### A Run-Down Woman Made Well by Dr. Hugo's Health Tablets for Women-

Miss Jennie Thomas, of Dixville, Que, was in a run-down condition - tired, and all dragged out. Thousands of women know just how she felt.

She was given a box of Dr. Hugo's Health Tablets for Women by her family physician. She took them two weeks and then wrote us in these words:

"I have received such great benefit from taking your tablets, I desire to continue taking them two weeks longer. The benefit secured from the one box has been so great, and I feel so much better now, I am satisfied only one box more will be necessary to effect what you claim for your healthy woman."

She was sent the second box. She took them and has since assured us of perfect restoration to

And they are doing this for women all the time. Every day we receive letters from grateful women, testifying to their gain in health since taking these tablets. If you are in a run-down condition, or suffer from any weakness peculiar to your sex, they will restore you to perfect health. They make healthy women. But you must do as Mrs. Thomas did-take the tablets. You

## WHAT THE TOWN WAS LIKE IN 1843.

Early Days of the Whig established in different parts of the Office, and Its Popular Proprietor-The Story of Towers - Precursor of Our Waterworks System.

the year 1843, sixty-three years ago. of the government was a sad blow for I hired with a little Englishman, A. Kingston, many men being ruined by Ofme, who kept a flour and grain it. and Princess streets, on the east side, city, quite a number of men

stairs went up at the back part of fire was, page sheet, and was printed every and ladder company.

ies printed at that time. in height, was very supple on his feet, a wall.-A. BRIDGE. and walked very erectly and always wore a plug hat. He was in the prime of life at that time. The doctor was a very popular man in the city. If there cathedral bazaar was a brilliant and was a public meeting of any kind go- busy place Thursday evening,

tion price of the paper, but I think it things of beauty. Last night little affairs. The request for a complete was \$4 per annum. There was not Miss Harris sang in her sweet childish statement of the cost of the power much money in Canada in '43, and the voice to the delight of her large audoctor had hard work getting the dience, and her dancing was cleverly subscription price for the paper. Sub- done, Several beautiful and interesttheir paper then as they do now, but the canvas, and Rev. Father Kehoe

would appear in December, The doctor would take wood or almost anything that farmers had to sell in payment or the paper, I used to commit the verses to memory, as they were quite laughable sometimes, but they are

For ought I know I am indebted. To the printing press.

So off I goes in these 'ere close, And settles up I guess. If the boy that inked the type is living, and in the city, I would like very much to see him, and I might give him a chance to walk a foot would be about my age.

Mr. Orme by the late John Ashley, fine lantern was used by him to show the building the printing office was in many beautiful views, illustrating the belonging to Mr. Ashley also. I lived in the city two years, from

1843 to 1845. The towers built by the

English government to protect the city in case of war were built in those two years. The tower in the water is built on the solid rock at the bottom of the lake. There was some diffi culty experienced in getting the foundation above the water, and a dam was built in the winter when the ice was good. There was a large quantity of logs, plank, stone, and clay used to construct the dam-it was winter's job. In the spring, when the ice was gone, a large quantity of men were set to work to pump out the water inside the dam, A lot of hand pumps were made for the occasion. and the water was pumped out one day. But the next morning the whole was full of water. They wen at it again with the hand pumps, but the water came in as fast as men could pump it out. Some head work now had to be used to get the water out. A steamboat was decided on, and was brought up to the outside of the dam, and made fast, two large boxes' were made watertight, and sunk in the water, one under each paddlewheel, and the water pumped out of boxes. That allowed

paddlewheels to work, and not con in contact with the water. Two large pumps were made-each pump would lift a barrel of water at each stroke. These pumps were attached to the walking beam of the steamer, one at each end, and two barrels of water were thrown out at each revolution of the wheels. The steamer worked night and day, for ten days, pumping water while the mason work was going on below the water. The owner of the 25., corner Johnson and Division steamer got \$100 per day. They worked one Sunday and as I was at liberty that day, I went out in a hoat to see the work go on. There

The walls of the Roman Catholic Kingston, were attendants. There which in my opinion is not necessarytime, the church was several years in pleasant evening. building and a very sad accident happened when those walls were going up One day when the walls were nearly built, the scaffold gave way, with a large quantity of heavy stone, and six men who were working on the scaffold came down in a heap to the ground. rigars, 4 for 25c, Gibson's Red Cross Nearly all were killed,

### The market buildings, and city hall were completed. The market buildings were larger than they are now, as there was a wing at the west side of the main building which reached up to King street. The butchers' shambles were in this wing, and all had to go

wards pulled down, and meat shops city. This was an improvement. The government was in kingston when those buildings were erected, and had it been known at the time that the government was to be removed to Kingston, Feb. 12 .- (To the Editor): Ottawa there would not have been as first came to Kingston to reside in much money put in them.
