For the Stomach Heart and Kidneys

Dr. Shoop's Restorative is a Cause Cure—not a Symptom Cure.

It is a common mistake to take artificial stimulants for stomach troubles or heart stimulants for weak heart—or so-called kidney remedies for diseased kidneys. These organs do not act separately or of their own accord—they have no control over themselves—and not once in 100 times is the sickness the fault of the organ. It is the fault of the nerves which control the organs—and only through these nerves can stomach, kidney or heart disorders be cured. Dr. Shoop, of Boston, Massachusetts, has discovered the true cause of these ailments and has prepared a medicine which cures them. It is called Dr. Shoop's Restorative. It restores the nerves to their normal condition and cures the ailments which they control. It is a true cause cure—not a symptom cure. It is a true medicine—not a placebo. It is a true restorative—not a stimulant. It is a true cure—not a temporary relief. It is a true medicine—not a placebo. It is a true restorative—not a stimulant. It is a true cure—not a temporary relief.

ALL DRUGGISTS.

BOILS ALL OVER HIS FACE AND NECK

BURDOCK BLOOD BITTERS

DID FOR HIM WHAT FOUR DOCTORS FAILED TO DO

KEEWATIN, ONT., July 23rd, 1904.

Messrs. THE T. MILBURN CO., LTD., TORONTO, ONT.

DEAR SIR:—I am writing to let you know what Burdock Blood Bitters has done for me. I am a young man, twenty-two years of age, and for the last year I have been suffering from boils all over my face and neck. I have tried many different medicines, but nothing has done me any good. I was told to try Burdock Blood Bitters, and I did so. I had taken six bottles, and needless to say, I was not sorry to do so when I tell you how much better I feel now. I have had no more boils since I began to take Burdock Blood Bitters. I feel like a new man. I always keep a bottle in the house, now, and think it is a medicine that should be in every household.

Yours truly,
HENRY A. SMITH.

Kingston's Share.

In the legislature, yesterday, the government was begun with two items of business of special attractiveness to the people of Kingston, and they call for more than a passing notice.

The government has clearly recognized the good work of Queen's College in Eastern Ontario, and made a grant to its new pathological department. This means that Queen's College will, with the equipment which it will have at its command, be in a position to develop the splendid work on its special constituency with greater efficiency and satisfaction. The substantial aid which is now being given to it by the government indicates that the representations of the college, and especially of its medical department, have prevailed. The provincial institution in Toronto is deserving of the great generosity of the government and it has been exemplified in an uncommon way. But the Toronto University and its medical school cannot do all the work of Ontario and this fact has been duly and effectively impressed upon the government. It is presumed that work on the new school will be at once begun.

The act which concerns the proposed method of electing aldermen, and giving to the one who heads the poll, a term of three years following his choice, is an experiment, the working out of which will be watched with great interest.

Religious Clash in England.

Those who can recall the bitterness which was imparted into the discussion of the autonomy bill, and the vicious spirit which actuated some persons because the church was said to have expressed any wish or opinion with regard to it, can understand in some degree the feeling which now prevails in England. The education bill is before the commons. Its terms are known. There is to be a battle royal with regard to it and momentous will be the effect of its adoption or defeat in a political sense.

The liberal party is pledged to repeal the act which was passed by request of the Balfour government. This act was objected to in principle—that the school which receives public aid must be a public or national school. The liberals had the support of the non-conformists in the last election, they helped to turn the scale against the government of the day. Education was not the issue, before the people, but it was an issue, and an important one.

The outcome follows. On January 1st, 1906, if the bill now before parliament carries, the "non-provided" school may become the "provided" school. That is it may pass out of the direction of the denomination, and become a secular school. In other words the elementary school shall not receive public financial aid, unless it has been established by a local educational board or passed under its control.

Now there are in England to-day, 14,000 non-provided schools founded by the church, and distinguished by the religious teaching which is conducted in them. They do half the teaching or training of scholars. There will be an end of religious tests in teachers, if the bill becomes law, but not an end of religious teaching. Those who hold the buildings—the cards may leave them to the school authorities and may on Saturday, Sunday, or in the evening, give religious teaching in them. Twice a week, if the parents desire it, and outside of regular school hours, there may be religious teaching, and if four-fifths of the parents provide for it the instruction may be of a special kind.

The Anglicans and the Roman Catholics will not have the change which is proposed. Led by the bishops, and aided by the national party, there is to be a dead set upon the measure, and if it is carried in the commons, as it is likely to be, the lords will probably reject it. Defeat would probably aggravate the situation and make the continuance of the present act more and more unpopular. There is intense feeling over the legislation, Canadians may surmise—the case as it stands and they may not. With the people practically divided into two great camps, and warring on each other as they only can do, when influenced by religious frenzy, the clash will be of the severest kind.

Hon. Mr. Aylesworth defies public opinion says the Hamilton Herald, in practicing law while in the government. He is closing up the cases he had on hand when called to the government. Public opinion will not consider itself defied by that action.

Called On To Halt.

The Montreal Gazette is not enamored of the new power scheme of the Whitney government. It is true that the commission is helpless without the aid and favour of the government, whose creature or creation it is. It must act merely as an advisory committee. But such as it is there will be certain results to follow. The Gazette states these very candidly, and as it is conservative out and out, and most friendly to the Whitney government, its opinions will have the more force and effect.

