Straggling Facts Brought Outat 3 o'clock, Prayer meeting; Wednes-What is the Good of Propos-Chalmers, Presbyterian, corner. Baring-Actual Figures Are Re-Kingston, Ont., April 7,-(To.)

Editor): From the press reports the last meeting of the light, heat and power committee, it appears that a resolution was passed to engage an outside expert to examine the electric and gas plants, and to recommend such changes and extensions; as in his opinion are necessary. This is a step in the right direction, and the reso lution should pass the council unanimously. It is a great pity that when the plant was first taken over the of fer of the expert now desired was not F. G. Lockett, a business map of the accepted. The second-hand machines which have been purchased and which it is now proposed to throw in the scrap heap, would not have been purchased, and several thousand dollars might have been saved to the city. But it is never too late to mend, and let us hope, that, as suggested by the Whig, Mr. Ross will be "a saviour to Kingston Business College, head of the city," as he was before. Queen street, which begins its spring

While the management of the plant by the city has not been at any time satisfactory to many of the citizens, it is only lately that the seriousness of situation has appeared. The straggling facts which have been recently brought out in the press are very suggestive. When the city's expert will admit t the committee, that while the total fuel bill on account of the electric plant for 1905 is 86,397, according to the auditor, the total taken by months from the expert's report is \$5,140, it is about time for the citizens to begin to think. According to press reports, Mr.

Campbell holds this discrepancy-neartwenty per cent .- to be insignificant. Surely this is a new school of accounting, and one is naturally inclined to ask what is the use of figures at all, if they do not represent the facts more accurately than this. What for instance, is the use of all the figures referring to the proposed extensions, if the actual cost is as likely to be \$100,000 as \$85,000. What the people want is facts, but

these do not seem to be forthcoming The committee passed a resolution some time ago to have Mr. Campbell's report audited in sits entirety. What has become of it ? The people want to gest that when the by-law is son

In conclusion I would like to sugmitted to the people a vote . be tak-Peerless lawn grass seed. The kind en as to whether or not the plant at should be placed in the hands of a commission.
