### COMMERCIAL MATTERS.

**What Is Going On In the Business World—The Markets.**

The failures in Canada this week totalled 14; same week, 1905, 31.

A. E. Smith has sold his private banking business at Wingham to the Canadian Bank of Commerce.

The name of Robert Noble, miller, Norval, has been added to the list of directors of the Farmers' Bank of Canada.

Thirty-one directors of three banks, Commerce, Montreal and Merchants, hold representation on the boards of 279 industrial and financial companies of this country. The Bank of Commerce leads with twelve directors on 115 boards.

Earnings of American Steel Foundries in February were slightly in excess of $225,000. Simplex Railway Appliance Co., the new subsidy, made an exceptionally good showing. It is expected the earnings of American Foundries Co. for the fiscal year ending in August will be about $2,000,000.

It is understood in Montreal that about 50,000 shares of Toronto Railway stock are now held in the Province of Quebec, leaving Toronto 20,000. There are not very large individual Quebec holders, however, the stock being extremely well distributed. It is thought that the Toronto brokers' offices are practically bare of the stock, the bulk of the 20,000 shares being held by the directors of the company and especially President Mackenzie, who is the largest individual shareholder in the road.

The largest holder of the common stock of the Dominion Steel company is H. M. Dimock, the Boston director, with 8,600 shares, and next comes Mark Workman, the Montreal wholesale clothing manufacturer, with 5,000. The largest holders of common stock are: Lord Strathcona, 3,400 shares; Senator Forget, 4,000; R. Forget, M.P., 4,000; H. M. Dimock, 8,600; Senator Mackay, 1,250; R. G. Reid, 2,000; R. B. Angus, 3,000; Mark Workman, 5,000; Senator Cox, 900; J. W. Flavelle, 3,000; Sir D. M. Pelliat, 1,000; James Ross, 1,600.

**City Council Meets Tuesday.**

The city council will not meet until Tuesday evening, as the budget and the light plant extension by-law cannot be printed until that day. There promises to be a lively discussion upon the light plant extensions. One alderman has announced that he will vigorously oppose the submission of the by-law at this time. Ald. Toye says the council will pass the by-law by a big majority.

## WINNIPEG GARRISON

### IN READINESS TO QUELL THE DISORDER.

**Over the Street Railway Strike—Meetings Between the Men and the Company to Be Held To-Day.**

Winnipeg, March 31.—The street railway situation, last night, although apparently quiet, was evidently so grave in the estimation of the authorities that they deemed it expedient to make a demonstration of force, and the entire garrison accordingly was ordered to muster, including the Canadian Mounted Rifles, 90th Regiment and Field Battery. All night, the men lay under arms at the armoury in readiness for an emergency call. Mobs gathered on the streets at different points during the evening, but there was nothing particularly disorderly in their conduct.

To-day is looked forward to with considerable anxiety by the authorities, who fear that if a collision occurs between the military and the sympathizers with the strikers, innocent citizens, attracted by curiosity to the scene, may be injured.

A special meeting of the ministers of the city was held last evening and it was decided to appoint a deputation to wait upon the men and the directors of the street railway company. Arrangements have been made for meetings to be held with both parties and these meetings will take place to-day.

**GREAT RAILROAD YEAR.**

**Many Miles of New Road Being Built.**

Chicago, Ill., March 31.—According to statistics prepared by railroad experts here, there are now under way in the United States 13,014 miles of new railroads and what are termed "live projects" provide for the building of 6,433 miles more.

At the opening of 1905 the record showed about 7,500 miles of road under construction, and about 5,000 miles of this were completed during the year. It is said that two-thirds of the entire mileage now under way is being built by thirty-eight companies, an average of 231 miles a company.

For several years the south-west has been the centre of the greatest railroad activity, but this year the centre has been shifted in part to the north-west and the west. The large projects include the St. Paul's, 1,500 mile Pacific coast extension from Evarts; the Western Pacific, of the Goulds, from Salt Lake City to San Francisco, 987 miles; the Denver, North-Western and Pacific, from Sulphur Springs, Col., to Salt Lake City, 470 miles, and the various extensions of the Hill and Harriman systems, the former with 784 miles and the latter with 546 miles.

**FOR THREE YEARS.**

**The Strike Terms of 1903 Will Prevail.**

Scranton, Pa., March 31.—At the collieries of the Delaware, Lackawanna & Western Railway company employing 12,000 men, notices were placed, last night, announcing that the company will continue the terms as provided in the award of the anthracite strike, for a period of three years from April 1st, 1906, and assuring the employees that the company will at any cost, guarantee to protect from molestation, any employees who will continue at work. It is said that other companies will post similar notices.

**Restore 1903 Rate.**

Pittsburg, March 31.—The Westmoreland Coal company and the Pennsylvania Gas Coal company have posted notices at the mines that the 1903 rate will be restored. This scale will prevail in other mines in the Irwin field.