There are too great perils apparent to the Gazette, (1), in the employment for political purposes of the great powers established by the bill, and (2), in the discouragement of private enterprise in a field in which as yet we are in the experimental stages. In the helplessness of the municipalities, our contemporary sees the prospects of trouble. "This," says our contemporary, "opens up a grand vista of usefulness for political purposes, which reduces such common every-day political bribes as normal school sites, etc., to mere pence. We have too much of this sort of thing in Canada already, and an extensive addition to it is not a matter to be viewed with equanimity. Serious as it is, however, it is not of as much importance as the discouragement of private enterprise. That feature of the Ontario government's proposition is not disguised in the least. No man or company of men may engage in the development of electric power, save and except they are prepared, whenever their proposition becomes a profitable one, to have it taken from them by the government on the terms named by the government."

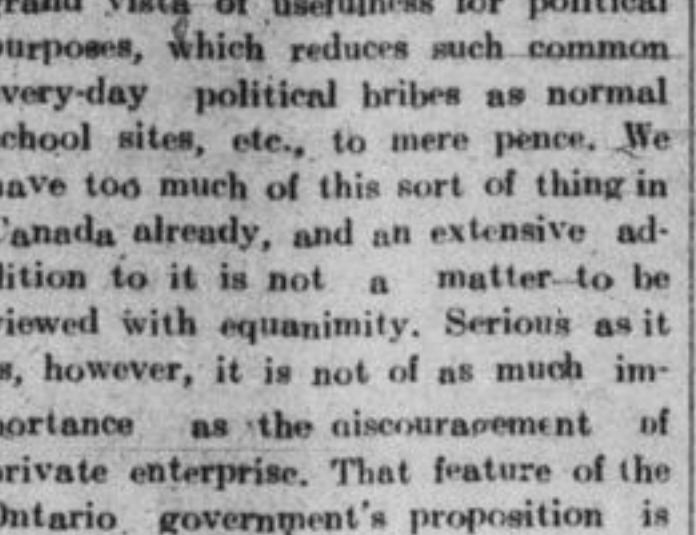

In this respect the Gazette does not say anything more candid and direct than the conservatives who officiated at the opening of a power plant at Niagara Falls on Tuesday. These saw a check upon the investment of foreign capital and their views were emphasized by an English banker who was present. There may be evils in the present electric franchises, says the Gazette, but they cannot justify the Ontario government in "wiping them out."

One thing more challenges the Gazette's attention. It is the current rate of municipal taxation. It is generally so high already as to forbid any addition in order to make good any loss made by mistake, the opportunity for which exists in this case. In what way? That the expenditure means millions, and "the saving is phenomenal, so problematical in fact, that two investigating commissions did not come within twenty per cent. of one another."

The Whitney government is warned by the friendly critic to be careful, because it is "cutting a blaze in an untracked forest." Is that not what it is aiming at? Is a government that is not afraid of launching out. It is brave—at least its premier is boastful—and it is not looking for advice. "Prudence suggests delay," says the Gazette. Does it? Mr. Whitney in substance replies, "Well, this government is not going to delay."

A DIFFICULT POSITION

Is That Conducting French Cabinet Department.

ARISTIDE BRIAND.

Paris, May 10.—There is no man in the French cabinet who has a more difficult position than M. Aristide Briand, who holds the combined portfolios of public instruction and public worship. Although he is a socialist and anti-clerical, he has taken a highly conservative position in the recent religious conflicts and has won the confidence of the Catholics, while the extreme radicals condemn his course.

SPIRIT OF THE PRESS.

Why Not?
Toronto News.
The Globe says the Ottawa opposition lacks self-control. Dear Mr. Borden, why can't you be calm?

A Little Premature.

Toronto Globe.
It begins to look as if San Francisco really needs the foreign help that President Roosevelt so lightly heartily declined.

Not The Same.

Montreal Star.
Through the experience of older world postage has failed. Things have never been quite the same in the postage world since Sir William Mulock deserted the industry.

Running The Gauntlet.

Toronto Globe.
The British education bill will encounter strong opposition undoubtedly, but it will get through the commons. What will happen it in the House of Lords is the real question.

Gaining By Experience.

Ottawa Citizen.
The new province of Alberta, profiting by the experience of older provinces, has decided to establish a public owned telephone system. The new provinces should be model communities if they only pay strict attention to avoiding the mistakes of the older units of confederation.

Republicans In Trouble.

Waltham, N.D., May 5.—Seeding in the west is well advanced, wheat being nearly all sown; this is the first year in importance and quantity to be sown here. The actual construction of a railway from Neche near the international boundary, to Winnipeg, J. J. Hill is also tapping Canada with several other lines farther west. The republican legislature of North Dakota, which has held power so long in this state, is honeycombed with dissatisfied office-seekers, who are seeking the overthrow of the party, and are in fact raising some excitement by stories of official corruption.

Editorial Notes.

An English banker says the Whitney government is doing its best to brighten capital away from Ontario. Mr. Whitney may realize that later on.

The school book question is going to a commission. Some of the contracts expire this year, and Mr. Whitney must do something to redeem his pledge.

The insurance companies, according to the evidence of an attorney before the insurance commission, make promises which they cannot keep. Is this the general experience?

In the larger cities smoke consumers are ridding the people of an awful nuisance. Something should be done about it here, and the city should lead with their utilities.

The man who jollied the postmaster-general into a bout on parliamentary or official ethics has learned something. The noisy member of the house is not always the best posted.

Goldwin Smith favours a properly organized divorce court in Canada, "instead of the obsolete and preposterous system of divorce by parliamentary legislation." He is not alone in this thought.

Mr. Vervalle, who represents Maison-neuve in the commons, says the labour organizations have not pronounced against the increased indemnities. Is this another way of declaring that the labour men endorse the salary grab?
