is 26,100,000 hundred weight, distributed as follows: United States, 6,100,000 hundred weight; Russia, 3,500,000; Germany, 3,000,000; France, 2,900,000; England, 2,900,000; Austria, 1,700,000; Italy, 1,500,000; Canada, 1,200,000; Holland, 1,200,000; Sweden and Norway, 800,000; Switzerland, 700,000; Denmark, 600,000; Australia, 550,000; Spain, 500,000 and Portugal, 500,000. The production of milk in Europe is 18,450,000 hundred weight from 45,000,000 cows. The number of milk cows in the world is 63,800,000—15,940,000 in the United States and 10,000,000 in Russia. There are only six head of horned cattle in Spain to 100 head of horned cattle in Canada. Each 23 acres of cultivated land, while in France there are thirty-four and in England fifty-six. This shows the poor conditions of cattle breeding in Spain, and explains the constant increase in the price of butcher's meat for public consumption.

WANT GOVERNMENT TO PAY.

Can't Stand Expense of Interv national Courtships.

The decision of the British admiralty to reimburse in full the heavy expenditure incurred by officers at Portsmouth in entertaining the French fleet has been received with satisfaction in naval circles.

Objection, however, is taken to the admiralty's statement that their action in this instance is not to be regarded as a precedent.

"Naval officers," a commander at Devonport said, "an Express representative, 'do not expect to be reimbursed for what they may spend on hospitality in the ordinary course. But state functions, such as the Portsmouth business, when the fleet are representing the nation, are quite another matter."

Curing Rheumatism.

The cure of rheumatism has been difficult, and takes time even when allowed to become chronic. But there is no longer reason why any one should doubt that rheumatism can be thoroughly cured. Dr. Hall's Rheumatic Cure has been tested in all sorts of cases of rheumatism, sciatica and neuralgia and it has cured them. It removes rheumatic poisons from the blood, clears the entire system and removes every vestige of the diseases. In ordinary cases results are surprisingly prompt. Price 50c. Sold only at Wade's drug store. This is the preparatory that cured Jeremiah Redden, 115 Lower Bagot street, Kingston.
