The following resolution was adopt-Moved by Ald, Elliott, seconded by Aid. Rigney, that this council very beartily co-operates with the board of education in its endeavor to secure the location here of a normal school, an institution which this council would be delighted to see placed among the other educational institutions of the city. This council is fully convinced that no better place, from a geographical; or educational point, could be secured; all the accommodation required is available and a high educational tone can be afforded not possible at any other point on the midland district. To assist in securement of the desired school this council appoints Alds, Gaskin, Niekle and Elliott a deputation to co-operate in placing Kingston's advantages before the government.

Why Tea Quality Varies

TOU know how the quality of strawberries from the same patch will sometimes vary from one day to

One day sweet, compact, well ripened, well colored, richly flavored-next day it rains, is cloudy,-following picking is soggy, sour, green, coarsely-flavored, poor.

Tea, also, on account of its volatility of flavor after picking and during the curing process is very susceptible to weather changes. A few hours of sunshine or bad weather after picking may make the difference between good and poor tea.

So that while one picking may be first class, the next from the same garden may be very poor.

I select only the pickings which come up to the Red Rose standards of richness and strength in Indian, and delicacy and fragrance in Ceylon teas, and thus that "rich, fruity flavor" of Red Rose Tea is produced and maintained.
