Question in Behring Sea. Ottawa, March 3 .- Our friends ofCanada in regard to the Behring Sea diplomatist would have pronounced a reception was held at the home Canadians should seal in May and June, and leave the United States fishermen August and September. Two months each for both countries would to the uninitiated look quite reasonable, but when examined carefully, it becomes a deal in which Canada would be euchered out of everything.

In the first place, the months of May June and July, under the finding of the Paris award, from the close season, in the next place, the catches in May and June are insignifipart of each year Canadian sealers start away down on the southern Pacific, and work their way gradually northward, reaching Behring Sea in May. Then they return to port and lay up. After refitting, they proceed August to Behring Sea, where the profitable sealing is done. The United States proposition meant that Canada

Furthermore, the United States do Pennington Macpherson. not want any pelagic sealing to be done. They have the exclusive rights to sealing in the islands, and had their plan been carried out, they would also have obtained a virtual monopoly in the deep-sea waters as could not be a party.

would sacrifice a catch of about 2.700

STURDY PREACHERS.

Early Ontario Circuit Riders Were Men of Mettle and Faith.

VEXED AT NON-RECOGNITION Some surprise has been expresesd at the nerve and courage of Rev. Dr. Gardiner, of Belleville, who, though beyond his fourscore years, recently met a And Sues Latter, For Heavy supposed burgiar with a pitchfork. This recalls to The Brockville Recorder the strenuousity of the life led by these ministers of early days in Canada. They had no newspapers to announce Windsor, Ont., March 3 .- Joseph their services, no pipe organ and no church to put it in if they had one; no ment, is said to be thinking seriously silver plates for collection, and usually of suing Mayor Wigle for heavy damno cash in their pockets. Those of the Methodist church particularly lived on the contributions of their congregations, and these did not consist of cash, but provisions of various kinds, with

hay and oats for the horse. The most difficult task they had was to secure sufficient cash to keep themselves and families clothed, and there was neither purple nor fine linen anywhere in the wardrobe. But their piety was of the robust variety. The minfster, as he rode from post to post on horseback was supposed to be a general handyman as well as an athlete. When he came across a very smart not at all uncommon for the preacher, as he was called, to accede to the request of the boys to "down him," and in most cases the dispenser of the gospel was equal to the task. Many a smart Alex. had his shoulders pushed to the ground by these early day min-

Then, too, he was supposed to be able to swing an axe, and the preacher who least an ordinary chopper, did not have much show of doing good among the stalwart men. In such a school as this that the gentlemen referred to have not heretofore been known as legal the early ministers were drilled, and they were always ready to forcibly impress the claims of the gospel on their hearers if they could not be reached otherwise. To throw a man out of the preaching place who became obstreperous was not uncommon, and the unfortunate fellow never got any sympathy. It is not to be wondered at that Father Gardiner forgot about his age when he thought a burglar was about, and me him in the most impressive way. These good old men never knew fear, and no matter how long they are spared to live, not one of them will ever be found and I trust that at the next meeting shirking trouble or crawling under the barn. Father Gardiner is a good specimen of aged ministerial manhood, Long may be live! hold the position for a longer period.

May Bar Jap Oranges.

exception to me presuming that I am still head of the council. I am acting According to The Vancouver Province, next fall Japanese oranges will be barrel from Canada if they cannot pass legal advice, but I want to say that inspection as free from pests such as Messrs. Spoor and Pringle should be purple or San Jose scale. Thomas Cunningham, fruit inspector, so declared in an interview with that paper.

"The only reason infected Japanese oranges have been permitted to enter the country this year," said Mr. Cunningham, "is because they have been paid for. Of course, no distribution of them is allowed till they have been thoroughly fumigated and the scale parasites destroyed. Merchants here placed letters of credit in Japan on which the Japanese growers drew as shown more regard for the good name soon as the fruit was despatched to this port. Next year, to protect themselves, local importers of Japanese oranges will have to insert a clause in their agreements with the growers that the oranges shall not be paid for till they Movements Of The People-What have passed inspection. Any scale-infected oranges found next season will either be shipped back to Japan or de-

"I have issued orders to all inspectors in British Columbia to place all citrus fruits on the list of fruits which must undergo inspection. I did this because I have found that the lemons and oranges shipped here from California carry scale in some instances. It is the purple scale."

The entire consignment of 20,000 Japanese oranges which arrived recently by the steamer Tartar from the Orient had to be fumigated.

Twenty-Six in a Bed.

Mr. Hugh C. Thompson returned on Saturday from a trip in New Ontario, going about fifty miles north of New Liskeard, says The Orilla News-Letter. The country seems to be mining mad, Mr. Thompson thinks, and it is almost impossible to get accommodation near Cobalt. In a hotel there he was one of 26 sleeping in one room. The beds were put close together, and to get into one's bed it was necessary to climb over the foot of it. Past New Liskeard there is no timber to speak of, excepting pulpwood, poplar, birch, etc., which grows so close that a rabbit cannot run through. Mr. Thompson was looking for rallway tie timber, but found it was scarce in that
