LECTURE ON PRACTICAL SEAMANSHIP.

Capt. Thomas Donnelly Goes Thoroughly Into the Subject-He Advised That the Lead Always Be Used in Fogs.

The marine lecture in the old Collegiate Institute building, last evening, was almost entirely on practical seamanship, and was well attended by masters, mates and vachtsmen. Capt. Thomas Donnelly commenced by show ing how anchors and cable chains are of a civic official. If the work was to profession, and, like Mr. Richardson, made and tested under British act of be done at all, let it be done thor- was actively identified with every parliament, and if they pass the test movement for the public good. As a are then stamped and certificated, so Ald, Hong wanted to know if the member of the council and as a citi- that the purchaser knows just what board of works would consider the ap- zen, he served the people with great he is buying. He went carefully over fidelity and success. His influence will the tables for the outfitting of ships Ald. Carson replied that the board be greatly missed, and the city as a and gave a short account of the experience met with by Lloyds and other It had replied to the question put to Dean Smith by his energy and kind- investigating committees in ascertain it. It was for the council to make the heartedness contributed largely to the ing the best style and shape of anchor religious and benevolent life of the to use, and informed the class that the results after the celebrated Galveston storm proved that the common shaped anchor with a stock was fully twenty-five per cent. more efficient than any patent anchor of the weight, although the latter was coming into almost universal use, owing to its handiness in working. Lapt. Donnelly then instructed the class in the proper care of anchor

chains, told them how to remove the iron pegs always found in new chains, replacing these with pegs of wood, so that an anchor chain could be slipped Ald, Nickle moved, seconded by Ald, when necessity arose. "Do not forget decision made as regards what George Thompson or his surcties, the learn an expensive lesson some day the light committee could not join the report of the auditor dated March ston steamers, who let go his anchor factory. In boxes, 15c., at Wade's up at Detour, Lake Huron, and lost drug store. a splendid anchor and 100 fathoms of is as follows: The rolls of 1901-02-03 best tested chain." He described how necessary it was to have the bight of the shackle forward in connecting the shots if the chain would run clear after the above date. Rink will be opthrough the hawser pipe and also how necessary it was to dip the shacklepins in paint or oil to keep them from rusting.

The lecturer then described how mark a lead line properly and how to use the lead in taking soundings. He told of an instance in his own experience when he came near stranding his ship by neglect in using the lead and advised the class to use the lead On Monday morning, at the Eastern | regularly at all times when navigat-Dairy School, Barrie street, the in- ing in a fog.
