The Engine In The RUSSELL

Guarantees Satisfaction

THE engine is the heart of the automobile—the
 source of power; when it stops everything stops.
 It is imperative that the engine should be right.
 The engine in the Model B Russell two-cylinder
 is of the successful opposed type—rated at 16 h.p.,
 but every engine develops over 18 h.p. before being
 put in the chassis.
 Crank case of aluminum to give maximum of
 strength with minimum of weight.
 All gears encased and running in oil—lubrication
 by positively driven Hill precision oiler. Holley auto-
 matic float feed carbureter.

FEW PARTS—QUIET RUNNING NO VIBRATION

An Ideal Engine

In next announcement we will describe a trans-
 mission that delivers this power to the rear wheels—
 with least possible loss by friction.

NEW YORK LETTER

HUGE CITY DEBT OF \$700,000,000.

Roosevelt's Views on Great
 Estates Create Stir—Pennsyl-
 vania RR. Controls Hirute
 Adornments of Its Patrons—
 Commuter Must Look Sharp.

New York, May 5.—The decision of
 the court of appeals upholding the
 validity of the law lodging the fran-
 chise power with the board of esti-
 mates clears the way for many im-
 provements, including rapid transit.
 The new subway, especially, has
 been made to await the decision of
 the court of last resort. Now that the
 possible adverse decision has been put
 out of the way, the work of construc-
 tion to the means of transportation of
 the passengers from the end of the island
 to the other, is expected to go speed-
 ily and steadily forward. We are apt,
 too, to have an independent telephone
 line, as a possible adverse decision of
 the court of appeals was the only
 thing that was waited for before the
 company was to be authorized to go
 ahead. The public is eager to have
 many things of public utility done at
 the expense of the taxpayers, and is
 paying but little attention to the
 rapidly growing debt. It is calculated
 that, if expenditures on new measures
 of great utility, to be sure, but still
 very costly—are to go on at the rate
 they have attained for a 46-year year
 past, Mayor McEllan, when he goes
 out of office, will leave behind him the
 enormous amount of \$700,000,000 of
 city debt, a load that many a nation
 might shudder at, and which, indeed,
 is not far from the amount the great
 United States owes. But the fever of
 improvements has seized upon the
 people of New York city, and they
 will keep peering away until they get
 what they want. The board of esti-
 mates has now become the most pow-
 erful body under the city government,
 it even having directing authority
 over the rapid transit commission it-
 self.

Everybody has given something in
 some way or other, to the relief funds
 for San Francisco, millions plunk-
 ing down a hundred thousand at a
 time, and children the world over
 and dime. The most touching instance
 that has been made public is that of
 a Brooklyn little Sunday school girl,
 who attended a meeting at which a
 collection was taken up. When the
 plate was passed she dropped \$2.65 in
 the basket. "That's all I have," she
 said apologetically. When she told her
 father, and asked him if she did right,
 he just reached out, folded her in his
 arms, and kissed her in silence. It is
 needless to say, she soon had another
 \$2.65.

New York, as well as other parts of
 the country, will feel the effects of
 San Francisco's big fire loss, most
 probably, more than in any other
 way. The insurance companies have
 lost such an immense sum by the fires
 that followed the quaking of the earth,
 they have a right to demand that
 they should be repaid. So they have
 indicated that they will raise the rates
 to much larger figures in New York
 city, and indeed, in the congested por-
 tions of all other cities. They don't
 think they get enough money, and
 they do think that their receipts
 should bear a better comparison to
 their payments for insurance in such
 events as the great earthquake. They
 have to count in the enormous losses
 in the city on the Pacific coast to de-
 termine what rates must be made to
 gather in enough resources to enable
 them to pay their way. They have to
 average both sides of the problem.
 Such a disaster, happily, comes very
 seldom, but it has to be reckoned with
 by the insurance companies. As the
 buildings burn down by the hundreds,
 the insurance companies must gather
 in money by the thousands in order
 that those who based their security
 upon the promise of the insurance
 companies may not be disappointed.
 The raising of San Francisco must of
 necessity, elevate the insurance rates
 in every direction.

