HOW SHE MANAGED TO KEEP THE DUCHESS OF BUCCLEUCH.

This Mistress of the Robes to a Queen Does Not Change With the Change In Government-The Bed-Chamber Question In Queen Victoria's Third Reigning Year-Gave Rise Then to a Ministerial Crisis, But Not Now.

Queen Alexandra is possessed of a determination with which few people save those who know her intimately, are disposed to credit her. And she usually manages to get her way. Thus she has just won a quiet though signal victory over the new Liberal administration, says the Marquise de Fonte

In fact, they were discussing amon themselves as to which Liberal peeress they would nominate as successor the Duchess, when Queen Alexandra suddenly but quietly intimated that under no circumstances would she part with the Duchess of Buccleuch, and that she intended to retain her matter what administration happens to

There were some who, on receiving this news, imagined that the so-called "bed chamber question, "which gave rise to a ministerial crisis in the third year of Queen Victoria's reign, was about to recur. When Sir Robert Peel in 1839 was summoned to form a Cabinet he demanded that Victoria shoul dismiss her mistress of the robes and her ladies in waiting, who were all of them the wives or sisters of his most bitter political foes. To this the Queen refused to consent, and Sir Robert Peel and his Cabinet thereupon tender-

Honest

Try Myers' "Home-Made"

One of the reasons which led Duke of Monmouth and of Buccleuch

to head the rebellion agains his uncle

That there was justification for this

belief is shown by the fact that until

about fifty years ago there was pre-served in the archives of the house of

der the hand and seal of King Charles

II., that he had been lawfully married

to Lucy Walters, and that the ill fated

first Duke of Buccleuch and of Mon-mouth was therefore his legitimate

The late Duke of Buccleuch, as

loyal subject of the house of Hanover,

decided that this document ought to

be turned over to Queen Victoria, This

was done and the late prince consort

consigned the paper to the flames. Of course, if the document had remained

in existence it would not have affected

in any way the rights of Queen Victor-

ia or of King Edward to the throne of

Great Britain. Their respective suc-

cession thereto and possession thereof

are based on the so-called act of settle

ment passed by Parliament 205 years

ago, which by a narrow majority of one vote, cast by Sir Hugh Owen, vest-

ed the throne of Great Britain and

Ireland in the Hanoverian descendants

of King James I., barring therefrom

the less remote descendants of his

son, King Charles I., now represented

Still, at the same time, it was a loyal

thing of the late Duke of Buccleuch to

do to sacrifice this document, testify-

ing under the hand and seal of King

Charles II. that he, the duke, was de-

gitimate instead of from a natural son

her son, Prince Rupert.

King James II., was that he was con-vinced that his mother, Lucy Walters, had been lawfully married to King Charles, and that he, the duke, therefore was his father's legitimate instead of his natural son, and consequently invested with the rights to the succession of his father's crown prior and superior to those of his uncle. King James II.

When the new Ministers came into office a few weeks ago they took it for granted that the Duchess of Buccleuch whose husband is a great Tory magnate would, in accordance with the custom that prevailed during the three score years or more of Queen Victoria's reign, resign her office of mistress of the robes to the Queen, which is the highest feminine dignity at court and carries with it the centrol of all of the Queen's ladies in waiting, and indeed of the entire feminine porton of the My Sister

Finally the matter was compromised by the Duke of Wellington, who induced her to give way by pointing out to her that the spirit, if not the letter, of the constitution required it; that in previous reigns the lords in waiting and the chief dignitaries of the king's household had changed with each outgoing Cabinet, their successors being nominated by the new ministers; and that as queen regnant she was much in the same position as her uncles and grandfather had been, and that under the circumstances her principal ladies in waiting were amenable to the same rules as the male dignitaries of her

predecessors on the throne.