**A BIG DEMONSTRATION**

**In Regard to Electrical Energy at Niagara.**

Toronto, March 31.—Premier Whitney will receive a deputation to discuss the matter of electric power development at Niagara on April 11th. Mayor Coatsworth, Toronto, has issued an invitation to all the municipalities of Western Ontario to attend, and asking particularly for delegations representing the municipalities, the boards of trades, labor councils and manufacturers' associations. It is hoped to make the demonstration for cheap electric power a monster one.

**Death From Headache Powders.**

Cobourg, Ont., March 31.—The jury empanelled by Coroner Dr. Elliott, to enquire into the death of J. D. Roddick, who died suddenly on March 7th, after hearing the evidence of the provincial analyst, Dr. Ellis, last night, brought in the following verdict: "That J. D. Roddick came to an accidental death through taking an overdose of acetalide in the form of an headache wafer and antikamnia tablets to relieve a headache." Major J. D. W. O'Dell was the jury's foreman.

**Returned Promptly.**

The leader and three others who were implicated in the attack on the house of the Rev. Dr. Andrew Beattie, the American missionary, at Fati, China, were beheaded on March 12th.

## BUILT ON STREET

### ENCROACHMENT AGAINST C. J. GRAHAM.

**Evidence Showed That His Houses Were Over Street Line—Mr. Graham Contended That He Did Not Wilfully Build Over.**

In the police court, this morning, the case against C. J. Graham, of infraction of the city by-law, twice adjourned, was resumed. John McIntyre appeared in the city's interest and H. I. Lyons for defendant.

The first witness, Thomas W. Nash, provincial land surveyor, stated that the houses of Mr. Graham were on the street, about one foot, on the east, as taken by the city. The steps project about four and one-half feet, and the window, two feet. The houses in course of erection on Wade's Lane, are one and a half feet on the street. He said the city took thirty feet of land on the south side of the street in 1888. He had no doubt the houses were on the street. He stated it was only forty-eight feet from John McKelvey's old house to the one of Graham's, in course of erection, whereas it should be fifty feet.

Mr. Lyons contended that the evidence was not sufficient but witness said it was the most authoritative to be had. From all the points witness measured, he reached the same conclusion.

John McKelvey said that the line of the steps of his old house had, for years, been the line of the street.

Lawrence O'Brien, James Hamilton and John O'Brien, old residents of the city, testified to the original line.

The city engineer repeated his former evidence, saying he gave Mr. Graham a line of the street.

For the other side of the case, defendant took the stand. He stated that he got the line of Wade's Lane from the city engineer and found that in his purchase he had not gotten the frontage for which he had paid. He said the city engineer told him he had no line of the street, but would draw a line from the oldest house on the street. Witness lined his house from that. Mr. O'Brien was there and said the corner of his house was the line. Several residents on the street complained that witness was encroaching on the street. He declared the city engineer had told him he was not building off the line. He was not notified his houses were on the street, until two weeks ago. To Mr. McIntyre he declared there had been no building done since notification.

Charles Barber, carpenter, declared that he was present when Mr. Craig lined out Wade's Lane. He said Mr. Craig stated it would be all right if the building was kept back five feet from the walk.

Mr. Craig, called in rebuttal, said he never told Graham that he could not define the line. He declared Graham had built over the line measured out for him.

T. W. Timms, foreman of streets, helped measure Clergy street line with Mr. Craig. He declared Graham was given the line.

Mr. McIntyre thought there could be no hesitation in declaring that Graham had built over the street.

Mr. Lyons thought that even if it were shown that Graham was a foot or so over the street, as the rule had been largely broken, the magistrate should take this into consideration. He considered Graham did not wilfully build over the line.

The magistrate interrupted, saying that Mr. Graham had acknowledged he knew the steps were on the street. He did not see why one should be allowed to take city property. The magistrate decided to enlarge the case for a week for reserved judgment.

A young fellow, well dressed, and bearing all the marks of respectability pleaded guilty to the charge of being drunk, and was fined $2 and costs or thirty days.

**The Red And The Blue.**

On Monday afternoon, the General Hospital governors will once again deal with the nurses' uniform question. If they desire peace, they will decide to retain the red and white uniform. The ladies' association, which is doing a great deal of work for the institution, and which comprises many of the most prominent ladies of the city, has asked the governors to reconsider their decision to change the uniform to blue, and retain the red and white. In view of the strong feeling upon the matter, there is every likelihood that the governors will reverse their decision and please the great majority.

### CANADIAN SHIP CANAL

**Force of Twenty Men is at Work There.**

Sault Ste. Marie, Ont., March 31.—A force of about twenty men are at work at the Canadian ship canal, getting matters in shape for the opening of navigation. Considerable work is being done about the power house. During the winter the office building was thoroughly overhauled. It is now ready for the opening of the season, and presents an excellent appearance. A new arc machine is being installed at the power house, for the lighting of the lamps along the canal, and the range lights. It is a seventy-five kilowatt, continuous current generator, manufactured by the Canadian General Electric company. It is expected to be April 15th or 20th before navigation opens here.

**Liberal Elected.**