The earthquake has worked an im-
 provement for New York, as well as
 for San Francisco. As the latter will
 abolish its Chinatown, so New York
 will sweep its misanthrope into a park
 and drive the Chinese from their
 haunts, and they will be scattered
 over the city, while the authorities
 will look sharp to detect any tendency

ARE YOU OFTEN BILIOUS?

Read This and Learn How to
 Prevent Attacks.

Biliousness is merely a term applied
 to a condition that exists when the
 body is overloaded with bile.
 The complexion turns yellow, eyes
 look dull, pimples, itching and
 eczema break out, headaches are ever
 present.

Biliousness has two great causes,
 constipation and defective liver ac-
 tion.

When Dr. Hamilton's Pills are taken
 they not only correct the bowels, but
 act directly on the liver, regulating
 its bile secretion.

Unlike other medicines which purge
 and give but temporary relief, Dr.
 Hamilton's Pills remove the condi-
 tion which causes biliousness, thus
 permanent cures are effected.

Dr. Hamilton's Pills do cure bilious-
 ness and liver ills under all circum-
 stances.

We prove this statement by produc-
 ing such convincing evidence as the
 statement of Fenwick Lockington, of
 New Harbor, N.S., who writes:
 "Three months ago I had no expecta-
 tion of ever getting free from periodi-
 cal bilious attacks. They were pre-
 ceded by dizziness and dreadful head-
 aches. If I stooped over my head
 would swim and a nauseous feeling
 creep into my stomach.
 "Dr. Hamilton's Pills fixed up my
 liver, drove all the bile out of my
 blood, and made me a well man in a
 few months. To-day I enjoy a good
 appetite, excellent digestion and the
 best of health. Dr. Hamilton's Pills
 did it all."
 Get Dr. Hamilton's Pills to-day.

To Have a Choir Festival.

Cyril J. L. Rickwood, organist and
 choir master, Knox church, Perth,
 writes: "With a view to improving
 the music in our churches, I am try-
 ing to inaugurate a choir festival on
 similar lines to those held annually
 at the Crystal Palace, London, Eng.
 It is a matter of some importance
 that you should be made to feel
 that the community, in the form of
 the state, cannot thus be deprived of
 its proper share. By taxing estates
 heavily at death the state marks its
 contempt for the selfish million-
 aire's unworthy life. Then Mr. Car-
 negie declared that it is desirable that
 nations should go much further in
 this direction. Indeed, in his opinion
 it was difficult to set bounds to the
 share of a rich man's estate which
 should go to the public, through the
 agency of the state, at his death, and
 by all means, Mr. Carnegie contends,
 such taxes should be graduated, be-
 ginning at nothing upon moderate
 sums to dependents, and increase
 rapidly as the amounts swell. "The
 chief objection" comes to the view
 of the state, whose bearing great
 sums all their lives, the proper use of
 which for public ends would work
 good to the community from which it
 chiefly came, should be made to feel
 that the community, in the form of
 the state, cannot thus be deprived of
 its proper share. By taxing estates

 chiefly came, should be made to feel
 that the community, in the form of
 the state, cannot thus be deprived of
 its proper share. By taxing estates
 heavily at death the state marks its
 contempt for the selfish million-
 aire's unworthy life. Then Mr. Car-
 negie declared that it is desirable that
 nations should go much further in
 this direction. Indeed, in his opinion
 it was difficult to set bounds to the
 share of a rich man's estate which
 should go to the public, through the
 agency of the state, at his death, and
 by all means, Mr. Carnegie contends,
 such taxes should be graduated, be-
 ginning at nothing upon moderate
 sums to dependents, and increase
 rapidly as the amounts swell. "The
 chief objection" comes to the view
 of the state, whose bearing great
 sums all their lives, the proper use of
 which for public ends would work
 good to the community from which it
 chiefly came, should be made to feel
 that the community, in the form of
 the state, cannot thus be deprived of
 its proper share. By taxing estates