When Queen Alexandra, however, was approached the other day about the appointment of a new mistress of the robes in the place of the Duchess of Buccleuch she expressed herself in much the same fashion as her motherin-law, Queen Victoria, nearly seventy years ago, declaring that she would not part with the duchess; and on being asked for her grounds for taking such a stand in the matter she proceeded to point out a fact which had until then been forgotten-namely; that she was not a queen regnant, like her illustrious mother-in-law, but a queen consort, and that therefore the rules which had been invoked by Sir Robert Peel in 1839 did not in any way

Further consideration of the case ed to the discovery that the Queen was entirely right in the question, and accordinly the Ministers withdrew their pretensions and left, with the Queen Alexandra. For, although Lord Grey, in the reign of King William IV., insisted upon Queen Adelaide's dismissal of Lord Howe, who was her chamberlain, on the ground of his public demonstration of hostility to the reform bill, then before Parliament, yet the Premier was generally conconsidered to have exceeded his authority, and it is recognized that the Cabinet has no say in the appointment of the members of the household of a queen consort, the only rule binding upon the matter being that her ladies should be of English birth, which, of course, debars any American born peeress from ever being appointed to any position in connection with the

The Duchess of Buccleuch is a great lady, one of the most influential figures in English society, is a sister of the Duke of Abercorn, of Lady Lansdowne, of Lady George Hamilton, and of the Duke of Marlborough's mother, Lady Blandford, and was mistress of the robes to Queen Victoria before being appointed to the same office by Queen Alexandra, who is fond of her.

The duke, who is not only Duke of Buccleuch but also Duke of Queensberry, holds among other dignities that of captain general of the royal company of archers of the sovereign's bodyguard in Scotland, and is entitled, by reason of his left handed descent from King Charles II., to bear the royal arms of England, France, Scotland and Ireland, debruised by the bar sinister. On the distaff side he is descended frem Sir Walter Scott of Buccleuch, whose abortive attempt to rescue King James V. from the prison like control of the Earl of Angus forms the theme of Sir Walter Scott's "Lay of the Last

It was his descendant, Ann, Countess of Buccleuch in her own right, the friends." greatest heiress of her time, who married King Charles II.'s son by Lucy Walters. This son at the time bore the title of Duke of Monmouth. But on his marriage he assumed his wife's patronymic of Scott and was created the same friend met the broker and

The duchess survived her busband's The latter drew away, and, raising his death on the scalffold-he was con- hand, said, austerely: "Look here, demned for high treason in heading an | mine friendt, to play I do not mind abortive insurrection against his uncle, sometime, but always, never."

GREAT BRITAIN'S TRIBUTE TO THE DOMINION

Imperial Government Sends Home the Remains of the Late Hon. Raymond Prefontaine, Minister of Marine, In One of the Greatest of His Majesty's Battleships, the Dominion-Some Facts About the Ship.

The remains of the late Hen. Rayond Prefontaine, Minister of Marine, have been conveyed across the ocean in one of the greatest of His Majesty's battleships—the Dominion. The circumstance that the Imperial Government places this huge vessel in commission and sends her to Canada to carry, home the body of a Canadian Minister is a great honor to the country. More than this; it shows that the King's sympathies are not restricted to any race or to any people. Every subject of the King is on an equal basis with his neighbor, irrespective of origin, language, or religion.

About the Dominion.

The Dominion, it is interesting to note, is one of the latest of the newer additions to the navy. She belongs to the heaviest type of battleship affoat, Although launched in 1903, there is already planned a fighting machine that will outclass her. The Admiralty has just begun the construction of a more powerful vessel, of which the Dreadnaught will be the first sample. This battleship will be 18,000 tons displacement, and will mount ten 12-inch guns instead of four, as is the case with other vessels. But she is not completed yet. The Dominion is smaller than the Dreadnaught, her tonnage being 16,350. She whares with four sister ships the honor of being the most formidable man-of-war floating the Union Jack. The other four are the King Edward VII., launched in July. 1903; the Commonwealth, named after Australia; the of a British monarch, and that the bar Hindostan, which represents India, and sinister has unjustly been placed on the armorial bearings of his house. the New Zealand; which bears the name of another important member of the Imperial family. It seems that it is now the practice to name vessels after portions of the Empire. This is a happy idea. Our neighbors, it will be remembered, name their vessels after the various States.

A Powerful Machine.

