they should be further financially bene fited. It is likely, therefore, that the premier will introduce a bill to away with the pensions, Special cases can be dealt with separately.

The government has approved of the course which Mr. Aylesworth has pursued in continuing his private practice, after his appointment to the cabinet. The debate which arose over the proceeding, was another remarksome extraordinary features. This debate rose to a high level. Technical voice. In these matters there is no yet popular by way of the principle involved, it occasioned oratory of The story of it is too well known to high order. The postmaster-general equire reiteration here, but a side- himself, rose to a great height. light might be shown. When Mr. Bor- took the ground, as did the premier, den became leader of the opposition that after the duties of his office had he took charge of a party which was been accomplished, the lawver should torn and worn by jealousy and dis- be allowed to practise, just as the sension. He was given the dishearten- physician, business man, or journalist ng task of evolving from the debris can continue his profession. A party of the old conservative administration vote decided that this was correct. The opposition took the ground that when a minister engaged in the practise of the profession of law it was unfair to the judges, the public, and litigants. Justice could not be

ad- properly administered in all cases. Another matter of serious import has engaged the attention of parliasucceeded. They gloated over the fact, that workmen from the old country ment. Labor interests have noted shouted it in the byways and hedges have been brought to Canada under that this man was done in his own false pretences. Much destitution and province where they knew him best, misery have resulted. Last year a but their very success was the means law was passed by the Canadian parof supplying strength to the tory liament rendering it an indictable ofthe wonderful ability he is now proposed to ask the imperial parliashowing, became a fighting force in- ment, by resolution, to take similar finitely stronger and more competent action in Great Britain, that is, to ask the British house to pass a law dealing with the offense of sending emigrants to Canada under false prethat the government had already taken action, and so it may be that many of the heart-rending sights one has observed at Atlantic ports, and in the greater Canadian cities, stranded old country families, without work, and without means will be seen more seldon than heretofore.

SUGGESTED FOR GREATER NEW YORK.

It Would Solve the Transporta-

tion Question-Cars Could Be Hauled at 100 Miles An Hour. New York, May 12 .- F. B. Behr, the nventor of a mono-rail system apid transit, is now in this city, agitating in favor of his plan of establishing his system in Greater New York, with a view of solving the transportation problem, which is causing so much trouble to the authorities and the citizens. According to the inventor it would be possible, with his system, to haul passenger cars at an average speed of 100 miles an hour and thus reduce, by fully onehalf the fastest time made by express trains at the present time, Mr. Behr has mapped out a comprehensive system of rapid transit for New York, which would bring all five boroughs and the uttermost parts of those boroughs into close communication. He says, he has the capital ready to begin the construction of the system,

chise from the authorities. According to his plans the line would extend from Tottenville through he whole length of Staten Island to the Narrows, under the Narrows by tube to Fort Hamilton, thence through Brooklyn to the East River near the city hall, under the East river by tube to Manhattan Island, ip Manhattan Island by subway and elevated to the Bronx and Aingsbridge. According to the inventor's plan every point in any of the boroughs would thus be brought within fifteen minutes of Wall street. Of course, there would be lateral lines and branches, the whole system making about forty-six miles of four-track

provided he can get the required fran-

One of the branches would run to Coney Island, and for this road Mr. Behr now has an application pending for a franchise from the junction of Atlantic and Flatbush avenues, Brooklyn, out Fourth avenue and other streets to Coney Island, At a recent hearing before the railroad committee of the board of aldermen, Mr. Behr offered to give the city the free use of his patents if the municipality would build the Coney Island line. The Behr "mono-rail" which has

been endorsed by engineers in country and Europe, attains very high speed by the use of electricity for power, applied to a motor car running on a single rail. The rail is laid upon the apex of an A shaped structure, either on the surface, underground, or as an elevated line, and the car straddles it as a rider-does a horse. Both sides of the car hang far below the rail, thus lowering the centre of gravity, so that it is impossible for the car to turn over or leave the rail. In practical operation on a trial track three miles long at the Brussels exposition the Behr cars main tained an average speed of ninety miles an hour over a course of curves and straight track and the commission named by the British parliament which gave Mr. Behr a franchise to build one of his roads from Liverpool to Manchester, reported that an average speed of 110 miles an hour could be made with perfect safety. The Liverpool-Manchester line is now

### FOOD IRON

You need Iren. Everybody does. The harder you work, the more you worry, the more Iron you require. But Crude Iron won't do. Iron Pills, Iron Tinctures, Iron Tonics are useless in nineteen cases out of twenty. You must have pre-digested Iron or your blood will not assimilate it.

furnishes the Iron you need in combination with Cod Liver Oil, and so intimately incorporated with the oil that the most delicate digestive organs cannot fail to assimilate it.

The value of the combination cannot be overestimated. It builds up and fortifies the system against Coughs, Colds, Bronchial Affections and kindred troubles. If any of these diseases have already been contracted, or if the lungs are affected or threatened, FERROL cures by enabling nature to throw off the disease, not by "killing the germs," which is a physical impossibility. FERROL is an absolute specific for Croup and

Bronchitis, and no household where there are children can afford to be without it.

FERROL is not a patent mystery. The formula is freely published. It is prescribed by the best Physicians. It is endorsed by the most eminent Medical Journals. It is used in prominent Hospitals, Sanitariums, etc.