The Dominion represents the highest type of battleship ever built, and until the Dreadnaught appears is the largest vessel in the navy. Her guns are the most powerful yet constructed. They in his 75th year, and has been in falling health for some time. He was born at Wilderspool, and was the seventh son of Richard Nunnerley, are capable of firing in one minute one projectile of \$50 pounds, sixteen of 380 pounds, and twenty of 100 pounds. In pursuit of an enemy the Dominion can who died in 1870 at the advanced age fire ahead of herself four projectiles of In 1854 he was ordered with his regican throw a shell abroad of. Her speed is 181-2 knots an hour, and her officers harbor, the Balaclava charge, Inker-man, Tehernaya River, and the whole of the siege and taking of Sebastoand crew number 800 men. Her total cost was over \$5,500,000. The weight of metal discharged by the Dominion in a single round is 5,920 pounds. This is greater than that of any other British warship. Experts declare that the major said he was in the first line of Dominion and the four other ships of her class exemplify the new tendency the right squadron of his regiment. He of battleship designers to afford better protection to the secondary battery and the order, proceed to Captain Morris, to increase the calibre of the guns. then commanding the 17th Lancers, to The change in these regards was first whom he said, "Now, Morris, for a bit tried in the Japanese battleship Mikasa, and in that case it must have

been highly successful.

Improved Improvements. At all events the improvement means that instead of having a large number of casements for firing purposes, there is a central battery, and that instead of having two large guns, there are eight or ten of bigger calibre than any as yet afloat. With all the mechanism appertaining to her, the Dominion is a wonderful vessel, and is one of the bulwarks of the Empire. That she should have been named after Canada was no small honor to the Dominion. The circurastances was duly emphasized at the launching on Aug. 24, 1908, when Her performed the naming ceremony for us, and Pelee Island champagne was used instead of the European article. The Dominion has not as yet seen service.

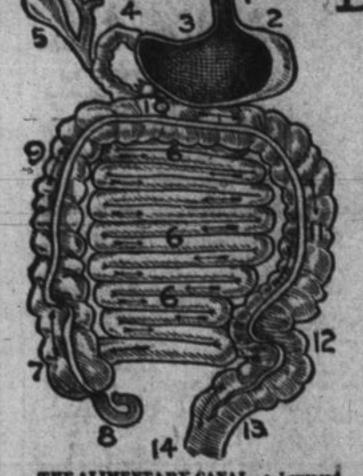

Coming of the Blenheim. In the early days of 1895 H. M. Blenheim sailed into Halifax harbor. That vessel, the fastest protected cruiser afloat, bore the remains of Sir John Thompson, Premier of Canada, who had dled at Windsor Castle while receiving there the rank of Privy Councillor. It was in December, 1894, that Sir John, after transacting public business, had gone down to the palace of the Queen to be sworn in. He was in apparent good health when he left London, and everything went well until, at lunch, the great Canadian fainted, and shortly afterwards died. The event, so tragic and so sad, challenged the attention of the world. Her Majesty Queen Victoria was especially affected by it, and was exceedingly kind to all concerned. The funeral took place from the Castle, and the body was placed upon the Blenheim at Portsmouth, and conveyed to Canada, where, at the capital city of Nova Scotia, the last ceremonies took place. The offering of a cruiser to carry home the remains was felt to be a signal expression of good-will towards Canada, and was universally ap-

Another Great Honor.

The mark of Imperial favor shown to the late Mr. Prefontaine is equally well received by all classes in Canada. It bespeaks a kindly feeling, and, as already pointed out, indicates that there are no distinctions in the British Empire. All are equal before the Sovereign. While this is the situation as regards the Minister whose memory is thus honored, the coming of the battleship Dominion on such a mission is especially appropriate. The vessel was named after Canada, and that she should have her first commission in Canadian service, or rather in Imperial service of a Canadian nature, is a matter of high interest. In all probability the coming of the Dominion-the finest of His Majesty's ships-will promote a Canadian sentiment favorable to the navy. Certainly it teaches that that arm of the national defence is something to be proud of.

The astonishing total of 219,929 prisoners were received into the local as is the borrowed butter you return prisons of England and Wales in year ended March 31st, 1905. uses tobacco doesn't own a row of gaged in administering the poor law Littell wedding fifty years ago. in England and Wales.
